Vol. XIV No. 1

January 2, 1976

Single copy price: \$2.00

## YEAR END MARKET ACTIVE; FRANKLINS SURGE FORWARD

Please Note Enclosed "Insert" Regarding Subscription Rates And Delivery Service

### The Market in Depth

ALLEN HARRIMAN

After several weeks of light to moderate bidding and widely scattered sales, the Franklin series has suddenly blossomed forth with a nearly full array of plus signs! Bidders have obviously tired of trying to locate the rolls they need at or near "bid"---and the result has been considerably higher bid levels for every issue in the 1948-58 group. Transactions, however, have remained rather few and far between. As is usual when serious bidding starts, sellers tend to hold back in order to see just how far prices will advance before another plateau is reached. The 1948-63 BU roll set is now bid at \$4700 (no sales) and single BU sets are now pegged in the \$240-\$265 range (only a few sets have changed hands).

Gains have also been impressive for "type" during this first reporting period of the new year. The smaller denominations---large cents thru dimes---have scored numerous substantial advances in the MS-65 category. Current bidders are especially quality conscious and the price gap between less than choice and top quality coins is widening week after week. In addition to type material, "dated" specimens in the Barber and later series are enjoying ever-increasing demand. Bidders continue to "throw the book away" when trying to buy full MS-65 pieces of specific dates. As has been mentioned several times in this column, many coins which list as "common dates" in the "Redbook" actually fall into varying categories from *scarce* to *rare* in full MS-65 condition. At present, the CDN staff is busy compiling realistic bid levels for these series from several reliable sources. Within a very few weeks price charts for all dates in several of the later series will begin to appear on a rotating basis in your weekly Newsletter!

PLEASE NOT THE "INSERT" WHICH ACCOMPANIES THIS ISSUE OF THE CDN---the reverse side of which carries the "service standards" for the new AIR MAIL/FIRST CLASS delivery from our mailing Post office in Santa Ana, CA. If your particular issue is being delayed, please contact your local Postmaster and fill out a "consumer service card" (we can supply these cards to you if they are unavailable at your local P.O.). Also note that ALL Newsletters now go by AIR at the new rate of thirteen cents!

### This Week's Market

**CENTS:** "Coronet" large cents (1816-39) are bid this week at a higher \$375 in strictly MS-65/70 condition. The most easily located dates in this group are from the "Randall hoard" (1816 thru 1820)---but even these issues in choice condition are becoming few and far between. Common date "good and better" large cents are wanted by the hundreds at \$2.95 per; demand exceeds supply at this price. BU Lincoln rolls are very quiet.

**NICKELS:** Every half-dime from the 1794-95 Flowing Hair type thru the "legend obverse" issue (1860-73) is carrying a plus sign this week! In addition, all three varieties of silver three-cent pieces and several nickels are bid at higher levels in MS-65 condition; check page five. Buyers, it should be noted, are having very little success with these "new, higher bids"! Buffalo rolls are steady and seldom offered; with the exception of the "proof only" issues, Jefferson rolls remain basically out of favor.

**DIMES:** "Bargain-hunting" continues to plague the Roosevelt series; several dealers will take small quantities of most issues---but they want to buy at discounts from even today's reasonable prices. Gains in "type" are numerous---again, see page five! There were type setting errors in the chart for AU/UNC Mercuries in the last issue; corrections (as well as up-dated bid levels) are included in the following listing:

	P	D	S		P	D	S
1916	\$ 10	\$500	\$13	1925	\$10	\$100	\$ 45
1917	7	30	11	1926	6	25	120
1918	25	30	25	1927	6	80	40
1919	15	50	45	1928	7	40	22
1920	8	25	25	1929	5	12	12
1921	325	300	NM	1930	12	NM	30
1923	7	NM	45	1931	18	40	35
1924	10	45	45				

**QUARTERS:** Bidders have an especially difficult time finding specific mint-marked issues in the Barber series; offering to pay "50% over" to "double Redbook" almost invariably fails to produce the desired MS-65 specimens. A few small gains have been registered by the pre-1941 Washingtons---BU rolls are still quiet in very light trading.

**HALVES:** In addition to the very active Franklins (see "The Market in Depth"), bidders are beginning to take note of the 1941-47 Walking Liberty rolls; bargain-hunting is not meeting with success---so bidders are edging their offering prices slightly higher.

1941S - The "key" late issue; bid is now \$1250

1944P - Slightly more scarce than the 43-P and 45-P rolls---bid moves to \$235

1945D & 1946D - Bid respectively at \$335 and \$320

**DOLLARS:** Several advances have been recorded for full MS-65 Peace dollars. Among the gains are \$450 bids for choice original rolls of 1922-D & S and 1923-D & S---be careful on these issues---"average BU" specimens do not command such prices! Three other Peace dollar issues which are usually poor

strikes are 24-S, 25-S and 28-S---again, buyers should examine specimens carefully before paying the MS-65 prices!

**PROOF SETS and MINT SETS:** Prices are mixed---with the later issues still topping buying lists. The 1975-S set is quite firm at \$22 bid.

**COMMEMORATIVES:** Several silver issues are still on the active list---and they have been joined this week by all of the BTW and WC sets---see page two.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$141.00 per ounce.

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount

Advertising space is limited; ads will  
be placed in first possible edition.

**DEALERS ONLY**

Expertly, smoothly cut, cleaned  
and polished coin jewelry. You  
will find no better.

Seven reasons why you should  
order your cut coins from me.

- (1) I offer 48 hour service as I have thousands of cut coins on hand at all times.
- (2) I give 14 day return privilege.
- (3) I cut only VF to AU coins. (No junk).
- (4) I cut down connecting points (bust to rim).
- (5) No order is too small or too large.
- (6) My prices are fair as I am selling to other coin cutters that can not keep up with demand.
- (7) You will not find better cut coins.

So if you are selling now, cutting  
your own, or just thinking of  
selling coin jewelry. Send for my  
price list you will be glad you did.  
Please state: Cut coins only or  
Jewelry in Jewelry boxes.

Single copy price: \$2.00

## TYPE MATERIAL SCORES SUBSTANTIAL GAINS Silver Commems Also Very Active; Most Issues Advance

### The Market in Depth

ALLEN HARRIMAN

Once again an extremely impressive number of advances has been registered by choice BU type coins. As a matter of fact, forty-eight (!) gains were recorded during this past week for material which falls strictly into the category of "choice"—MS-65 or better. As was mentioned last week, the spread between bid prices for "unc" (MS-60) and "choice BU" (MS-65) specimens is becoming greater each week. This, of course, doesn't mean that MS-60 material is worth any less than currently recorded prices—only that fierce bidder competition (coupled, in most instances, with true scarcity) is pushing bid levels for MS-65/better coins to unprecedented heights. The very fact that top quality coins are so difficult to locate indicates that today's bid-ask levels for coins of this calibre may well seem very, very reasonable a year or two from now!

Meanwhile, as the price spread becomes even wider, more and more MS-60 bid levels will begin to look like bargains. A large percentage of collectors who are just entering (or who have yet to enter) the "type collecting" field will be quite content with nice MS-60 uncirculated specimens of many of the earlier issues. Even now, price consideration (as well as virtual unavailability) has prompted most collectors to add XF or better Flowing Hair and Bust coins to otherwise MS-65 type collections. This situation will also affect to a greater and greater degree some of the more elusive Seated Liberty coins—"no drapery" and "arrows and rays" for example. In a word, don't overlook the investment potential of MS-60 type coins—particularly the earlier high-powered issues!

Rivalling the activity in type material, the silver commems have registered an even greater total of plus signs—fifty-eight issues are bid at higher levels this week! Several major dealers are getting in on the action and, as a result, most sellers are remaining on the sidelines with the usual "wait and see" attitude. Indications are that bid levels will move even higher in the coming weeks—if current bidder demand can be considered a determining factor. Frequent bids for 50-piece type sets (at \$5,900) and complete 144-piece sets (at \$12,250) are unsuccessful. A major problem when buying already assembled sets, of course, is that almost invariably there are a few "shakey" coins involved; this can be especially costly if (as is very often the case) the less-than-choice pieces turn out to be the Lafayette dollar, Hawaiian, Hudson, Missouri, Spanish Trail or other high priced issues. Buyers should be especially "picky" when buying commemorative halves—practically all issues can be located in MS-65/better condition without much trouble. The few issues listed above—plus the Grant "with star", Monroe, Pan-Pac, Sesqui, and Vancouver—are the most difficult to locate in fully struck condition without "cabinet friction."

### This Week's Market

**CENTS:** The 1935-S Lincoln roll is bid this week at a higher \$165 (up \$15). In the "short set", only the 34-D and 35-S rolls are consistently elusive in choice condition—even original rolls tend to be poorly struck, irregularly toned and/or spotted. Bidders are also finding that the 1970-S "small date" roll is rather difficult to locate—bid moves to \$45.

**NICKELS:** A couple of dealers are in the market for BU roll sets of the wartime issues—usually offering to pay the currently established \$800; in general, however, bidding in the Jefferson series still falls into the "bargain hunting" category. Pre-1934 Buffalos in choice, fully struck condition remain on buying lists—bidders are seldom successful. See page five for the numerous gains registered by MS-65 type material.

**DIMES:** Most of the Roosevelt rolls are appearing frequently on dealer "want lists." Bidders remain optimistic that they will be able to fill their needs at or just below current bid levels—few sales have resulted from this tactic. The 1916 D Mercury is solidly among the "most wanted" coins—with "full Good" specimens now bid at an even \$100! "Type" gains include:

S.L. dimes (no stars) - Bidders will now pay \$1,650 for strictly MS-65 specimens.

S.L. dimes (stars obv) - Bid moves to a strong \$375.

S.L. dimes (legend obv) - An occasional sale in the \$165 - \$185 range.

**QUARTERS:** In addition to strictly choice BU "full head" Standing Liberty quarters, several teletype bidders are now interested in quantities of the better dates in the various circ grades. Of particular interest are nice defect-free Finc/VF specimens of the key 1916-P and 1918/17-S issues—these, of course, are rarely available on the circuits as most dealers have ready retail customers. Pre-1941 Washington singles remain moderately active; very few bidders are currently interested in the "short set" rolls. Again, see page five for the substantial gains in MS-65 type coins!

**HALVES:** One of the most difficult W.L. rolls to locate is the 1939-P—bid is now \$550 and dealers will happily accept choice singles at \$27.50. Franklin rolls are quite firm at last week's higher bid levels—with advances recorded for:

1954S - Transactions noted as high as \$70.

1956P - Wanted in quantity at \$64; few are offered.

1959D - Rather a scarce late date; bids of \$45 are unsuccessful.

**DOLLARS:** A sudden and substantial jump has been enjoyed by the 1926-D Peace dollar roll—up \$65 to \$525 bid in a single week! This issue usually comes in choice fully struck condition—in contrast to the poorly struck 1922-D & S and 1923-D & S rolls (all four of which are now bid at \$465 in strictly MS-65 condition). Scattered minor changes have been noted for the rather quiet Morgan series.

**PROOF SETS and MINT SETS:** The 3-piece Bicentennial proof set is suddenly rather abundant—with quantities now easily available in the \$14.75 - \$15.75 range (Buyers are few and far between.) The 6-piece 1975-S proof set, however, is showing a bit more strength—with dealers asking for one hundred set lots at \$22.50. Other sets on buying lists include:

1960 "small date" - Wanted in quantity at \$16.50.

1971S & 1972S - Both are now bid at a higher \$5.

1974S - Up once again—with sales recorded as high as \$13.

**COMMEMORATIVES:** The silver issues are quite active—see "The Market in Depth."

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$138.50.

THE COIN DEALER NEWSLETTER reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the price in the Newsletter are from dealer to dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

## TYPE & COMMEMS STILL TOP BUYING LISTS Gem Carson City And Peace Dollar Sets Prove Very Difficult To Locate

### The Market in Depth

ALLEN HARRIMAN

Teletype dealers are seriously interested in buying complete sets of Carson City dollars as well as complete Peace dollar sets. Currently bidders are offering to pay as much as \$4800-\$4900 for the thirteen CC issues and \$2100-\$2150 for the Peace dollars (well over "bid" in both cases). Still, no sellers have been located. The reason for the lack of sales is that potential buyers have such exacting requirements--bidders specify that all of the coins in both sets must be fully struck MS-65+ coins without any bag marks or abrasions. The fact is that any dealer who had such a complete set in stock would probably also have a client who would be willing to pay an even higher figure for coins of this ultimate quality. In addition, if no ready retail customer were in the picture, the dealer would almost certainly find that breaking up a truly gem set for single sales would be even more profitable.

A silver dollar that accurately fits the above description is about as "gem" as is reasonable to expect--if true MS-70 coins are rare in any area of numismatics it is in silver dollars! The bid prices reported on page six are for full MS-65 coins --MS-65+/70 specimens are extremely few and far between and usually bring considerably higher prices.

Surprisingly little activity has been noted during the past two or three weeks for "Type I" Bicentennial dollars. The Denver issue is of a sufficient mintage not to carry any premium at the present time--and is virtually never mentioned on the teletype circuits. The Philadelphia coin, on the other hand, has a mintage of only 3,644,000--and of these 1.9 million are included in the 1975 twelve-piece mint sets. Even so, the few bidders who can be located are only offering to pay \$30 or so per roll--and sellers generally ask around \$45 (the two seldom get together and sales have been quite limited).

Type coins and silver commems continue to dominate teletype activity. Sales of the commems have been moderate as prices advance--but choice type material simply doesn't seem to be available even at today's advanced bid levels. Those few dealers who have a few true MS-65/better specimens don't hesitate to write out price tags that are 25% to 50% over current "bid" levels!

### This Week's Market

**CENTS:** The 1922-Plain Lincoln is still enjoying strong bidder demand; dealers have raised their bids for Good specimens to \$48--and VG pieces are bid this week at \$55! Quantities of all grades are wanted--but sales have remained extremely limited. Strictly choice BU rolls of 1935-S Lincolns move forward again (bid now \$180)--and this tough issue has been joined by the 1947-P (bid now \$14). The 1970-S "small date" roll is also up again--bids of \$47 are unsuccessful.

**NICKELS:** "Type" (MS-65) continues to bubble merrily away--advances this week include:

- 1913-P (I) Buffalos - Full MS-65 specimens are bid now at \$27
- Bust half dimes - Bids of \$425 result in few if any sales
- S.L. half dimes (no stars) - Choice pieces are wanted at \$650
- S.L. half dimes (arrows) - Bid reaches \$325 this week

**DIMES:** Bargain hunters find that \$100-\$105 is apparently the "bottom" for common date Mercury rolls--very active "below market bidding" just doesn't prove successful. Several dealers are also trying to buy most dates in the Roosevelt series at 5%-10% "off"--but, again, sellers are sticking to currently established levels. Check page five for the further strong gains registered by type coins!

**QUARTERS:** Strictly choice BU 1932-D Washingtons are now bid at \$425--with no sellers in sight! Several other advances have been recorded for the pre-1941 singles (1932-S, 1934-D & 1935-D are particularly elusive). The rare 1901-S Barber quarter is wanted in all grades from AG thru full XF--this coin is perhaps the most elusive of all regular twentieth century issues--bidders seldom encounter even a single specimen! "Type" gains include:

- S.L. Quarters (no motto) - Full MS-65 specimens receive bids of \$400
- S.L. Quarters (arrows, 1854-55) - Bidders offer a record \$650
- Standing Liberty (type two) - Choice "full head" MS-65 pieces are now bid at \$140

**HALVES:** Bidders keep the pressure on all Franklin rolls--even though they hesitate to continue raising bid levels; sales have been rather infrequent. One major dealer is offering to pay \$50 per for fully struck MS-65 1940-S halves--this is one of the two or three toughest dates in the entire 1916-47 series to locate in this top condition!

**DOLLARS:** The Carson City issues are of considerable interest--several plus signs have resulted from continued attempts to buy choice pieces. Bidders are having a difficult time locating original BU rolls of 1971-P & D and 1972-P & D Eisenhower dollars; apparently these weren't widely saved--and now dealers need rolls to assemble complete sets for retail sales.

**PROOF SETS and MINT SETS:** Scattered light changes--sales are moderate across the series. The 1975-S six-piece set continues to show strength; transactions mostly around \$23.

**COMMEMORATIVES:** Even more plus signs this week than last; several bidders are active in this area. Of particular interest this week are the high-powered singles and PDS sets--check page two.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$137.50.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer to dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock through  
a broker.

**ADVERTISING RATES:**

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads will  
be placed in first possible edition.

**GOLD**

1903	La. Purchase/Jefferson	335.00	365.00
1903	La. Purchase/McKinley	335.00	365.00
1904	Lewis & Clark	835.00	910.00
1905	Lewis & Clark	825.00	900.00
1915-S	Pan-Pacific \$1.00	210.00	230.00
1915-S	Pan-Pacific \$2.50	1100.00	1200.00
1916	McKinley	220.00	240.00
1917	McKinley	290.00	320.00
1922	Grant	695.00	750.00
1922	Grant-with star	695.00	750.00
1926	Sesquicentennial \$2.50	200.00	220.00

Complete Sets: 50 pc (sil) Bid \$5900 - Ask \$6250, 144 pc (sil) Bid \$12,250 - Ask \$13,100; Gold - Bid \$5250 - Ask \$5500.

The prices listed are for "choice BU" (MS-65) specimens; gem pieces (MS-65/70) will bring more---often substantially more---and "UNC" coins of lesser quality will sell for lower prices. Accurate grading is extremely important.

Superb full red (MS-70) specimens often bring far more than a price listed below.

NICKEL and SILVER TYPE COINS

Gem (MS-65/70) specimens bring proportionately more than the prices listed below.

## PROOF TYPE COINS

Superb (MS-70) proofs bring proportionately more than prices listed below. "average" pieces bring less.

## TYPE REMAINS STRONG; COMMEM ADVANCE SLOWS

Circulated Key Date Singles Are On Many "Want Lists" --- See Page Four Chart!

### The Market in Depth

ALLEN HARRIMAN

Even though several major teletype bidders are still in the market for silver commemoratives, the recent forward momentum has slowed considerably. Buying lists are shorter than in previous weeks and the few recorded gains are slight. More sellers are also in evidence. An area of moderate exception includes all of the BTW and Washington-Carver PDS sets--one dealer is still interested in these issues and this week's gains are in line with recent advances. Whether this general lull is temporary or not remains to be seen; it is obvious that at least a few dealers would like to hold prices at current levels. The eleven gold issues, by the way, have been surprisingly quiet during the past several months. These scarce coins shouldn't be affected by lower gold bullion prices--a price rise in this area wouldn't be at all unexpected.

There is also another area in commems that is unaffected by overall active or quiet trading periods. Week after week there are dealers who are constantly looking for gem Lafayette dollars. Specimens of this issue which fall into the strict MS-65/better category are extremely elusive--and true gems are rare. Currently a few very particular dealers are offering to pay \$700 for gems and \$1000 for gem prooflike pieces. Regular daily bids are unsuccessful and chances are that bidders would be willing to listen to "quotes" on this issue. Strictly gem Isabella quarters also carry a premium over the MS-65 price--bidders will pay \$225 to \$250 according to the quality of the particular coin involved.

Price advances for strictly MS-65 type material continue to be quite substantial--and, according to current bidders, only about 30%-40% of the coins shipped actually fit the requirements of "mint state 65". As bid prices soar, more and more dealers apparently take a chance that their MS-60 or MS-60+ coins will "stick". True, there is a fine distinction between MS-60+ and MS-65--but knowledgeable numismatists know the difference--and when hundreds of dollars are involved bidders certainly have a right to reject coins which "just miss". Those dealers who are presently trying to buy virtually all "type" issues in MS-65 condition have ready clients for strictly graded material--but these customers are generally rather particular and dealers therefore must necessarily send back the MS-60+ specimens. Today's quality conscious collector/investor is becoming more and more astute--he will pay well for choice material and he is better able to "tell the difference" than in years past!

### This Week's Market

**CENTS:** Three key Lincolns (09-SVDB, 14-D and 22-Plain) are all sporting new plus signs; bidders want quantities--but, as usual, manage only to locate an occasional single or two. One dealer's interest in choice BU 1935-S and 1947-P rolls has again led to higher bid prices; virtually all of the other Lincoln rolls are easily located. However, buyers must be careful--many of the available rolls are not nice enough for future "single sales".

**NICKELS:** Mild interest in the 1950-D Jefferson roll has edged the bid up to \$285 (with a few transactions at \$290). Bargain hunters find that common date Buffalo rolls are not easy to find; choice better date singles are virtually impossible at almost any price! Choice BU (full MS-65) Liberty head nickels are wanted now at \$60--for other substantial gains in "type" see page five.

**DIMES:** More and more teletype bidders are attempting to buy all dates in both the Barber and Mercury series; their offering prices for MS-65 specimens usually leave the Redbook listings far behind. Still, finding even one or two choice singles can take weeks of bidding! This week's gains in type coins include:

Bust type - Large size bid at \$1550 and the reduced size at \$925  
S.L. dimes (no stars) - Choice pieces are not available at the higher \$1800 bid  
S.L. dimes (no drapery) - A single choice specimen changed hands at \$500!  
S.L. dimes (arrows, 1873-74) Very tough in true MS-65; bid is now \$525

**QUARTERS:** In addition to the very scarce circ 1901-S, bidders are now in the market for quantities of all grades of the two other key Barbers--1896-S and 1913-S; currently established bid levels prove ineffective. Frequent requests on the various teletype circuits for MS-65/better 1932-D Washingtons also met with no success; bid has moved up to \$435.

1953P - Up slightly--wanted in quantity at \$56.50

1958P - Bidders also want ten to twenty rolls--at a higher \$45

**HALVES:** Gains have been registered by four tough Walking Liberty rolls--1939-P & D and 1940-P & S. In addition, renewed bidding in the Franklin series has raised bid levels for practically every issue thru 1958; buyers will take several rolls of each--and up to twenty of the lower priced dates. The BU roll set 1948-63, by the way, is now bid at \$4900--and single BU sets at \$245. Type half dollars score some impressive gains--see page five!

**DOLLARS:** Several gains have been recorded for the better date Morgans. "Quality" remains the key word--bidders want the very best--and many dealers are willing to listen to "any reasonable quote" on just the right coin. The "Type I" Philly Bicentennial dollar roll is now trading lightly in a more narrow price range--bid around \$35 and ask around \$40 (sales at \$39).

1885CC - Bidders now offer \$1300 for choice rolls

1886O & S and 1888S - Each of these singles are bid at \$110 in strict MS-65 condition

1889CC - A single choice piece has recently traded at \$2900!

**PROOF SETS and MINT SETS:** The 1975-S six-piece set continues to strengthen its position--bid is now a firm \$23.25 (the 75-S "proof only" cent roll is also stronger at \$660 bid). Other sets currently on "want lists" include 1953, 1954, 1955, 1956, 1958 and 1960 "small date".

**COMMEMORATIVES:** Bidding has slowed considerably--see "The Market in Depth".

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$123.50.

Complete Sets: 50 pc (sil) Bid \$5800 - Ask \$6150; 144 pc (sil) Bid \$12,000 - Ask \$12,850; Gold - Bid \$5250 - Ask \$5500.

The prices listed are for "choice BU" (MS-65) specimens; gem pieces (MS-65/70) will bring more--often substantially more--and "UNC" coins of lesser quality will sell for lower prices. Accurate grading is extremely important.

## FOUR NEW CHARTS BEGIN WITH THIS ISSUE

Bid-Ask Prices for MS-65 Mercuries & Standing Liberties, XF/AU Commems Covered

### The Market in Depth

ALLEN HARRIMAN

In line with a continuing policy of service to the numismatic community, the CDN is introducing four new bid-ask price charts with this week's issue! First, increasing interest and more frequent trading of XF/AU silver commemoratives now warrants the regular inclusion of prices for these high grade circulated pieces. A large percentage of the XF/AU commems being bought on the teletype circuits are for shipment to Europe—where collectors often assemble type sets in circ condition. At this point there are no recorded bids for the scarce issues which are not needed for fifty-piece type sets (Alabama 2x2, 1921 Pilgrim, etc.) Also, the various "PDS" sets are not included on current buying lists (most of these sets are rarely found in circ condition).

Readers will also note that prices for the eleven gold commems have been broken down into two separate categories—MS-60 and MS-65/70. This distinction is being made due to the fact that prices vary considerably according to quality. Whereas the majority of uncirculated silver commems fall into the MS-65 category (with the exception of a few issues), this is not true for their gold counterparts. Our staff feels that these two new additions to the commem coverage on page two will be of considerable benefit to subscribers!

In addition to the changes in commem coverage, two entirely new areas have been added to the CDN—bid-ask prices for all dates in both the Mercury dime and Standing Liberty quarter series in choice BU (full MS-65) condition. These two series are enjoying more and more interest from collectors and investors alike—and teletype dealer bids have, in many instances, been leaving current "Redbook" listings far behind. (This is especially true for the "full head" specimens of the S.L. quarters.) As a result of current activity, no easy reference for prices changes has been available. Now—with these two new charts—CDN subscribers will know exactly what is happening in these two popular and volatile series.

The Newsletter staff is also pleased to announce that in two weeks (Feb. 13th issue) further chart additions will be made—all dates in both the Buffalo nickel and Walking Liberty half dollar series will be covered by bid-ask prices for MS-65 specimens! These four new charts will alternate on a rotating basis with the various gold series which now regularly appear on page two. Again, it is the CDN's policy to keep up with the ever expanding areas of trading interest; we hope that these latest additions will be helpful to all Newsletter subscribers!

### This Week's Market

**CENTS:** The 1975-S "proof only" Lincoln roll is again on the move—bidders find that offering to pay \$725 meets with few if any results! The 1972/72 double die is also of considerable interest to some teletype bidders; the current largely unsuccessful bid is \$3650 per roll (or \$73 per coin). One dealer's attempt to buy strictly choice BU rolls of 1935-S and 1947-P Lincolns has now pushed bid levels to \$225 and \$18 respectively.

**NICKELS:** Jefferson rolls reflect a few slightly lower prices—with a minimum of buyer interest. This week's further advances in "type" include:

- Liberty nickels - Bidders are now willing to pay \$62.50 for choice pieces
- Half dimes (1794-95) - Bid reaches \$7000 for MS-65 specimens—no sales!
- S.L. half dimes (no stars) - Offers of \$700 prove quite ineffective
- S.L. half dimes (no drapery) - Bid moves up to \$375

**DIMES:** One dealer is offering \$15,000 for a choice BU (MS-65) complete set of Barber dimes (less, of course, the rare 1894-S). The "Redbook" listings add up to only \$9150—yet this offer of 64% over current catalog prices has failed to produce a response. The fact is that a bid of \$20,000 would more than likely meet the same fate! See page five for the numerous substantial gains registered by type coins.

**QUARTERS:** Practically all of the better date Barber quarters are regularly appearing on dealer buying lists in strictly MS-65/better condition. However, seldom is anything except a "common date" listed for sale—most teletype dealers have ready retail outlets for the scarce to rare issues (again, at prices usually well in advance of current catalog listings). Among the several gains this week for "type" are:

- Seated quarters (no motto) - Dealers will now pay \$440 for choice pieces
- Seated quarters (arrows & rays) - Bid move up to \$1350!
- Seated quarters (with motto) - Transactions in the \$350 area
- Standing quarters (type II - full head) - Up once again; bid is now \$175

**HALVES:** Again Franklin rolls are recording bid level advances; sellers of choice rolls are few and far between—apparently assuming a "wait and see" attitude while prices continue to move ahead. Among the later Walking Liberty issues, 1934-P and 1939-P & D remain quite elusive.

**DOLLARS:** In line with lower silver bullion prices, bid-ask levels for the most common Morgan rolls slip back slightly in decidedly lack-luster trading. The "type one" Philly Bicentennial dollar has "settled" even further—rolls can be bought in lots of "six or more" at \$30! One optimistic teletype bidder has offered to pay \$2300 (\$300 over ask) for a "superb, flawless" set of Peace dollars—no sellers in sight!

**PROOF SETS and MINT SETS:** Further strength is being shown by the 1957-S six-piece set—with transactions during the week as high as \$25. Other changes are minimal—trading rather light.

**COMMEMORATIVES:** The number of buyers and sellers is now about equal—price changes are minor and sales have been limited. More interest, however, has been noted for choice BU specimens of the eleven gold issues—with a few dealers now in the market for complete sets at \$5250 bid.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$128.00.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

1<sup>ST</sup>and Still  
Foremost

## 1976-S PROOF SETS REACH TELETYPE TRADING

### Proof And MS-60 Type Material Join Strong Price Upswing

## The Market in Depth

ALLEN HARRIMAN

The new 1976-S six-piece proof set has already hit the teletype circuits! Readers may remember that it was mid-July last year before the 1975-S set was available (even though bids for "future delivery" were recorded in mid-April.) At this point, of course, dealers have only an extremely limited number of 1976-S sets available--and the bid-ask spread is currently a rather wide \$20-\$25. As usual, it will take several weeks (and considerably larger quantities of available sets) for prices to settle down to orderly trading. It became "official" that the 1975-S cent would be a "proof only" issue in late July of '75--and the ask price for the proof set moved from \$17.50 to a peak of \$29 by late October. This year, of course, is different. Not only have the proof sets appeared several months earlier but the "proof only" status of the 1976-S Lincoln was officially announced while sets were still available for ordering! In addition--to further enhance the desirability of the 1976-S issues--it was also announced that "type two" Eisenhower dollars would be excluded from all 1975-S six-piece sets and included in the 1976-S version.

Even though order "lagged" during the first couple of months, investor interest was obviously spurred by these two announcements. As of January 16th total orders for 1976-S sets were placed at 3.7 million--with the very strong possibility that processing of late orders (the cut-off date was Jan. 23) would push the total orders well toward a record four million sets!

The explosion in bid prices for "type" continues--and many of the MS-60 coins have now been included in the very active bidding. In addition, more and more dealers are getting in on the act--creating even greater competition for the little available material. Recent price advances have been quite phenomenal in many instances--and bidding pressure, if anything, is on the increase. Sellers are currently quite content to sit on the sidelines!

Last week's new charts for MS-65 early Mercury dimes and Standing Liberty quarters has created considerable teletype bidder interest; buyers aren't having much luck locating choice specimens. Next week's CDN issue will carry two more new charts--bid-ask prices will be reported for choice BU early Buffalo nickels and Walking Liberty half dollars.

## This Week's Market

**CENTS:** Locating choice BU rolls of 1970-S "small date" cents is not as easy as the current \$48-\$51.50 price range might indicate; there are numerous dealers who consider this roll to be considerably more scarce than the 1960-P version (neither mintage is recorded). Many substantial gains can be found on page five for half-cents thru two-cent pieces in MS-60, MS-65 and choice proof condition.

**NICKELS:** Other than the 1971-S and 1972-S "proof only" rolls (both now bid at \$77.50), the Jefferson series remains extremely quiet. Several dealers are attempting to buy choice BU 1938-D Buffalo rolls at \$235--with very little success. In circ "type", the 1794-95 Flowing Hair half-dime is in particular demand; the two Draped Bust versions are also on several "want lists." BU and proof type coins continue to soar--again, see page five!

**DIMES:** Last week's addition of the bid-ask chart for MS-65 early Mercury dimes has resulted in numerous dealer offers to "pay bid" for all issues; some buyers will take "up to ten pieces" of each date! Both types of Draped Bust Dimes are wanted in all grades--sellers are very few and far between. Further attempts to buy BU and proof type have again pushed bid levels to record heights!

**QUARTERS:** Except for the three early key singles, the Washington series is taking the "back seat" to strong action in (you guessed it!) type coins. Gains in choice proofs include:

- S.L. quarters (no motto) -- Bids of \$500 prove quite ineffective
- S.L. quarters (with motto) -- One or two transactions noted around \$400
- S.L. quarters (arrows, 1873-74) -- None offers to bidders at \$725
- Barber quarters -- Bid moves to \$350; a few sales registered.

**HALVES:** Circulated Flowing Hair halves (1794-95) seem quite elusive; several teletype bidders are in the market for quantities of any grade. Common late date Philly rolls of Walking Liberties are now also wanted in quantity--bid moves to \$235; further advances have been recorded by a number of Franklin issues (in particular demand are 52-D, 53-S, 56-P, 57-P and 58-P). Gains in BU and proof type material are far too extensive to list here--again, take a look at page five!

**DOLLARS:** Along with the halves, circ 1794-95 Flowing Hair dollars are appearing on several buying lists--very few specimens have been located. The "with motto" Seated Liberty dollar is considerably more difficult to find in full MS-65 condition than is the "no motto" type--and bid levels are finally reflecting this fact!

**PROOF SETS AND MINT SETS:** Rather minor fluctuations continue to be the rule in this area; the 1976-S set is still quite strong--with the bid moving to \$24.75.

**COMMEMORATIVES:** The bid for choice MS-65/better sets of the eleven gold issues has finally begun to move--dealers will now pay \$5400 and they will take "several" sets. Numerous small advances have again been registered by the silver issues--with the BTW and W-C sets enjoying continued demand.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$128.20.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

### ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

COMPLETE SETS: 50 PC. (SIL) BID \$6100 - ASK \$6550; 144 PC. (SIL) BID \$12,500 - ASK \$13,250; GOLD - BID \$5400 - ASK \$5650.

The prices listed are for "choice BU" (MS-65) specimens; gem pieces (MS-65/70) will bring more--often substantially more--and "UNC" coins of lesser quality will sell for lower prices. Accurate grading is extremely important.

## NEW BUFFALO AND W. L. SINGLES CHARTS THIS WEEK MS-60, MS-65 And Choice Proof "Type" Continues Major Upswing

### The Market in Depth

ALLEN HARRIMAN

Two more new charts make their debut in the issue of the CDN--bid-ask prices for all early dates in both the Buffalo nickel and Walking Liberty half dollar series follow the recent addition of prices for Mercury dimes and Standing Liberty quarters on page two. Response to the January 30th dime and quarter charts has been very positive--with several teletype dealers already in the mood to raise bid levels for numerous scarce MS-65 issues in both series. Chances are that the same results will follow this week's addition of early Buffalos and Walking Liberties; these new charts constitute the first published teletype bid-ask prices for these four popular series. Current catalog prices are being left far behind in most instances.

And while on the subject of "MS-65"--perhaps another definition of this grade is in order (particularly in view of recent very rapid advances in bid levels for type coins in this top condition). First, it should be noted that a majority of the "uncirculated coins" offered for sale--whether on the teletype circuits, on convention bourse tables or at auction--do not fall into the strict MS-65 category (regardless of the descriptions attached). Roughly stated, most pre-1934 uncirculated coins only can be honestly graded MS-60 or MS-60+. There are numerous exceptions, of course, to this 1934 dividing point (mostly Philadelphia issues such as 1909-VDB Lincolns, 1913-P (I) Buffalos, many Morgan issues)--but, in general, most of the earlier twentieth century issues and certainly a vast majority of pre-1900 coins cannot accurately be called strictly MS-65.

The problem is, however, that many sellers and cataloguers of coins tend to "push" the grade (at least a bit)--calling "super-sliders" MS-60, MS-60 specimens become MS-60+ or so, MS-65 pieces are often called "gem" and the rarely encountered true gem coin is occasionally called "the finest known". Grading, of course, is a subjective art--but standards for "MS-65" are fairly clear. The coin must have full original luster (even though nickel or silver may be naturally toned), it must be fully struck and have a minimum of light bag marks or abrasions. (Note the word "minimum"--some teletype bidders ask, as an example, for "fully struck choice MS-65 Morgan dollars with absolutely no marks"--which, it appears, is asking a little too much for the MS-65 category.)

The several teletype dealers who are in the market for quantities of MS-65 type coins at current record levels certainly will not accept anything less than strictly choice material. Even at today's prices bidders are receiving only scattered results--except for the rather large percentage of rather optimistically graded coins which are being shipped back and forth. Bidders at current levels have a right to expect properly graded coins!

### This Week's Market

**CENTS:** Interest in a few specific dates in the Lincoln series has pushed a few bid levels higher--1935-S is now bid at \$245, 1947-P is bid this week at \$19.50, 1953-P is wanted in bag quantities at \$3 per roll and buyers want several choice rolls of 1960-P "small dates" at a higher \$100. The 1970-S "small date" also remains elusive--bid is now \$50. Advances for type coins are again numerous--see the page five chart.

**NICKELS:** Small gains have been registered by scattered dates in the Jefferson series; a few astute dealers and investors are taking note of current bargain prices. This week's "type" upswing includes:

Shield nickels (rays) - Bid \$215 in MS-60 and \$475 in MS-65 condition  
Liberty nickels (w/cents) - Choice pieces will now fetch at least \$70  
Buffalo nickels (type I) - Bid moves to \$30

**DIMES:** Circulated specimens of the 1798-1807 Draped Bust dime are quite difficult to locate--even at recently advanced bid levels. The 1916-D dime has moved ahead over last week's prices; bidders will now pay \$105 Good, \$135 VG, \$205 Finc, \$285 VF and \$375 XF. Gains in MS-60, MS-65 and choice proof dimes are far too numerous to list here--again, check the plus signs on page five!

**QUARTERS:** The key 1932-D and 1932-S Washington singles are now bid (rather unsuccessfully) at \$450 and \$200 in choice MS-65/better condition; "super-sliders" of both dates are often shipped as choice specimens. This week's gainers among the various Seated Liberty quarter types include:

"No motto" - One or two transactions at the \$500 level  
"Arrows & rays" - Bids of \$1550 are completely unsuccessful  
"Arrows" versions (1854-55) and (1873-74) - Bid now at \$850 and \$750 respectively

**HALVES:** Strictly choice original BU Barber halves are now worth more than choice proofs!--bidders will pay \$525 for the proofs and \$550 for choice MS-65 specimens. Strong gains in the very active Franklin series are led by the 1952-D roll--which is wanted in fifty roll quantities at a much higher \$75.

**DOLLARS:** Numerous Morgan and Peace dollar issues are suddenly on one or two dealer "want lists" at higher prices--this might well be an interesting area to watch for the next several weeks! Further advances by the 1922-D & S and 1923-D & S issues warrants another "word to the wise"--\$25 is the bid for strictly well-struck MS-65 pieces. The 1976-P (type I) dollar roll is currently bid at \$35; ask is around \$40.

**POOR SETS and MINT SETS:** Interest in government issue mint sets from 1959 through 1974 is on the increase--several sets have recorded small gains (bidders want 100 to as many as 500 of each). The 1975-S six piece set is again

higher--at \$25 bid; the 1976-S version is pegged this week at a more relaxed \$19-\$21.

**COMMEMORATIVES:** One buyer still is in the market for all of the BTW and W-C sets--once again at higher levels. Silver commem trading, in general, is light to moderate and this week's advances are minimal. The gold issues in MS-60 continue to settle at slightly lower levels.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$129.40 per ounce.

COMPLETE SETS: 50 PC. (SIL) BID \$6100 - ASK \$6550; 144 PC. (SIL) BID \$12,500 - ASK \$13,250; GOLD - BID \$5400 - ASK \$5650.

The following bid-ask prices are for fully struck choice BU (MS-65) specimens; weakly struck, bag marked or otherwise inferior pieces bring lower prices  
and superb gem (MS-65+/70) coins may well command premiums over listed prices.

1,767,691 Mint Sets Sold In '73; "Redbook" Figures Incorrect For Key "P" & "D" Ikes!

### The Market in Depth

ALLEN HARRIMAN

According to figures obtained directly from the Bureau of the Mint, only 1,767,691 mint sets were sold in 1973. This is the lowest number of government issue mint sets sold since 1964---and this official mintage report is in direct contrast to the "two million" figure shown in the 1976 "Redbook" for the 1973-P & D Eisenhower dollars. Normally this difference in mintage figures would be of little significance---mint sets generally are not uppermost in the minds of collectors or investors. However, the mintage of the 1973 set is of particular importance because this set is the only source of both the '73 Philly and Denver dollars. The 1,767,691 mintage figure makes these two key coins considerably more scarce than previously thought.

The only other example of a "mint set only" issue is the 1970-D Kennedy half dollar---with an official mintage of 2,038,134. This set is currently listed in the \$14.50-\$15.50 range solely because of the scarcity of this one coin. The contrast between the approximate \$15 wholesale price tag attached to the 70-D half and the current wholesale price of about \$6 each for the lower mintage 1973 Philly and Denver dollars is apparently already of considerable interest to a few knowledgeable dealers and investors. Recent teletype attempts to buy quantities of either the '73 sets or rolls of the dollars have met with only limited success. Should the price of these two key dollars reach only the current level of the larger mintage 1970-D half, the value of the 1973 mint set would more than double! Keeping the rising popularity of the Eisenhower dollar set in mind (there are already at least twenty-five issues in the 1971-76 set), these two key '73 "mint set only" issues would definitely seem to have an excellent investment potential!

Note the almost complete run of plus signs registered on page five for circulated type material! Virtually all of the XF and AU prices are substantially higher---and the early Flowing Hair and Bust issues show gains in practically every grade. At two major auctions within the past few days dealers have been buying not only MS-60, MS-65, choice proof and dated material at record-breaking prices, but their interest in the above mentioned circ coins has been extremely active to say the least. Not long ago the CDN pointed out that higher grade circulated material had to start closing the ever-widening price gap between XF/AU and the uncirculated grades. It is apparent that at least a start in this direction is in the wind!

### This Week's Market

**CENTS:** The early "types" of half cents and large cents register substantial advances in virtually every grade; recent auction results show that dealers are definitely "out of stock" in this and several other areas. The scarcity of copper-nickel cents in strictly choice proof condition is finally being realized---bids of \$350 are unsuccessful (most available specimens are spotted and/or hairlined).

**NICKELS:** Bidders now offer to pay \$7000 for complete choice BU (MS-65/better) sets of Buffalo nickels (less, of course, the overdate); all of the pre-1934 Buffalo singles are also on "want lists"---and choice pieces have been realizing prices far in excess of Redbook at auction in the past few weeks. Interest is high for quantities of 1879, 1880, 1881, 1885 and 1886 nickels in any grade; bidders seldom locate even a single coin!

**DIMES:** Topping the Buffalo set, complete choice BU sets of Mercury dimes (again, less the overdate) are receiving bids of \$7500! Any choice BU pre-1934 single will already fetch the January 30 CDN "ask". Flowing Hair and Bust half dimes and dimes in all grades enjoy a major price upswing---see page five for the details!

**QUARTERS:** Numerous teletype dealers are also already in the mood to pay the January 30 CDN "ask" prices for choice MS-65 "full head" Standing Liberty quarters. Any "flat head", by the way, will now realize at least \$100 in strictly original choice BU condition! Bidders are having no luck at all finding 1796 Draped Bust quarters in any grade---and bids have been increased substantially for the 1804-07 as well as both sizes of the Bust issues (again, see page five for the many gains).

**HALVES:** Common date P-mint Walking Liberty rolls are bid this week at a higher \$245; dealers will take quantities---but sellers seem to keep price tags just ahead of the market. Franklin rolls are still "hot"---and higher bids result in only widely scattered transactions. Gains have been registered by practically all of the various "types" in XF and AU condition---with the Flowing Hair and Draped Bust issues wanted in any grade!

**DOLLARS:** Last week's "awakening" of the silver dollar market is gaining momentum; new bidders are joining the activity and more dates are on the numerous buying lists. It should be remembered that when dealers ask for "strictly well struck MS-65 pieces" that they mean exactly that; specimens which "just miss" will not bring the prices listed in the MS-65 column on page six!

**PROOF SETS and MINT SETS:** Rather a quiet area this week---the 1975-S has recorded sales around \$25.50 and the 1976-S set has, thus far, received little

attention in the \$19-\$21 range. One dealer has a 1968 "no S" set for sale---no selling price quoted, however "interested parties should call for details".

**COMMEMORATIVES:** More or less a period of "consolidation"; price changes are minor---with a few more sellers on the scene. Those BTW and W-C sets are still receiving attention from one major teletype dealer.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$130.00 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer-to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

**ADVERTISING RATES:**

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

## EARLY MERCS & STANDING LIBERTIES VERY STRONG 1973 Mint Sets Elude Bidders; S-Mint Peace Dollars Tough In Full MS-65

### The Market in Depth

ALLEN HARRIMAN

It is fascinating to examine this week's "second appearance" of the new price charts for Mercury dimes and Standing Liberty quarters! Since their debut on January 30th, teletype members have been extremely busy raising the bids in both of these very active series. Every Mercury dime issue from 1916 thru 1931 carries a plus sign this week--and with only a couple of exceptions, the same holds true for the very elusive "full head" S.L. quarters. Several major dealers are in the market for all of the dates in both series--and this major one-month price upswing has resulted in only a few coins changing hands. Recent auction records for strictly MS-65/better specimens have been quite impressive--well over even this week's advanced bid levels! A truly superb 1916-D Mercury for instance, just realized \$2400 in very spirited floor bidding--and common date strictly "full head" quarters were bringing prices in the \$250 range! Fully struck pre-1925 quarters by the way are seldom offered at even the most extensive auctions--and bidding for the occasional choice specimen is always extremely competitive.

A few words about the new higher bids registered for S-Mint Peace Dollars. Current bidders are in the market for only choice fully struck pieces with a minimum of marks or light abrasions--in other words, strictly MS-65 coins. Of the nice San Francisco issues, only four (1926, 1927, 1934 and 1935) can be obtained in full MS-65 condition with relative ease--and these are the exact same four dates which do not carry plus signs this week. The other five S-mint issues (1922, 1923, 1924, 1925 and 1928) are real "toughies" in fully struck condition--and higher bids in the MS-65 column result in only a small number of actual transactions. Bids for these five issues could conceivably advance another 25% or so while sales might easily remain at a minimum.

The 1973 mint set (mintage now established officially at 1,767,691 sets) has been appearing on more and more buying lists this week. The underpriced "mint set only" Philly and Denver Ike dollars, of course, are the reason for this current strong activity. Bidders are suddenly finding that neither the sets nor rolls of dollars are as easy to locate as the recent \$12-\$13 price tag might have indicated!

### This Week's Market

**CENTS:** Scarce circ "early copper" registers further gains. Recent collector and investor interest in such issues as 1793 Flowing Hair and 1794-97 Liberty Cap half-cents as well as Chain, Wreath and Liberty Cap large cents has shown even lower grade (defect-free) specimens to be quite elusive; current higher bids are almost completely unsuccessful!

1970S (sm date) - Another advance for this tough roll; bid now \$55

1975S proof roll - Bid up to \$775

1976S proof roll - First bids noted--at \$600

**NICKELS:** A couple of plus signs for the Jeffersons: 1950-P moves to \$32.50 bid and 1974-S proof rolls are unavailable at the new offering price of \$170! Choice BU (full MS-65) "with rays" Shield nickels have reached the \$500 mark--even so, none that fit this description been listed for sale on any of the numerous teletype circuits. Half-dimes also continue to forge ahead--see page five.

**DIMES:** Several dealers are in the market for common date BU Mercury rolls; so far they are only offering to pay "bid"--transactions at current levels are few and far between. Interest in the Roosevelt series continues to fall mostly into the "bargain-hunting" category; an exception is the key 1949-S roll--higher bids of \$510 meet with no results. Choice type coins remain strong--several new advances have been recorded.

**QUARTERS:** Several dealers are desperately trying to locate "gem BU" 1932-D quarters; the bid for choice MS-65 pieces has advanced to \$465--and one or two dealers are now willing to pay as much as \$550 for "perfect" specimens! Other early Washingtons are also on the move--particularly 1932-S and 1936-D in strictly choice condition. In contrast, the "1941 to date" Washington rolls spur little interest at the moment--frequent offerings in the bid-ask range result in only widely scattered sales.

**HALVES:** A number of the 1934-39 mint marked Walking Liberty singles are reporting some long overdue profit-taking (the 1934-P, 1939-P & D issues, however, remain on buying lists--and are still difficult to find). Led by the extremely tough 1949-S roll (bid now \$875), Franklins continue their forward march. The 1948-63 BU roll set is now bid at \$5150--with virtually no sellers in sight!

1949D - Bid moves to \$460; 1950P - Bid moves to \$390

1951D - Wanted in quantity at \$400--practically no rolls are available

1960P & D and 1961 P & D - These late rolls are of interest to investors.

**DOLLARS:** The low mintage 1973 Philly and Denver dollar rolls gain a quick \$15 each--bids of \$125 produce few if any results. Plus signs are again relatively numerous in both the Morgan and Peace dollar charts; bidders want only strictly MS-65 specimens (see The Market in Depth).

1890CC - Strong interest; choice singles receive bids of \$70

1891CC - Also in demand--bidders offer \$55 for MS-65 pieces.

**PROOF SETS and MINT SETS:** The 1973 mint set tops buying lists in this area; scattered small lots have changed hands around \$13.50--but most bidders

are going empty-handed. The 1970 "small date" set is bid at a higher \$40 and the 1975-S six-piece set is trading around \$26.

**COMMEMORATIVES:** Moderate activity noted for both the XF/AU and BU silver issues--price changes are minor (and mostly on the plus side).

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$133.30 per ounce.

## ANOTHER STRONG ROUND OF GAINS FOR "TYPE" BU Roll Market Offers Numerous Excellent Investment Opportunities

### The Market in Depth

ALLEN HARRIMAN

Price advances in the area of type material are occurring almost too fast to keep up with! No sooner do we make price adjustments than another teletype bidder follows with his "new, higher bids". The tendency recently, in addition, is to bid for the various "types" in all grades from XF thru choice proof--raising bid levels in all categories with a single stroke. This weeks newest rash of plus signs may be the most extensive ever! Still, with all of these very active attempts to buy, actual transactions remain quite limited. Dealers simply do not have an adequate enough stock of this material to sell on a "wholesale" teletype basis.

Even though some dealers and investor/collectors may feel that prices are moving too rapidly, it takes only a glance at a "prices realized" list for any of a number of recent auctions to see that dealers are "putting their money where their bids are"! Accurately graded material often brings well over teletype bid levels--particularly the earlier high grade circ specimens and truly choice MS-65 and proof coins. For example, a strictly choice MS-65 1858 "no motto" quarter recently sold for \$700 to a dealer is very spirited floor bidding. The 1858 is one of the two or three most common dates of this type and yet the appearance of a truly choice specimen was an occasion for another record-settling bid!

A point that cannot be stressed too often is that all bids recorded in the CDN are for coins that are accurately graded. It has been previously mentioned that--with some exceptions--early twentieth century and all nineteenth century coins are very scarce in true MS-65 condition and rare in MS-65+/70 condition. Current bids reflect that more and more buyers are realizing this fact!

Interest in the long neglected BU roll market is seemingly on the increase. Activity more or less began a number of weeks ago with the Franklins--and now is spilling over a bit into the Mercury, Roosevelt and Jefferson series. As other areas of the numismatic market continue to skyrocket, the numerous bargain prices in BU rolls become more and more attractive to knowledgeable and far-sighted investors. There are many relatively scarce rolls which currently sell for only a fraction of their previous highs--and a little research will easily reveal which issues were the most difficult to locate during the "BU roll boom" of the early 1960's. Stocking up on some of your favorite rolls in any series at current prices could well prove to be an excellent move at this time. In the coming weeks the CDN will point out a number of specific rolls which are now of particular interest to dealers and investors. One current example is the 1950-P Jefferson roll--up about 35% in three weeks--and still unavailable to a number of anxious bidders!

### This Week's Market

**CENTS:** Key date early singles record numerous gains (see page four); 1922-Plain cents remain especially elusive in spite of very active bidding and further price advances. EVERY issue on the "Copper Type Coins" chart (page five) carries a plus sign this week!--and the toughest circ types continue to forge ahead. Light interest in a few Lincoln rolls results in scattered transactions.

**NICKELS:** Three-cent peices (both nickel and silver) register substantial increases in all grades from XF thru MS-65 and proof; bidders seldom locate more than an occasional piece. The Jefferson series may be awakening!--dealers now offer to pay \$121 for choice sets and \$4600 for choice roll sets. Some individual rolls of interest include:

1939S - Original rolls are extremely difficult to find at \$340 bid  
1942P (2), 42-S, 45-D & S - All record small gains  
1950P - A "hot" issue--up again at \$35 bid

**DIMES:** "Type" is as strong as ever--advances continue unabated for high grade circ thru choice proof specimens! The 1935-40 "P-mint" Mercury rolls are all on the plus side of the ledger. Roosevelt also have begun to perk up--single 1946-64 sets trade at \$55.

1949S - Bidders want several rolls; none available at a higher \$550 bid  
1951S, 52P, 53PS, 55D - All five record gains

**QUARTERS:** Any common date Standing Liberty quarter in strictly choice "full head" condition will now fetch \$235--and still sellers remain almost entirely on the sidelines. Some of the other very impressive gains for type material include (see page five for the rest):

S.L. quarters (no motto) - Bid now at \$550 in choice MS-65 condition  
S.L. quarters (motto) - Dealers offer to pay \$375 for pieces that fit the same description

Barber quarters - Bids of \$250 fail to pry loose more than two or three choice specimens

**HALVES:** Again, type coins have registered far too many increases to list here--a quick check of the various charts will reveal that teletype dealers are in desperate need of all material from XF thru proof. The 1862-P half in any grade is very elusive--even though the Redbook considers it a "common date"; bidders will pay up to double catalog! Both 1939-P & D Walking Liberties are very strong--with rolls now bid at \$650!

**DOLLARS:** The upswing continues! Bidding is on the increase in both the Morgan and Peace dollar series--buyers all stress quality--and they will take quantities! Sellers of strictly MS-65 better dates are few and far between. The scarce 1973-P & D Ike rolls are strong in the \$140-\$150 range--with virtually none available.

**PROOF SETS and MINT SETS:** The big gainer in this area is the tough 1973 mint set--up \$3 this week to \$15.50 bid (a few sales noted as high as \$16). The 1950-54 proof sets are of mild to a few dealers--several gains have been recorded.

**COMMEMORATIVES:** A definite halt to advances has occurred--at least for the moment; sellers at current levels far outnumber buyers--with the continued exception of the BTW and W-C sets.

**U.S. Gold:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$132.00 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

### ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

**1<sup>ST</sup>**  
and Still  
Foremost

## AWAKENING OF BU ROLL MARKET CONTINUES

### VF Thru Proof Type Coins Score Further Substantial Gains

## The Market in Depth

ALLEN HARRIMAN

Interest in BU rolls continues to gather steam. From the long dormant Lincolns and Jeffersons thru Morgan and Peace dollars, plus signs are liberally scattered across this week's charts. Bidders are edging their offering prices ahead quite cautiously—although in many instances potential buyers want five, ten or twenty roll quantities. This orderly price advance is a healthy sign—an indication that most bidders want to buy rather than promote the various issues involved. There may be specific exceptions, of course, but the fantastic gains being registered in other areas of the market (particularly type material) have obviously pointed out just how underpriced many BU rolls really are—and numerous dealers and investors now want to put away their favorite issues at what may well be the very bottom of the roll market.

It is surprising how few choice BU (full MS-65) silver dollar rolls or singles are changing hands—in view of the fact that price hikes in this area are beginning to rival those in "type". The recent move in silver dollars certainly wasn't unexpected—but the lack of success that considerably higher bids have been meeting with shows either that the market is extremely thin or that holders of silver dollars are anticipating even bigger and better things to come! It is interesting how often that higher bids seem to limit sales rather than create them!

Take a look at the type coin charts on page five! From VF and XF thru choice proof, price records are again being set—yet amazingly few coins are being sent to anxious bidders. It is apparent that although numerous dealers are not in full agreement with the bid levels being established by a number of other dealers, they still don't have an adequate enough stock to sell to these bidders at current record-breaking prices. As always, there are exceptions, but in general very few properly graded type coins are changing hands! Not long ago we mentioned in this column that higher grade circ and MS-60 unc type material must eventually begin to close the ever-widening gap between these grades and MS-65. For the past few weeks this has been occurring—with nearly as much emphasis now being placed on the VF thru MS-60 specimens as on the strictly choice MS-65!

## This Week's Market

**CENTS:** For a pleasant change, several small gains have been registered by scattered rolls in the Lincoln series. In addition, numerous late dates (1959–74) are wanted in bag quantities at current bid levels. Circ., BU and proof type material scores another very impressive round of gains—still, actual transactions remain quite limited!

**NICKELS:** Bid for the 1938 to date BU roll set of Jeffersons (including the S-mint proof rolls) has moved to \$5000—single BU sets are bid now at \$127.50. The wartime roll set in choice BU condition is bid unsuccessfully at \$820; sellers generally ask around \$875. Advances in "type" are phenomenal—check page five!

1942P (t2) & 1942S - Now bid at \$275 and \$115 respectively.

1949D, 50P and 53S - Also on buying lists at higher prices.

**DIMES:** A sudden jump for many of the later BU Mercury rolls—P-mints are bid at a minimum of \$105 and \$120 is now offered for any mintmarked roll. The Roosevelts continue to awaken—with \$2625 now the bid for the 1946–64 BU roll set (single sets change hands as high as \$60). Type coins continue to break all records!

1946P & S - Rids of \$21 and \$31 result in few sales.

1949S - Up another \$25; dealers offer to pay \$575.

1950P thru 1955P - All enjoy plus signs this week.

**QUARTERS:** Several rolls in the 1941 to date group have begun to stir; bargain-hunting is more or less abandoned as dealers start to bid more seriously. Bids \$6800 for 1941–64 BU roll sets are entirely ignored on the teletype circuits—an occasional single BU "short set" trades around \$180–\$185. Advances for type material are almost complete for all issues in XF thru choice proof condition!

1946S - Wanted in quantity at a higher \$86.

1950P, 51P & 53P - All are on buying lists.

1955D - Although the bid level hasn't yet been disturbed, interest is on the increase.

1958P - Wanted in quantity at a higher \$46.50.

**HALVES:** Bids of \$660 each fail to produce rolls of either 1939-P or D halves; profit-taking in the 1933-39 mintmarked issues has halted—at least for the moment. Franklins are still among the "most wanted" issues—BU roll sets are receiving bids of \$5300 (none available) and choice single sets are almost impossible to locate at this week's higher bid of \$270. "Type" soars even higher—see the page five charts for details.

1949 - The first Franklin roll to reach \$1000?—bid is already \$900!

1954S - Wanted in ten or twenty roll sets at \$80

1958P - Quite tough—even at higher \$61 bid.

**DOLLARS:** One dealer will now pay \$2350 for a strictly gem set of fully struck Peace dollars (\$350 over bid)—yet no one has a set for sale which fits the MS-65/70 description. Gains are again quite numerous across both the Morgan and Peace

dollars charts—yet transactions of strictly choice BU (MS-65) pieces have been far from plentiful.

**PROOF SETS and MINT SETS:** Quite a number of gains for mint sets; dealers are finally showing interest for the earlier issues. The "hot" 1973 set is up again—with scattered sales noted around \$16.50 (rolls of the 1973-P & D like dollars are bid this week at \$150).

**COMMEMORATIVES:** Except for the still advancing BTW and W-C sets, interest is lagging and a few minus signs are creeping into the listings.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$134.10 per ounce.

COMPLETE SETS: 50 PC. (SIL) BID \$6100 - ASK \$6550; 144 PC. (SIL) BID \$12,500 ASK \$13,250; GOLD - BID \$5400 ASK \$5650.

The prices listed are for "choice BU" (MS-65) specimens; gem pieces (MS-65/70) will bring more—often substantially more—and "UNC" coins of lesser quality will sell for lower prices. Accurate grading is extremely important.

## ENTIRE MARKET ACTIVE; PLUS SIGNS ARE EVERYWHERE! BU Roll Surge Continues—Silver Dollars Up Sharply—Type Remains Very Strong

### The Market in Depth

· ALLEN HARRIMAN

Phenomenal gains are being registered for choice BU Standing Liberty quarters. Every issue in the series carries a plus sign in this third appearance of the new price chart on page two! Advances are particularly substantial for "full head" specimens; common dates are bid now at a minimum of \$270 (with an occasional sale as high as \$300)—and several of the better dates are up as much as \$50-\$60. Not only are the so-called "common dates" very elusive in strictly full head condition—but numerous early issues definitely fall into the rare category. Opinions vary as to which date (after the 1918/17-S, of course) is actually the toughest in full head. Suffice it to say that if a dealer were to offer to pay double the current bid for 1919-D, 1924-D, 1926-D or 1929-D he might not locate a single specimen. Other particularly rough dates include 1918-D, 1919-S, 1926-S (quite under-rated at present), 1927-S and 1928-D. This is not to say that locating any of the earlier dates is easy—but these nine dates quite possibly could take years to locate in truly top condition! It must be noted that bid prices in the "full head MS-65" column are for just that—fully struck coins—not "3/4" or "7/8" heads!

A quick glance at the page three BU roll chart will show that buying interest in this area is now definitely in full swing. Perhaps the "most wanted" rolls this week have been the Roosevelt dimes—followed closely by the Franklins and both series of silver dollars. BU roll sets are appearing regularly on teletype dealer buying lists—none are being listed for sale. There are many issues which are about to follow in the footsteps of the 1950-P Jefferson—which is already up 80% in one month (\$47 vs \$26 bid)! Investors should be particularly aware of the potential currently offered by both the 1950-P and 1950-D Roosevelt rolls. Other issues which "look good" at current levels are 1947-D, 1948-D, 1951-P, 1952-P and 1953-P.

A substantial jump in bid levels for a number of scarce to rare date \$10 Indians has occurred—and since our next printing of the chart which carries these issues isn't until April 2, the following "up-date" is in order: 1908-D (NM) \$700, 1908-S \$2200, 1909-P \$350, 1909-D \$375, 1909-S \$400, 1910-S \$500, 1911-S \$1500, 1912-S \$600, 1913-S \$1000, 1914-S \$500, 1915-S \$1000, 1916-S \$1000. It should be remembered that these prices are for strictly MS-65 coins—not the usually seen MS-60 or "super-slider"!

### This Week's Market

**CENTS:** The rare MS-65/70 "original red" Classic head large cent (1808-1814) is now bid at \$6000 (an increase of \$1000!)—and still not a single piece has been offered for sale. Prices have begun to edge forward for a number of BU Lincoln rolls—among them are:

- 1939D - Bids of \$83 prove quite unsuccessful
- 1942S - A "short set key"—dealers now offer to pay \$113
- 1943S & 1949S - Bid at \$50 and \$35 respectively
- 1955S - Wanted by the bag at a higher \$10.50
- 1970S (sm) - Very difficult to locate—even at this week's bid of \$60

**NICKELS:** The "with rays" Shield nickel (1866-67) has hit the \$600 bid mark—in choice MS-65 condition, of course. (Check page five for further advances in type material.) Considerably higher bids of \$5300 fail to pry loose a BU roll set of Jeffersons (1938 to date—including the proof rolls); single BU complete sets are wanted at \$135!

- 1942P (t2) - Up another \$25—bids of \$300 produce no sales
- 1949S - A roll to keep an eye on—bid moves to \$52
- 1950P - Up \$10!—wanted in quantity at \$47
- 1952P & 1955P - Both are also wanted in large lots at \$40 and \$20 respectively

**DIMES:** Choice proof Seated Liberty (legend) half-dimes and dimes as well as Barber dimes are all three bid this week at \$285—with one or two transactions noted as high as \$300! The Rooseveltts are truly "on the march"—numerous teletype dealers have joined the quantity bidding and many individual rolls are sporting plus signs. The 1946-64 BU roll set is now bid (without results) at \$2700—single BU sets have changed hands in the \$60-\$62 range.

- 1946D thru 1950D - Five Denver issues all register gains
- 1949S - Up an additional \$20—bids of \$595 are ignored
- 1952P & 1953P - These two are underpriced at bid of \$26 and \$29 respectively

**QUARTERS:** Choice proof "with motto" S.L. quarters are bid now at \$475—and choice Barber proofs are wanted at \$425—neither bid is meeting with much success! Circ key singles are enjoying strong demand and a large helping of plus signs—see chart on page four. Among the popular low mintage Washington rolls the following gains have been recorded:

- 1946S & 1947S - Bid levels move to \$90 and \$86—with few sales noted
- 1955D & 1958P - Also wanted—in quantity—at respective bids of \$95 and \$48

**HALVES:** Proof Barber half dollars are bid now at \$660—with at least one choice specimen changing hands at \$700! The 1934-P and 1939-P & D W.L. continue to give bidders problems—and choice well-struck 1941-S's are also very elusive at pro-rated bid of \$64. The BU roll set of Franklins has reached an all-time record bid level of \$5450—individual gainers include:

- 1949D - Bid now \$500; 1949S - Up again—at \$925 bid
- 1950D - Up \$15—wanted at \$235;
- 1961D - Very strong—up \$40—and unavailable at \$440 bid
- 1953D & 1954S - Ten roll lots are wanted at \$70 and \$82 respectively

**DOLLARS:** An amazing array of gains has been recorded this week—from common dates thru keys—for MS-60 and MS-65 singles as well as choice rolls! Long and frequent "want lists" from many sources result in only widely scattered sales—the expected price move is definitely in progress—take a look at page six!

**PROOF SETS and MINT SETS:** Small gains for a number of the earlier sets; most of the later issues can be easily located in quantity within current price ranges.

**COMMOMORATIVES:** Several small gains and losses dot the silver commem charts; Although prices are unchanged, buyer interest in the choice MS-65 gold issues is becoming increasingly evident (another area to watch!)

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$134.10 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

**BU ROLL MARKET IS HOT!**

For the past decade the BU roll  
market has been relatively inactive.  
During the same period, prices on  
many rolls have dropped substan-  
tially. During this period many new  
coin collectors have purchased sin-  
gle BU coins which has greatly  
depleted existing BU rolls.

We believe the BU roll market  
is on the verge of a NEW BOOM!  
In the April edition of the Coin  
Wholesaler we have made 10 spe-  
cific buy recommendations on BU  
rolls. We explain the reasons for  
each recommendation! Subscribe  
now! Don't miss the action.  
One year (12 issues)——\$5.00  
Two years (24 issues)——\$9.00

## BU ROLLS TOP BUYING LISTS Silver Dollar Market Very Strong—Prices Again Move Higher

### The Market in Depth

ALLEN HARRIMAN

The BU roll market is now perking along in earnest. Naturally, as bidding increases, the available material either disappears or price tags suddenly become "ask" or 5%-10% over. Those recent bargains in the roll market which were listed for sale "at bid as a lot" are now few and far between—in fact, except for some mild profit-taking at current levels in the Franklin series, very few BU rolls at all are being offered. Still topping the "most wanted" list are the Roosevelts—practically every pre-1956 issue has registered gains during the week. Sales have been widely spaced due to the fact that those who bought at recent bottom levels aren't ready yet to consider selling. There are some dealers who can envision the 1946-64 BU roll set reaching \$4000—or \$80 per single set. This would mean an average gain from today's levels of 45% for the rolls involved. In view of recent gains in other areas this doesn't seem to be expecting too much—it only remains to be seen how long the holders of these rolls will remain on the sidelines before taking their profit! Current bidders want quantities—but they are locating only an occasional roll or two in most cases.

Following right behind the Roosevelts are both the Jefferson and Lincoln series. The Jeffersons, in particular, have been dormant for several years—and numerous rolls in this series are now selling for only a fraction of the prices which were recorded during the big roll "boom" of the early 60's. Anyone seriously interested in investing in this area at current bottom levels would do well to do a bit of research into past price patterns. Those not familiar with the wild gains of about twelve years ago might be startled to see many of the prices which were realized at that time—especially when keeping in mind the fact that the entire economy was far less inflation oriented than it is today!

Numerous gains have been recorded for the early date Buffalo nickels and Walking Liberty half dollars. Locating strictly choice MS-65 specimens in either series is a rather difficult task; at present levels very few sellers can be found. It takes only a glance at a "prices realized" list from a major auction to see that strictly choice coins in these two series almost invariably bring well over the prices that teletype bidders now offer to pay. There are many dates in both of these series which are still very underpriced in choice condition—and this is not an area of the market where bid levels can conceivably bring a "hoard" into the marketplace.

### This Week's Market

**CENTS:** Quite a number of BU Lincoln rolls carry plus signs this week. Dealers are particularly interested in acquiring quantities of the pre-1955 issues which currently sell for five dollars or less (thirty year old rolls such as 44-D and 46-D certainly seem bargain priced at present levels). The 1972/72 double die is once again enjoying bidder attention—sales of ten piece lots noted at \$80 per.

**NICKELS:** Several major teletype dealers have joined the hunt for BU Jefferson rolls; most bidders want five to ten rolls of the better dates and "up to fifty" of the lower priced issues. The BU Wartime roll set is strong at a higher bid of \$875. 1937P - This one Buffalo roll continues to drift lower (a major hoard was recently dispersed).

1942P(t2) & 1942-S - Bid now at \$305 and \$125 respectively  
1947PDS & 1949PDS - All six are on buying lists at higher levels  
1951D - Often quite elusive—bid is now \$31

**DIMES:** The 1935-40 Philly dime rolls again are on the plus side of the ledger—and any late date mintmarked Mercury roll will now fetch at least \$123. Strong bidding by a number of dealers has pushed virtually every pre-1956 Roosevelt roll higher; the '46-'64 roll set is now unsuccessfully bid at \$2750 (a few single sets have changed hands around \$62).

1946P - First year of issue—wanted in quantity at \$23.50  
1946S & 1947S - Both rolls are now bid at \$35  
1949PDS - These three are bid at \$375, \$195 and \$600 respectively  
1950P & D - Still rolls to keep an eye on; both are bid this week at \$47.50

**QUARTERS:** At this point the Washington rolls are reflecting the least bidder attention; astute investors might consider their favorite rolls now—before the popularity cycle again swings around to this series! At this point, only the popular (not necessarily scarce) dates are receiving bids—46-S, 47-S, 55-D & 58-P to be specific!

**HALVES:** The BU Franklin roll set is up again—bids of \$5500 are getting no results. A number of the individual rolls, however, are "coming out of the woodwork"—priced usually at "ask" or a bit higher. Buyers occasionally stretch the few extra dollars to get the rolls they most need; sales have been moderate.

1951S - Strictly choice well struck rolls are tough; bid is now \$220  
1952D - Still on the move—at \$87.50 bid  
1954S - Bidders will take quantities at a higher \$85

**DOLLARS:** The price advance continues! Bidders keep the pressure on and plus signs are again liberally scattered across both the Morgan and Peace dollar charts. Today's buyer is definitely quality conscious; high bids for MS-65 specimens are for just that—strictly well struck coins with a minimum of bag marks or abrasions. The price difference between "MS-60" and "MS-65" reflects the true scarcity of most issues in truly choice condition.

**PROOF SETS and MINT SETS:** All of the later issues (1956 to date) can now be easily located—prices for a number of dates have edged lower this week in what is perhaps the weakest area of the market. The 1970 mint set (which contains the sought-after 70-D half dollar) is on many "want lists" at the current bid of \$14.50.

**COMMEMORATIVES:** Frequent attempts to locate "one to five" choice BU sets of the eleven gold comms have been futile (bid has moved to \$5650). The silver issues have registered only minor changes in quiet trading; an exception—the BTW and W-C sets—which have again recorded substantial gains.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$133.30 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer-to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

**ADVERTISING RATES:**

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

COMPLETE SETS 50 PC. (SIL) BID \$6100 - ASK \$6550; 144 PC. (SIL) BID \$12,500 - ASK \$13,250; GOLD - BID \$5650 - ASK \$6000.

The following bid-ask prices are for fully struck choice BU (MS-65) specimens; weakly struck, bag marked or otherwise inferior pieces bring lower prices and superb gem (MS-65+/70) coins may well command premiums over listed prices.

## **BU ROLL MARKET IS HOT!**

For the past decade the BU roll  
market has been relatively inactive.  
During the same period, prices on  
many rolls have dropped substan-  
tially. During this period many new  
coin collectors have purchased single  
BU coins which has greatly  
depleted existing BU rolls.

We believe the BU roll market  
is on the verge of a NEW BOOM!  
In the April edition of the Coin  
Wholesaler we have made 10 spe-  
cific buy recommendations on BU  
rolls. We explain the reasons for  
each recommendation! Subscribe  
now! Don't miss the action.

## SPECIAL AUCTION REPORT THIS ISSUE

### Record Prices Realized By Type Material In Choice Condition

### The Market in Depth

ALLEN HARRIMAN

A major auction in Boston this past weekend produced some very impressive "prices realized" for type coins. Bidding was particularly competitive, of course, for choice MS-65 or better material—with MS-60 and MS-60/65 specimens also enjoying strong buyer attention. The following will be the first published synopsis of prices brought by "common date" type material in this important auction—an excellent opportunity for those readers interested in comparing actual up-to-the-minute auction results with the prices that dealers are currently offering to pay. There are numerous very interesting comparisons! It must be remembered that the following general price ranges are for common dates in all of the various series. The scarce and rare issues in the auction brought prices substantially over auction catalog estimates—many truly choice specimens sold as much as five or ten times Redbook listings! (In addition to "type", it is apparent that collecting the various series "by date" is once again a very popular part of numismatics.)

The average price realized by MS-65 three-cent nickel pieces was about \$150—with the 1874 (considered a common date) reaching \$190. A "fully struck" MS-65 "with rays" 1866 Shield nickel brought \$675 and another specimen graded "MS-60, full strike" sold for \$400! Common date "no rays" specimens in MS-65 condition averaged \$200; late date Liberty nickels in the same grade recorded winning bids in the \$90-\$115 range.

Strictly MS-65 three-cent silver pieces (both type one and three) sold in the \$260-\$300 range; none of the very scarce "type two" issues were included in the auction—but choice MS-65 specimens have recently changed hands at bourse table sales for as much as \$750-\$800. Bust half-dimes in MS-65 condition brought prices in the \$550-\$600 area—and MS-60 pieces sold for around \$300. A very choice MS-65+ "no drapery" half-dime dated 1840 went to a high bidder at \$650—and the same price was realized by an MS-65 1853 "with arrows" piece.

Bust dimes—both large and reduced sizes—sold (several to dealers) mostly within current bid-ask ranges—indicating perhaps that prices in this series have reached at least a temporary plateau. Seated Liberty dimes, on the otherhand, registered some very impressive prices. A "fully struck MS-65" 1850 specimen (a larger mintage issue with catalogs as a common date) brought \$700—and a "gem MS-65" 1853 "with arrows" piece sold for an incredible \$1100 (the current dealer bid is only \$600)! "Legend obverse" dimes also brought well over current bid-ask levels—common late dates bringing prices in the \$280-\$350 range. Common Philly mint Barber dimes were also quite strong—selling in the \$150-\$210 area in spirited bidding.

An 1855 "with arrows" S.L. quarter which was described as "gem MS-65" realized another extremely impressive price for a "common date" type coin—realizing \$1900! A pair of choice MS-65+ "no motto" quarters—dated 1857 and 1858—brought \$750 and \$775 respectively; choice late date "with motto" pieces went to anxious bidders in the \$475-\$575 range (well over the current dealer bid of \$400). Common date Philly quarters in strictly MS-65 condition created considerable interest—realizing prices in the \$275-\$350 area.

Perhaps the most impressive individual price was recorded for a "superb, MS-65+" 1853 "arrows and rays" half dollar—the successful bidder paid \$9000! (There are some dealers who have expressed the opinion that the current teletype bid of \$3800 is "too high" for this particular issue!) Common later date "with motto" halves in MS-65 condition sold in the \$550-\$700 range and choice Barber halves (again, remember, common Philadelphia issues) realized \$575 to as much as \$750 for a "gem MS-65" piece dated 1895!

It can never be stressed too strongly that quality is the key word in current coin trading—whether at auction, over bourse tables or on the various teletype circuits. The above prices realized are for common dates coins in uncommon

condition. In addition to the "types" covered in this synopsis, better date Seated Liberty and Barber issues were very strong—as were prices for all the scarce dates in the Buffalo, Mercury, Standing Liberty and Walking Liberty series. In next week's issue we will publish some of the more impressive prices brought by individual dates in these later, very popular series.

U.S. Gold: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$129.30 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

### BU ROLL MARKET IS HOT!

For the past decade the BU roll

market has been relatively inactive.

During the same period, prices on

many rolls have dropped substan-

tially. During this period many new

coin collectors have purchased sin-

gle BU coins which has greatly

depleted existing BU rolls.

We believe the BU roll market

is on the verge of a NEW BOOM!

In the April edition of the Coin

Wholesaler we have made 10 spec-

ific buy recommendations on BU

rolls. We explain the reasons for

each recommendation! Subscribe

now! Don't miss the action.

One year (12 issues)—\$5.00

Two years (24 issues)—\$9.00

## NOTES ON THE "REDFIELD COLLECTION" Top Prices Paid For Choice Scarce Date Twentieth-Century Singles

### The Market in Depth

ALLEN HARRIMAN

This weeks lull in the rapid price advances for both Morgan and Peace dollars gives us an opportunity to discuss this recently volatile area of the market. The upsurge of buyer interest in silver dollars which began in late February is almost certainly due to the recent purchase of the unprecedented hoard of dollars known as the "Redfield Collection"—\$7.3 million worth of coins. The actual inventory of the hoard has not been made public. (Whether the entire list of coins involved will ever be published is, at best, debatable). The initial distribution of the dollars involved has been made in a most logical manner—quantities being sold to three major buyers (Paramount Int'l., R.L. Hughes, Inc., and Record Co.) into whose "strong hands" a portion of the total hoard has been sold. The remaining dollars (perhaps as many as 2/3) will be sold in a like manner in years to come—again, only a portion at a time. No more major wholesale lots will be made from this hoard for at least a year. This manner of distribution, of course, appears to be the most beneficial one to the overall tone of the coin market.

Although no inventory has been made public, various buying and selling lists, unconfirmed rumors, etc. have led most dealers to conclude that a major portion of the hoard consists of San Francisco dollars—both Morgan and Peace, some Carson City issues and perhaps a few Philly and New Orleans issues. There are, of course, many dates which are not represented at all. At this point the attitude toward silver dollars in general is as varied as there are coin dealers! There are dealers who are staying away from all dollars—convinced that the day will come when large quantities of virtually all dates will hit the market and that today's somewhat advanced price levels will then plummet (somewhat like the BU roll market during the mid-60's). As one major dealer stated recently, he has never known a greatly increased supply of a particular coin or coins to raise the price for an extended length of time. At the other end of the spectrum, there are the "true believers" in dollars who see the "Redfield Collection" as just the stimulus that the silver dollar market needed—creating many new collectors (the "ultimate consumer") and investors through the considerable amount of publicity accorded to the record-breaking \$7.3 purchase. Most dealers probably fall somewhere in between—knowing that buyer interest has been stimulated and that, most importantly, there are numerous issues which are not included in the hoard (the value of the missing dates is almost certainly increased by this fact). Even though the true inventory may never be released, a general knowledge of the dates involved will certainly trickle down eventually to all those interested (which, to some degree, has already happened).

The "true believers" are the current teletype bidders. They may be actual owners of a portion of the initial distribution and therefore have a definite interest in seeing higher bid levels—or they may simply believe that buying now will mean profits in the coming months. The current active bidders are actually quite few—limited to, perhaps, three major buyers. At least one of these buyers (one of the original unsuccessful bidders for the entire collection) is bidding for virtually every date (omitting the most common dates). As this dealer does not have the inventory (only two dealers have the inventory—including A-Mark, the purchaser—neither is bidding) his bids not only include dates in the hoard but obviously cover all of the scarce dates which are not included and which, as a result, may have a better investment potential than before the existence of the hoard was generally known.

At present, in spite of the fact that a portion of the "Redfield Collection" has been dispersed, strong bidding has produced only limited transactions. This must mean that those dollars already sold are in "strong hands"—or, at least, that holders are waiting for bigger and better prices in the coming months. Today's bidders will take the coins that they are requesting. It is true that at present price levels these buyers are "fussy customers"—taking only true MS-65 specimens. It should be remembered that when any bag of dollars is examined it will contain MS-60, MS-60+ as well as MS-65 coins—the proportion depends greatly upon the date and also upon how the bags have been handled and stored. There may be as few as 10% MS-65 coins in a bag—or, as in the case of such dates as 80-S, 81-S and 82-S, as many as 75%. At any time, the buyer of silver dollars should be able to tell the difference between the various standards for grading uncirculated silver dollars before committing his funds.

The CDN, as usual, reports legitimate bids as they appear from week to week on the numerous teletype circuits. We, of course, do not have an inventory of the dates and quantities included in the "Redfield Collection"—and in no way recommend or discourage purchase of any particular issue or issues. We always attempt to determine if bidders are actually taking the coins on their teletype buying lists; at this point we have no reason to doubt the legitimacy of current bidding. It is, to repeat, certain that a great many of the dates from 1878 through 1935 are not included in this hoard of dollars—it is also obvious that many, if not all, of the dates which are in the hoard are also going up in price. Currently there are very few sellers of dollars and the one or two dealers who do list rolls for sale are tagging them at "ask" or higher each week.

The silver dollar market will be very intriguing to watch for the next several months. The CDN will, as always, keep readers informed as to current bid levels—and, in addition, will report as far as possible on the volume of actual transactions and the number of bidders involved in this very volatile area of the market.

### This Week's Market

**BU ROLLS—CENTS through HALVES:** Bidding remains quite strong and price advances are numerous. Several major teletype dealers want large quantities of most dates in the Jefferson, Mercury and Roosevelt series—with the Lincolns, Washingtons and Franklins following close behind. Frequent comprehensive "want lists" and higher bid levels have, thus far, resulted in only scattered transactions—not in the quantity sales that bidders are hoping for.

**PROOF SETS AND MINT SETS:** Quantities of all proof issues from 1956 through 1969 are being offered to a largely disinterested audience; fewer of the 1970-76 sets are on the market—but buyers still show little interest. The 1970 mint set, however, is very strong—with sales registered as high as \$16.

**COMMEMORATIVES:** A few prices edge one way or the other—but, in general, the common market is steady in light and scattered trading. The BTW and W-C PDS sets are again the exception—all are on the plus side. Bids of \$5700 produce no choice BU sets of the eleven gold issues.

**SPECIAL REPORT:** As was mentioned last week, the prices realized by strictly choice BU (MS-65/better) coins at the recent major auction in Boston topped many previous records. Four of the very popular twentieth-century series were represented by the following choice pieces—check the prices brought at auction against current Redhook listings and recent teletype dealer bid levels!

**BUFFALO NICKELS:** 1913 P(1) \$45, 1914 P \$50, 1915-S \$230, 1917 P \$55, 1917 D & S (both graded MS-60) \$160 and \$180 respectively, 1918 D \$375, 1919 P \$45, 1919-D \$350, 1921 P \$95, 1921-S \$525, 1924 P \$70, 1924-D \$300, 1924-S (graded MS-60) \$800, 1925 D \$350, 1926-D ("nearly full strike" MS-65) \$510, 1926-S \$800, 1927-P \$45, 1927-D \$115, 1928-S \$120.

**MERCURY DIMES:** 1916-P \$30, 1917-P \$40, 1917-S \$85, 1918 P \$140, 1918-D \$140, 1919-D (graded MS-60) \$235, 1920-P \$55, 1920-D \$110, 1923-S \$300, 1924-P \$75, 1924-D \$290, 1925-D \$480, 1925-S \$375, 1926-S \$925, 1927-D \$405, 1928-S \$160, 1931-D \$130.

**STANDING LIBERTY QUARTERS:** 1917-P(1)FH \$350, 1917-D(1)FH \$410, 1917-P(1)FH \$325, 1917-S(1)FH \$450, 1919-S (avg. strike) \$375, 1928-D (90% head) \$260, 1929-SFH \$400(!) 1930-P FH \$290.

**WALKING LIBERTY HALVES:** 1916-P \$450, 1916-D \$360, 1916-S \$510, 1917-D (obv) \$450, 1917-D (rev) graded MS 60 \$375, 1919-S ("virtual full strike") \$2100, 1920-S (excellent strike for

the issue) \$1100. 1923-S (gem, full head) \$1650(!), 1928-S (graded MS-60/65, 100% fully struck, few tiny bag marks and rim nicks) \$1200(!), 1929-D \$350 1929-S \$375.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$127.50 per ounce.

### BU ROLL MARKET IS HOT!

For the past decade the 8U roll  
market has been relatively inactive.  
During the same period, prices on  
many rolls have dropped substan-  
tially. During this period many new  
coin collectors have purchased sin-  
gle BU coins which has greatly  
depleted existing 8U rolls.  
We believe the 8U roll market  
is on the verge of a NEW BOOM!  
In the April edition of the Coin  
Wholesaler we have made 10 spe-  
cific buy recommendations on BU  
rolls. We explain the reasons for  
each recommendation! Subscribe  
now! Don't miss the action.  
One year (12 issues) --- \$5.00  
Two years (24 issues) --- \$9.00  
THE COIN WHOLESALER

## STRONG BU ROLL MARKET CONTINUES Morgan & Peace Dollars Register Gains; New Bidders Join Hunt

### The Market in Depth

ALLEN HARRIMAN

BU rolls and silver dollars continue to dominate teletype buying lists--bidders are having little success locating the quantities they need in either area. As is usual in the coin market, a sudden increase in demand in a particular area means that corresponding price tags are hiked just as suddenly. Only a few months ago (as recent as December and January), most BU rolls after 1941 were included on lengthy selling lists and many dealers were not only lowering prices in order to encourage sales but were open to counter-offers. Today, of course, the situation is quite different. Relatively few rolls (particularly cents thru dimes) are appearing on selling lists at all--and the few which are listed for sale carry "next week's price tags". Sales, as a result, remain quite limited in spite of the current strong dealer and investor interest.

Mercury dime rolls are particularly elusive at the moment. In addition to the dates in the 1941-45 group, buyers are now attempting to locate all of the 1934-45 "short set" issues. The number of dates which are "seldom offered by the roll" is on the increase. For years dealers asked for "original rolls" of all dates after 1931 except 1934-D, 1935-D and 1936-D (and even these three keys were encountered by the roll on widely scattered occasions). Now, however, dealers are happy to locate a few strictly choice singles of almost any pre-1941 issue! Three candidates for the "Early Singles" section on this page are 1934-P, 1937-D and 1939-S--ten or fifteen choice pieces of any one of these dates is now considered a lucky find and an original roll is cause for rejoicing! The current bid of \$16,000 for a 1934-45 BU roll set is, of course, totally ignored--it has been years since such an offering has been monitored on the teletype circuits.

Note the number of additional plus signs registered by Morgan and Peace dollars this week. Practically all of the issues which do not fall into the \$125-\$130 roll "common date" category are in demand--and at least two more major bidders have been added to the list of dealers who want quantities of choice silver dollars. Remember the word "choice"--it is extremely important when trading in the dollar market. A common complaint voiced by teletype dealers who regularly have dollars shipped to them in response to their buying lists is that "most dealers don't know how to grade silver dollars". This, of course, is probably an exaggeration. But the fact remains that many dealers tend to be more liberal when grading dollars than, say, when grading "type" coins. Any type coin with marks or abrasions is automatically down-graded to MS-60 or MS-60+, but a silver dollar with even more problems is often called "choice MS-65". Today's bidders, however, are conservative in their grading standards and when they offer current substantial prices for MS-65 specimens they mean just that. Some allowance is made for dollars as far as bag marks are concerned--but MS-65 is still a choice fully struck coin without detracting marks in the field and on the face of Liberty. Another consideration to be noted is that an "original roll" does not necessarily mean that all of the coins included are MS-65 (or indeed, that any of the coins are MS-65). Coins that were stored and transported for many, many years in bags and subsequently were put into rolls may well be MS-60 specimens. This applies perhaps even more to dates which were notoriously badly struck in the first place--1889-O thru 1892-O, 1924-S, 1925-S to name just a few.

### This Week's Market

**CENTS:** Early half cents and large cents in defect-free condition elude bidders at current levels; buyers want evenly worn specimens without the usual problems (rim dents, porous planchets, weak reverses, etc.)--but most specimens fall short of these expectations. Several minor advances are again scattered across the Lincoln roll charts; sales are light due to the absence of sellers.

1947S - Wanted in large quantities at \$15

1951S & 1952S - Both are now receiving bids of \$23

1970S (sm) - Seemingly more elusive than the 60-P version; bid reaches \$66

**NICKELS:** Several major dealers are joining the hunt for BU Jeffersons; bidders will take quantities--but very few rolls are being listed for sale. The "1938 to date" BU roll set (including the late S-mint proof rolls) is unsuccessfully bid at \$5100--and few if any single choice BU sets have been located at the current bid of \$135.

1938D - The Buffalo roll is bid now at \$275 and the Jefferson roll at \$127

1942P (2) - Still on the move; bidders offer \$340

**DIMES:** The Mercury and Roosevelt rolls top BU roll "want lists"--plus signs abound and very few sellers can be found on the teletype circuits. Among the most wanted dates are:

1935P thru 1940P - Once thought "common", these Philly rolls are now seldom available

1941D - Quite elusive--wanted in ten roll lots at \$210

1949P & S - Two key dates--bid this week at \$415 and \$625 respectively

**QUARTERS:** A few BU Washington rolls are of interest to dealers this week (37-P, 46-P & S, 51-P, 54-S)--but, in general, bidders are concentrating elsewhere. All of the pre-1925 Standing Liberty quarters are appearing on buying lists in various grades from G/VG thru XF; sellers want "up to a roll" of most dates--yet even the high mintage P-mints are very difficult to locate in quantities of more than one or two pieces at a time.

**HALVES:** Gains have been registered by the 1939-P & D rolls (both now bid at \$685) and by the 1947-P & D rolls (these two are bid at \$335 each). The remainder of the Walking Liberty issues are firm at present levels. The pre-1933 choice singles, on the otherhand, are quite strong (see page two)--with the complete 1916-47 set in choice MS-65 condition now bid at a record \$24,000! Franklins rolls are steady in moderate trading.

1952D - Wanted in ten roll lots at a higher \$110

1955P - Also higher--with transactions noted at \$137.50

**DOLLARS:** Still the most volatile area of the market. Accurate grading is all important when trading in silver dollars--buyers are extremely fussy. See "The Market in Depth" for further comments.

**PROOF SETS and MINT SETS:** The 1970 mint set is up--bids of \$16 produce few sales. Minus signs are scattered across the proof set chart; sellers have quantities

of all issues after 1954; the few interested dealers definitely fall into the "bargain hunting" category.

**COMMEMORATIVES:** Both of the Lewis & Clark and both of the Grant gold commemorations record gains--the first in this eleven piece set noted for quite a while. The silver issues are virtually unchanged in MS-65 condition--with the XF/AU pieces receiving a bit more attention.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$127.70 per ounce.

COMPLETE SETS 50 PC (SIL) BID \$6100 - ASK \$6550, 144 PC (SIL) BID \$12,500 - ASK \$13,250; GOLD - BID \$5750 - ASK \$6100.

The following bid-ask prices are for fully struck choice BU (MS-65) specimens; weakly struck, bag marked or otherwise inferior pieces bring lower prices  
and superb gem (MS-65+/70) coins may well command premiums over listed prices.

### BU ROLL MARKET IS HOT!

For the past decade the BU roll market has been relatively inactive. During the same period, prices on many rolls have dropped substantially. During this period many new coin collectors have purchased single BU coins which has greatly depleted existing BU rolls.

We believe the BU roll market is on the verge of a NEW BOOM! In the April edition of the Coin Wholesaler we have made 10 specific buy recommendations on BU rolls. We explain the reasons for each recommendation! Subscribe now! Don't miss the action.  
One year (12 issues)---\$5.00  
Two years (24 issues)---\$9.00

## MERCURY ROLLS ARE ON THE MOVE

### Silver Dollars Continue Advance; Many O-Mint Issues Elude Bidders

### The Market in Depth

ALLEN HARRIMAN

Although fewer silver dollar bidders were on duty at their teletype machines this week, prices have continued to forge ahead. More buyer attention has been focused (but certainly not exclusively) on a number of the dates which are generally assumed not to be included in the major Redfield collection discussed in the April 9th CDN. In particular, many of the S-mint Morgan issues have remained unchanged in price during the week—with an occasional selling list noted (coins usually priced at "ask" or higher). Many O-mint dates, on the other hand, are higher—and very few actual transactions have been recorded. Bidding has been quite strong for MS-60 specimens as well as for the popular and scarce MS-65 pieces. Among the dates which are experiencing considerable demand are 1879-O, 1882-84-CC, 1886-O, 1892-O (especially tough in true MS-65 condition), 1894-P & O, 1895-97-O, 1901-P, 1924-S & 1928-S (again, both are very elusive in fully struck MS-65), 1934-P & D and 1935-P & S.

It must be stressed that the distinction between MS-65 is far easier for most to make when it applies to coins other than silver dollars. Even minor marks or abrasions—or a slight weakness in strike—often tends to keep, say, a Seated Liberty quarter out of the strictly MS-65 category. However, when grading BU silver dollars more liberal allowances as to the number and/or severity of marks are generally made. This, of course, is due to the fact that a silver dollar which is absolutely free of any bag marks, abrasions or weakness of strike is truly rare. (Many dealers state that they have never seen a true MS-70 Morgan or Peace dollar!) Other denominations (especially smaller coins such as three-cent pieces, half-dimes and dimes) can occasionally be located without any "problems". Where to "draw the line" between MS-60 and MS-65 when grading silver dollar is a task which faces all those interested in this area of the market. A tendency toward the conservative side perhaps seems the most logical approach—and one which should prove particularly beneficial when time comes to sell!

Mercury dimes are soaring! All of the rolls (plus the tough singles) in the 1934-39 group have registered gains this week—and a number of the 1940-45 issues have followed closely behind. Sales, however, have been extremely limited. Needless to say, this week's higher bid of \$16,500 for the 1934-45 BU roll set remains completely ineffective on all the various teletype circuits—as, indeed, do most of the bids for various individual rolls. Quality, as usual, is the key word. When buying Merc dimes most bidders want well struck choice pieces with "fully split bands" on the reverse. The lengths to which buyers will go to obtain "the very best" is dramatically evidenced by this week's record bid of \$150 for a single gem BU 1945-P dime with bands that are fully separated! Obviously, this date in this condition is a rarity—not a single piece which fits such an exacting description has been offered to the hopeful bidder!

### This Week's Market

**CENTS:** Gains continue to be registered for a number of dates in the 1934 to date Lincoln series; bidders want quantities—but BU rolls are not as easy to locate now as they were a few months ago. Several dealers are again in the market for key and semi-key Indians in lower grade—lengthy and frequent buying lists result in only widely scattered sales.

**NICKELS:** Buyers find that locating even one or two choice BU Buffalo nickel rolls can take several days—even the usually rather plentiful 1938-D roll is seldom offered (bid is \$280); the 1937-P issue is now the only issue listed for sale under \$300 (remnants of a recent hoard are still available). A few strong bidders continue to raise bid levels for numerous Jefferson rolls—again, they want quantities. 1938D & S - Unsuccessfully bid at \$135 and \$180 respectively. 1942P (2) & S - These two are wanted at higher bids of \$345 and \$140.

**DIMES:** Action in the Mercury department is substantial and very impressive—see The Market in Depth. The Roosevelts, too, continue to enjoy at least moderate demand and higher bid prices; major roll dealers report that current retail sales are led by Roosevelt rolls. The 1949-P roll (now bid \$420) seems even more elusive than the "key" 1949-S—eager bidders fail to locate even a single roll.

**QUARTERS:** Although scattered buyers seem to have their favorite dates, the Washington rolls in general are receiving only mild attention. This might be a good time to do a bit of research into past price history and previous availability of the dates in the 1941-64 "short set"—there are many issues which certainly present excellent medium to long term investment opportunities at current prices.

1944P, 48P, 50P & 51P - These reasonably priced rolls all record advances

1953P - Almost always a very elusive issue—bid is now \$61.50

1954S - Wanted in 10-20 roll quantities—at a higher \$44

**HALVES:** Very, very few Walking Liberty rolls are appearing on selling lists; further gains have been noted for the tough 34-P, 39-P & D issues—buyers will take choice singles in order to assemble their own rolls! Most of the earlier Franklins are now on selling lists—but price tags are firm at "ask" or thereabouts; the later dates continue to enjoy quantity demand.

**DOLLARS:** Prices once again advance on a broad front. Today's buyers tend to be "fussy customers"—see The Market in Depth.

**PROOF SETS and MINT SETS:** Ask levels continue to slip—quantities of all dates after '53 are available as are, to a lesser degree, the 1950-52 sets. Even the earlier (1938-42) sets fail to create much interest when offered within current bid-ask ranges. The '70 mint set is the one bright spot—bid is not \$16.50.

**COMMEMORATIVES:** Additional price hikes have been registered by the two Lewis & Clark and the two Grant gold commems; complete MS-65/better eleven piece sets are also higher at \$5900 bid. Scattered minor changes for the rather quiet silver issues.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$127.40 per ounce.

Sesquicentennial \$2.50	165.00	180.00	190.00	210.00

COMPLETE SETS. 50 PC. (SIL) BID \$6100 - ASK \$6550. 144 PC. (SIL) BID \$12,500 ASK \$13,250; GOLD - BID \$5900 ASK \$6300.

The prices listed are for "choice BU" (MS-65) specimens; gem pieces (MS-65/70) will bring more--often substantially more--and "UNC" coins of lesser quality will sell for lower prices. Accurate grading is extremely important.

## CHOICE "TYPE" CONTINUES TO ELUDE BIDDERS Later Proof Sets Edge Lower; Little Buyer Interest Noted

### The Market in Depth

ALLEN HARRIMAN

The recent slowing of price advances for BU and Proof type material does not mean that there has been a lessening of buyer interest. To the contrary, numerous teletype dealers are extremely interested in buying type coins--particularly, of course, choice MS-65/better specimens. However, after weeks of raising bid levels in more or less futile attempts to locate even small quantities, most bidders have decided to stick with current price levels. As several dealers have stated, there is little point in offering to pay higher and higher prices each week without actually acquiring at least a small stock of coins. The general feeling seems to be that a slowing of price advances might do more toward bringing coins into the market--place than constantly escalating bid levels has accomplished. It seems only logical that potential sellers would assume a "wait and see" attitude as long as each week brought ever higher bid levels. Now--with prices at somewhat of a plateau--it remains to be seen whether sellers begin to appear on the scene. Bourse tables at recent conventions have been noticeably short of choice material--and prices realized at recent auctions point up continued very impressive strong collector and investor demand.

Proof sets continue to edge into lower ground each week. This is especially true for the later "silver issues" (1957-64). The fact is that several major teletype dealers regularly offer rather large quantities of these sets for sale "at bid plus postage" (or occasionally "delivered" on large lots)--and that buyers are currently few and far between. Proof set enthusiasts have long been expecting an "overdue" upsurge of interest--and hence prices--for proof sets containing silver coins. Yet, except for a few minor stirrings, these sets have definitely "taken a back seat" to activity in the later S-mint sets containing clad coins (especially the 1973-76 issues). The reason for the strength of the later S-mint sets is due primarily to the "proof only" status of most of the coins involved. (The best example is the 1975-S set--still bid at \$23.50--mostly on the merit of the first "proof only" Lincoln in the entire series.)

One of the more interesting aspects of the 1968-76 San Francisco proof issues is the price structure of the various S-mint proof rolls. Though the mintages on these sets vary only to a rather minor degree, scattered "promotions" of individual rolls have created wide price variances even in the same series. The "proof only" Jefferson bid levels range from \$66 to \$180--for Roosevelt's range is currently \$35-\$98--Washingtons \$31-\$72 and Franklin halves \$35 to \$105. Another interesting comparison is between the 1975-S "proof only" Lincoln roll at \$690 bid and the first "proof only" Jefferson rolls of 1971 and 1972 at \$66 bid. Is the Lincoln series so much more popular than the Jefferson series--the 75-S cent bid at \$13.80 and the 71-S nickel at \$1.65? The S-mint proof roll market is currently a volatile one--and chances are that price relationships will change considerably in the months and years to come.

### This Week's Market

**CENTS:** Several teletype bidders are in the market for "gem, original BU" early Lincolns (particularly the scarce mintmarked issues)--and they will gladly pay 20%-50% over Redbook listings for truly choice coins. Check page four for recent gains registered by low grade key and semi-key Indians (at these new higher prices dealers have located very few pieces). BU rolls continue to chalk up numerous gains--trading is light to moderate.

**NICKELS:** It seems that practically every dealer needs true MS-65/better 1885, 1886 and 1912-S Liberty nickels--current requests for "reasonable quotes" are quite unsuccessful (these three keys are very, very few and far between in this ultimate grade). Several BU Jefferson rolls continue to reflect bidder attention--the 1938-D at \$140 is very elusive, the Wartime dates and the 1946-52 issues are appearing on several "want lists" at higher levels.

**DIMES:** Still the "hottest" BU roll area--both the Mercury and Roosevelt series can again boast of an impressive array of plus signs. Also check this week's early Mercury dime chart on page two--locating even one or two choice specimens of the scarce mintmarked issues can be a very time consuming task. The 1946-64 BU roll set of Roosevelt's has reached the \$3000 bid level--with none offered for sale.

**QUARTERS:** At least two strong bidders are in the market for choice "no drapery" S.L. quarters (1838-40)--and they are willing to pay \$1900 for each specimen which fully fits the description of strictly MS-65! The bid for "common date" Standing Liberty quarters with "absolutely full heads" is back up to \$275; bidders will take quantities of strictly graded pieces--but, thus far, sales have been extremely limited.

**HALVES:** A few early Walking Liberty rolls record advances--the tough 1934-P at \$580, 1935-P at \$440 and the very scarce 1939-D at \$720. Franklin rolls are basically steady. Except for the dates selling for \$55 or less, the recent price surge seems to have more or less run its course--at least for the moment.

**DOLLARS:** This week's lull in silver dollar prices is due--at least to some degree--to the fact that major teletype bidders in this area are preparing for the Central States Convention which is scheduled to begin on Thursday in Chicago. Chances are that these recent bidders will be back at their stations next week!

**PROOF SETS and MINT SETS:** An almost complete run of minus signs hit the 1953 to date proof sets; quantities of virtually all of these issues are on the market and potential buyers exhibit little interest--even when "burgam lots" are offered.

The 1965-67 "special mint sets" are showing some strength at slightly higher levels--and the '46-'64 mint sets show gains in line with higher roll prices and bullion silver.

**COMMEMORATIVES:** Practically unchanged across the board--prices are steady and the occasional choice specimen at below current is quickly sold. Bidders continue to find the complete gold commem set unavailable at \$5900 bid.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$128.70 per ounce.

## MERCURY DIMES TOP BUYING LISTS

Central States Convention Highly Successful; Choice Material Continues To Soar!

### The Market in Depth

ALLEN HARRIMAN

Virtually all of the dealers who attended the recent Central States Convention (Chicago, April 29 - May 2) were very well pleased with the show. Many dealers reported "the best show" since last year's A.N.A. Convention in Los Angeles! The "action" at bourse tables was quite impressive--and interest (as well as price tags) for choice material gave no indication of having reached a plateau. In contrast, properly graded "type" and better dates brought, in most cases, prices well in excess of current teletype bid-ask levels. In general, dealers consider this major show an excellent chance to buy coins--for resale later in various areas of the country to their own clients. Actually, quite an array of choice to gem material made an appearance on bourse tables and there was a pervading air of excitement throughout the show!

A few scattered examples of actual sales at the '76 CSNS show--a choice MS-65 "arrows and rays" quarter (1853) changed hands at \$3000, a fully struck and beautifully toned Lafayette dollar sold for \$200, a choice original roll of 1924-P Mercury dimes traded at \$3000, a "gem BU" 1927-D Peace dollar went to a pleased buyer at \$295.

The tendency at conventions to price coins at well over "ask" is now not limited to choice uncirculated material. Lower grade key material also enjoyed much buyer interest and, again, price tags exceeded bid-ask levels. Nearly all dealers were anxious to take home 1877 Indians, 1885 Liberty nickels, 1916-D Merks, 1901-S Barber quarters and the like--but locating any quantity of nice pieces is now quite a task. Last week's considerably higher bids for low grade key and semi-key Indians, by the way, has resulted in very few transactions--either on the bourse floor or on the various teletype circuits.

A nearly complete set of choice MS-65 to gem "full bands" Mercury dimes was included in the two-day auction sale which accompanied the CSNS convention. Bidders were more than willing to pay "over ask" for the right coins--a few examples: 1918-P \$95, 1918-D \$135, 1921-P & D both brought \$1500, 1923-S \$230, 1924-D \$260, 1927-S \$160, 1928-S \$125, 1930-S \$180! Teletype bidders now are offering to pay \$8750 for strictly choice 1916-45 sets (less, of course, the overdate); it has been quite a while since a complete set has appeared on the teletype circuits. The 1934-45 "short set" has now reached the \$345 bid level--and, needless to say, the BU roll set is "impossible" at \$17,000 bid! The 1941-45 BU rolls are also up once again--bids of \$2200 for the fifteen rolls also meet with no response whatsoever. Of particular interest to current strong bidders are the 1935-39 Philly rolls and two very elusive Denver rolls--1941-D at a substantially higher \$260 bid and 1942-D at \$170 bid.

### This Week's Market

**CENTS:** Plus signs again pepper the BU Lincoln roll chart--bidders will take quantities at these higher prices but they must be choice rolls which are "suitable for single sales." The 1970-S "small date" roll is still difficult to locate--bid is now \$70 (the corresponding proof set is perhaps the most elusive issue after 1950).

**NICKELS:** Three-cent nickels are on buying lists--bidders will take choice MS-65 specimens at \$120 and choice proofs at \$160. Another substantial gain has also been registered by the "with rays" shield nickel (1866-67)--bid is up to \$650 and one dealer is offering to pay \$750 for an "absolute gem"! Choice, well-struck early Buffalos are strong--see this week's chart on page two. The Jefferson rolls report several more advances--with numerous dates on "want lists" at current levels.

**DIMES:** Mercuries remain "hot"--see The Market in Depth column. Several new gains have also been recorded by the Roosevelts--among them are:

1947-D and 1948-D - Both are currently quite elusive--higher bids of \$52.50 and \$51.50 result in few sales.

1948-S - Very strong--bids noted as high as \$58.

1953-P - Bidders want quantities at \$40--only a few rolls have been located.

**QUARTERS:** Most of the 1944-51 Philly rolls seem rather elusive at current price levels; the 1937-P roll is appearing more and more frequently on "want lists" (now pegged at a higher \$560 bid). Rather subdued interest is also noted for the 1939-D--wanted by the roll or single--and rarely available in quantity. The 1939-D and 1940-S Washingtons are the only two pre-1941 mintmarked issues still considered regularly available by the roll--and this may not be the case much longer!

**HALVES:** Common date P-mint Walking Liberties are suddenly "not available"; bids of \$245 produce no choice rolls. Franklins ("any date") are wanted by the bag at \$3850--few if any sellers can be located. The 1952-D roll may have "peaked" after recent substantial gains--rolls are offered at \$115. Attempts to buy circ 1891 S.L. halves have been unsuccessful; bidders offer \$15 for good, \$18 for VG and \$25 for fine specimens (check the Redbook on this "common date").

**DOLLARS:** With a few exceptions (all on the plus side) prices are firm at the current levels. Among the gainers are:

1879-O - Perhaps the most sought after issue this week; bid reaches \$365.

1879-P and 1887-O - Bidders now offer \$250 and \$295 respectively for choice rolls.

1973-S Proof (40%) - This "key" Ike dollar is wanted in quantity at \$16.25.

**PROOF SETS and MINT SETS:** Both the 1970 and 1973 mint sets have registered minor losses--small quantities are now rather easy to locate. Fewer minus signs have been noted for proof sets; bidding still falls mostly into the "bargain hunting" category.

**COMMEMORATIVES:** All of the Texas PDS sets are suddenly wanted in quantity--prices advance slightly. On the other hand, after recent impressive gains the BTW and W-C sets are now listed for sale at lower levels. The eleven gold issues are few and far between; frequent bids as high as \$5900 still fail to pry loose any choice (MS-65/70) complete sets.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figures on a basis of gold at \$127.75 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

## BU ROLL MARKET UPSWING CONTINUES Scarce Dates And Choice "Type" Gold Elude Bidders

### The Market in Depth

ALLEN HARRIMAN

Interest in gem BU (MS-65/70) "type" gold coins (as well as better dates in the four twentieth century series) is pushing bid levels into new higher ground. It is not surprising that really tough types such as the \$2½ and \$5 Classic, the \$5 and \$10 "no motto" and the "type one" \$20 Liberty are difficult to locate. Gems in these categories are extremely few and far between—and should a teletype dealer have a true MS-65/70 specimen in stock it is understandable that he would expect to get "top dollar" from a retail customer. One major bidder, however, is also regularly asking the approximately 250 dealers on the various teletype circuits for gem \$2½ and \$5 Indians—and his daily bids are now \$200 and \$400 respectively! (A dealer in choice gold recently remarked that during the past year or so he had handled only two or three gem specimens of either type—and that he would gladly match the current teletype bid prices and perhaps pay even more for exceptional pieces.) Another coin which would seem relatively simple to locate in gem condition is the "type three" \$20 Liberty. Bid is currently \$250—and this same buyer will take quantities if they fit the MS-65/70 description. Again bids appear on the teletype circuits at least once a day (often as many as three times each day)—and still this common coin in an uncommon grade is seldom traded.

Advances for better dates in both the \$10 Indian and \$20 St. Gaudens series have been quite numerous and substantial during recent weeks. Note the gains on page two. These bids are for coins that are "at least MS-65"—and buyers are going almost entirely empty-handed. Many of these dates are rare in this ultimate condition and chances are that even considerably higher bids would have the same results.

As usual, grading creates a problem. What a seller may consider MS-65/70 is not necessarily what today's bidder considers a gem coin. As a general rule, sellers tend to be liberal in their grading—and buyers certainly are conservative. The exceptional bids in the third column of the gold chart are for exceptional coins. It should be pointed out that all of the bids for MS-65/70 "type" gold are specific bids which appear everyday on all of the teletype circuits. If a local buyer offers less for a coin which a CDN subscriber considers to be a gem specimen, the reader will know what a major teletype gold buyer considers the coin to be worth—and he can then make a completely informed decision as to how much he will accept. Subscribers often save the price of a year's subscription by having the correct pricing information on even a single transaction!

### This Week's Market

**CENTS:** The quality of BU Lincoln rolls can vary so widely that establishing bid-ask levels is quite difficult. At present there are several major bidders who are offering to pay bid or ask or who simply ask for quotes on choice rolls "suitable for single sales". On the otherhand there are also sellers at bid and ask—but of what quality rolls? Current buyers and sellers are definitely "in the same ball park"—yet they do not necessarily get together. A seller must state that his rolls are strictly choice before most bidders will pay attention to the prices attached.

**NICKELS:** The "want list" of a major teletype bidder regularly includes most of the pre-1931 Buffalos in choice MS-65 condition—offering to pay bid—or ask—or "any reasonable amount". Thus far this buyer has located only two or three specimens (none of the really tough dates) even though about 250 dealer read these daily buying requests! Another bidder is offering to pay \$900 (!) for several "with rays" Shield nickels in strict MS-65 condition "with no die cracks"—no sellers have appeared as yet. Check the prices for circ 1879-81 nickels (page four)—again the Redbook has been left far, far behind.

**DIMES:** A recent teletype message offered an MS-65/better set of Merces complete from 1929 thru 1945 (no overdate, of course) at \$875. This price is well over the current bid—yet there were immediately at least half a dozen buyers! In Roosevelt's the most wanted BU rolls are 47-D & S, 48-D & S, 52-D & 53-P—at least three buyers will take up to ten rolls of each at last week's "ask". (Most of the other pre-1955 rolls are also still enjoying considerable buyer interest.)

**QUARTERS:** The 1932-D is now bid at a record-breaking \$525 in strict MS-65/better condition—no sellers have been located. Another buyer appears ready to take quantities of 35-S and 36-S at a higher \$51 each—only a couple of sellers have responded with a few pieces. Washington rolls register several gains in the '46-'54 group—see page three. The bid for 1838-40 "no drapery" quarter is now pegged at \$2300—with one anxious bidder offering to pay as much as \$2600 for a few gem specimens!

**HALVES:** Walking Liberty and Franklin rolls are steady at current levels—with a few scattered small gains noted. Further attempts to pick up common P-mint W.L. rolls "at bid" are unsuccessful; bidders also are showing mild interest in 43-S, 44-D & S, 45-D & S, 46-P and 47-P & D. The 1936-S single seems to be the only date in the '33-'39 group available at lower levels—dealers will now sell at \$195 (or less, if the buyer will take several).

**DOLLARS:** Topping buying lists are 1879-O (bid now \$400), 1880-O (bid moves to \$480) and 1887-O (bid \$310—with a few sales recorded). Prices for choice MS-65 singles are mixed. A few of the "Redfield" dates have edged slightly lower—several retail ads in Coin World are now offering these dollars. One major silver dollar dealer, in contrast, has raised bid levels for a number of scarce dates—mostly for dates not considered to be part of the "Redfield Collection".

**PROOF SETS and MINT SETS:** Another virtually complete run of minus signs has hit the '50 to date proof sets. Sellers are numerous—and at least some appear to be ready to listen to counteroffers. Noting the current weakness in this

area, buyers remain in a "bargain hunting" mood. An exception: the 3-pc Bicentennial set—bid at a higher \$12.75 (quantity sales as high as \$13).

**COMMEMORATIVES:** A major Texas-based dealer is in the market for quantities of all the Texas commems—higher bids have so far resulted in only a minimum of actual transactions. Lower ask levels are again noted for the BTW and W-C sets (the recent strong buyer is no longer bidding); other scattered issues have also posted small losses.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$128.10 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer-to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

**ADVERTISING RATES:**

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

Superb full red (MS 70) specimen, often being far more than a little.

NICKEL and SILVER TYPE COINS

Gem (MS 65/70) specimens being proportionately more than the ones listed below.

## PROOF TYPE COINS

Superb (MS-70) proofs bring proportionately more than prices listed below. "average" pieces bring less.

### CIRCULATED TYPE COINS

## BU ROLLS & DOLLARS UP; PROOF SETS DOWN Scarce Date "Full Head" S.L. Quarters Very Difficult To Locate

### The Market in Depth

ALLEN HARRIMAN

Common date "full head" Standing Liberty quarters seem to have reached at least a temporary plateau as far as teletype bidding is concerned--bidders are sticking to the \$270 bid presently recorded. Collectors, however, are in the market for the scarce and rare issues of the series in this ultimate condition--and they are finding that dealer stocks are depleted and that even major auction catalogs now seldom include the really tough dates. Actually, no "full head" quarter can now correctly be termed "common"; the most often seen dates are 1920-P, 1925-P, 1927-P, 1928-S, 1929-P & S and 1930-P--and even these are not particularly easy to locate. A few of the other late dates which are edging out of the "common" classification are 1926-P, 1928-P and 1930-S--these three are more difficult to locate with absolutely "full heads" than most dealers realize. A truly choice 1928-P recently brought \$400 at a major show and the collector who thought it has yet to locate a matching 1926-P.

A late date which has recently "come into its own" is the low mintage 1928-D. "full head" specimens are unsuccessfully bid at \$400--and some dealers now consider this issue at least as scarce as the tough 1929-D. (One major company recently listed a "gem full head" 28-D at \$1200 in a retail ad!)

Of the earlier "type two" issues, collectors are finding that such dates as 1917-D, 1918-D, 1919-S and 1920-D are almost as hard to find as the well-known rarities 1924-D and 1926-D. Few if any of these dates which fit today's exacting requirements have been offered on the teletype circuits during the past several months--and a quick check of most major auction catalogs will get the same results. (Buyers should be aware of the current tendency to call a coin "full head" when the strike is 75% to 90% complete.)

The "king" of the regular Standing Liberty issues is probably the 1919-D. Very few choice MS-65/better specimens are known to exist with fully struck heads and shields--only three or four pieces have actually been traded in the last several years! As a matter of fact, an auction price of \$500 was realized by a choice piece about ten years ago when "common dates" were bringing \$25! The 1916-P, for example, is far easier to locate in top condition. It would be very interesting indeed if a major auction house were to acquire a gem BU "full head" set of S.L. quarters and put it on the auction block coin by coin. Previous price records would surely topple and an entirely new outlook on this beautiful series would almost certainly result!

And speaking of auctions, the recent Bowers and Ruddy auction (May 14-15) again produced some very interesting "prices realized"--a few examples: brown Unc (MS-60) late date half-cents brought from \$150 to \$230, a gem BU 1898 Indian (a common date) sold for \$70 and a gem BU (full original color) 1868 two-cent piece fetched \$475. A prooflike gem BU 1837 "no stars" dime went to a dealer at \$3100, an 1875 choice BU prooflike twenty-cent piece sold for \$1300, and 1831 quarter described as "gem" brought an impressive \$2500 in spirited bidding. \$875 was paid for a choice MS-65 1887 "business strike" quarter and an 1888 half of the same quality was knocked down at \$1150! These, of course, are but a few examples--but they indicate just how much excitement and competitive floor bidding is generated these days when choice material is offered!

### This Week's Market

**CENTS:** A major teletype bidder is offering to pay \$3700 for choice rolls of 1972/72 "double die" Lincolns (\$75 per coin)--no sellers have appeared. Interest in strictly choice 1947-S rolls has pushed the bid level higher once again--offers to buy quantities of \$20 have met with few results. Several buyers want quantities of G/VG large cents; they will pay \$310 per hundred.

**NICKELS:** Last week's bidder will now pay a record-breaking \$1000 for a few gem BU "with rays" Shield nickels--but they must be outstanding specimens "with no die breaks"! A few more gains have been registered by the Jeffersons--with a bit of profit-taking noted for the recently "hot" 1950-P roll (a few are now available around \$50).

**DIMES:** The 1939-S Mercury is perhaps the most elusive issue in the '34-'45 "short set" after the three keys (34-D, 35-D & 36-D); bidders now offer to pay \$700 per roll--and they indicate that they would be happy with "a few choice singles"! Both the 40-D and 41-D rolls, by the way, are now unsuccessfully bid at \$300. Advances continue to be recorded by a number of the 1947-53 Roosevelt--several bidders remain in the market for moderate quantities of the various dates which carry plus signs this week (see page three).

**QUARTERS:** The recent strong buyer for gem BU "no drapery" quarters is now willing to pay as much as \$3000 for the right coin! Although all of the 250 or so members of the various teletype circuits read the daily requests--not a single coin which fits this description has been offered for sale. The 1937-P quarter roll is eluding bidders at a higher \$575; several other Washington issues are enjoying gains this week. The "short set" is tough at \$175 bid.

**HALVES:** Although bidding remains mostly in the bargain-hunting category, several dealers are interested in the mintmarked Walking Liberties from 1939 thru 1947 (plus both the 46-P and 47-P rolls)--sellers are basically firm at current "ask" levels. The 1954-S Franklin has made an impressive jump forward--bidders offer \$100 per for "up to fifty rolls"; the 1952 D, on the other hand, is the victim of further profit taking--listed for sale in a lower \$100-\$106 range.

**DOLLARS:** Again a number of the "Redfield" dates are included among the numerous issues which are on the plus side of the ledger. Three major dealers are raising most of the bid levels--sellers of strictly MS-65 dollars, however, seem few and far between on the circuits. It should once again be pointed out that current substantial bids for 24-S, 25-S and 28-S Peace dollars are for the very scarce "full strike" MS-65 coins. (Bids for the other dates, of course, are for the same quality--but these three dates are particularly tough in this top condition.)

**PROOF SETS and MINT SETS:** Three or four major sellers continue to push prices lower for many proof set issues in the '54-'63 group--and at the same time at least a couple of these sellers are offering to buy quantities at considerably lower levels. Just how low prices can go before the "turn around" begins is currently anybody's guess! The '76 S set is available in quantity (one dealer wants to sell one thousand sets)--prices are pegged this week in the \$13 \$13.75 range.

**COMMEMORATIVES:** Except for continued buying pressure by one dealer for the Texas issues, silver commems edge lower in lack luster trading. More buyers are joining the hunt for both MS-60 and MS-65 70 gold commems--and one anxious bidder is stating that he will pay a high \$6100 for a complete gem set (none were offered).

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$125.90 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes)  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

COMPLETE SETS. 50 PC (SIL) BID \$6100 - ASK \$6500. 144 PC (SIL) BID \$12,500 - ASK \$13,250; GOLD - BID \$5900 - ASK \$6300.

The following bid-ask prices are for fully struck choice BU (MS-65) specimens. weakly struck, bag marked or otherwise inferior pieces bring lower prices and superb gem (MS-65+/70) coins may well command premiums over listed prices.

## PROOF SETS CONTINUE TO SLIDE; QUANTITIES AVAILABLE Buyers Begin To Show Interest In 1941-47 W.L. Rolls

### The Market in Depth

ALLEN HARRIMAN

Mild interest is currently evident for a number of rolls in the Walking Liberty half dollar "short set" (1941-47). Specific dates are beginning to elude bidders at current levels and this week's charts show a scattering of small gains. During the past year, of course, the 1933-40 issues have skyrocketed—and surprisingly little of the very substantial gains recorded for these tough singles has been eroded by profit-taking. Now at least a few dealers and investors seem to be taking a look at the 1941-47 issues. This twenty-date roll set has fluctuated within the \$7250-\$7750 price range for well over a year—with single sets usually trading in the \$400 area. (During this same period of time the Franklin roll set has advanced approximately 30%.)

One of the problems which now faces the W.L. roll set is quality. Collectors and investors are becoming increasingly quality-conscious—and rolls which might have been considered choice in years past are now often returned to the seller as "not nice enough". Many dealers are concerned that buyers are becoming "too fussy"—asking for gem rolls of many dates which are virtually never seen in gem condition! An example of this is the bidder who asked for one roll each of the S-mint Walking Liberties from 1940-S thru 1946-S. His buying message specified that all coins in each roll must be "fully struck gems with full heads, hands and breast feathers"—and on top of these qualifications this potential buyer was willing to "pay bid" for the seven rolls! Needless to say this teletype "want list" remained unanswered.

Just as we go to press a new higher buying list has appeared on the teletype circuits for a number of the scarce and rare \$10 Indians and \$20 St. Gaudens. The following prices are currently being offered for strictly MS-65 pieces: \$10—1908-D (NM) \$825, 1909-S \$500, 1910-S \$600, 1911-S \$1800, 1912-S \$850, 1913-S \$2000, 1914-S \$600, and \$2000 each for the 1915-S and 1916-S; \$20—1909/8 \$1500, 1909 \$700 and 1912 \$450. These are the bids from one major Eastern dealer—his bids are monitored at least twice daily and so far no sellers have offered these dates in this grade. This will be the first printed market report on these new higher bids—as usual, the CDN keeps readers up-to-the minute on price changes!

Several buyers are in the market for quantities of circ Carson City dollars. The highest bid prices registered to date for "VG/better" specimens are as follow: 78-CC \$8, 79-CC \$14, 80-CC \$18, 81-CC \$38, 82-CC \$10, 83-CC \$10, 84-CC \$16, 85-CC \$43, 89-CC \$65, 90-CC \$7, 91-CC \$8, 92-CC \$12, 93-CC \$15. Only scattered sales have resulted from these relatively substantial bids. Also experiencing strong demand is the circulated 1893-S Morgan—again buyers want quantities—all grades are needed and sellers are extremely few and far between (new bid prices are on page four).

### This Week's Market

**CENTS:** "Type" is steady—with considerable buying interest noted for MS-60 Indians at the current \$14 level (bidders want up to roll quantities). G/VG large cents and Flying Eagles are also strong at \$3.10 and \$5.25 bid respectively. Scattered gains for a few of the pre-1950 Lincoln rolls—and lower ask prices for most of the late date proof rolls are noted. The 1972/72 remains on "want lists" at \$75 per (few if any have been located).

**NICKELS:** The "wanted" Jeffersons include 41-P, 49-P, 51-P & D and 52-P & D; available in small quantities at lower prices are 44-P, 50-P & D, 51-S, 54-S and 55-P. The record-shattering bid of \$1000 for gem "with rays" Shield nickels is still in force—but the bidder of record is extremely fussy at this price (gems with even minor die breaks are not acceptable).

**DIMES:** At least one major buyer will still take "choice original rolls" of Mercuries at mid bid-ask; other buyers in this area are mostly on the sidelines (except for interest in 35-P, 37-D, 39-S and 42-S). For as long as it lasts, the 47-D and 48-D Roosevelts have both skyrocketed to \$69 bid—ten to twenty roll quantities are needed; several other issues have registered further advances (only 49-PDS are down)—check page three.

**QUARTERS:** At least two major dealers are finding the 37-P and 47-P rolls quite tough (the latter is now bid at \$88); in general, Washington rolls are mixed in only light to moderate trading. Interest in choice BU 35-S and 36-S singles is still evident—bid moves to \$54 for the 35-S. The dealer who is seeking strict gem "no drapery" quarters (1838-40) will now pay an impressive \$3300 for specimens which fit his very exacting requirements (bid for ch MS-65 pieces is now \$2600).

**HALVES:** On several buying lists are the 41-S, 46-P & D and 47-P & D W.L. rolls—naturally buyers want choice rolls (this is particularly tough for the 41-S); other dates which are enjoying bidder demand are 42-S thru 45-S (again these are not easy to locate in well-struck condition). Except for the 54-S (bid now \$102) Franklins seem fairly plentiful in the bid-ask range—with a bit of profit-taking noted here and there.

**DOLLARS:** Plus signs (and an occasional small minus) are scattered across the charts. As usual, bidders for choice MS-65 specimens want truly choice pieces; sellers, on the otherhand, are not always as particular. It will pay collectors and investors to make absolutely certain that they are getting the grade they are paying for! The "Redfield" issues are basically quite firm—and, according to several major dealers, are selling quite well thru current retail bids.

**PROOF SETS and MINT SETS:** Prices continue to slide for practically all issues—sellers are everywhere—and apparently dealer-to-dealer "phone offerings" are at even lower prices for large quantities of the later issues. Current bid levels for 1959-64 mint sets are below pro-rated roll prices for the single coins involved!

**COMMEMORATIVES:** Again the various Texas issues have saved silver commems from an entire week of minus signs. There are several bidders in the market—but for the most part they are simply bargain-hunting. The gold commems are not so easy to locate, however—especially in strict MS-65/70 condition. One dealer continues to offer \$6100 for one "gem" set!

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$127.00 per ounce.

## SILVER DOLLARS ACTIVE; PROOF SETS LEVEL OFF

### New Chart For "MS-60" Proof Type Coins Begins With This Issue

## The Market in Depth

ALLEN HARRIMAN

With this issue the CDN introduces additional market coverage for proof type coins. In response to the general awareness of quality throughout the numismatic market, we have added columns for MS-60 proofs to the familiar one for MS-65+ specimens. An MS-60 proof, of course, is a coin which has light hairlines and/or other light handling marks (often a choice proof becomes MS-60 after having been improperly cleaned). The bid-ask prices reported in the new columns on page five are designed to inform subscribers of the current weekly changes in buying and selling prices for these less than choice MS-65+ proof coins--another example of ever-improving service to Newsletter subscribers!

A note on a type coin which is currently of considerable interest to one specific teletype bidder--the "with rays" Shield nickel. This very scarce MS-65/better coin is now registered at \$800 bid--with very few if any available on the circuits during recent months. The "with rays" nickel almost always comes with die breaks--sometimes these are very minor--yet these die breaks often range in number up to the point that the die was nearly shattered. Most collectors do not mind these die breaks--particularly if they fall into the "minor" category. There is one bidder at the moment, however, who is still looking for a few "gems with absolutely no die breaks" and he is now willing to pay \$110 for such specimens! Obviously we cannot register this record-breaking bid on the page five chart since such "perfect" pieces are so rare--but readers, of course, should know what at least one major bidder considers such a coin to be worth.

By the way, an interesting situation has developed with the 1940-42 proof sets. Strong buyers are in the market for quantities of choice proof Merics and Walking Liberties--currently offering to pay \$57.50 and \$115 respectively. Even at this week's slightly advanced bids for the sets, selling these two singles out of choice sets leaves the seller with a proof Lincoln, Jefferson and Washington for the small difference only \$27.50 or so (using "ask" as a base). Still, very few dealers seem interested in breaking up sets with this in mind--these three extra coins are not "ready sellers" on today's market.

There are at least two regular buyers of Liberty nickels in Good/better condition (full rims both sides). Since teletype buying prices are higher than those we've seen published elsewhere, the following is a run-down of current bid levels:

1883 (NC)	\$ 1.25	1887	\$3.00	1892	\$2.15	1897.98	\$ .40
1883 (WC)	3.50	1888	4.00	1893	1.90	1899.02	.30
1884	4.00	1889	2.00	1894	3.25	1903-12	.26
1885	66.00	1890	2.75	1895	1.25	1912-D	.60
1886	22.50	1891	1.90	1896	1.25	1912-S	20.00

## This Week's Market

**CENTS:** The major teletype dealer who recently began attempts to buy 1972/72 Lincolns will now take "up to twenty rolls"! The bid remains at \$3750 (\$75 per coin)--and not a single roll has been located. A few choice rolls of 1960 "small dates" are now on the market in the \$120-\$127 range; wanted in bag quantities at higher bid prices are 1968-P thru 1971-P.

**NICKELS:** Bidders are interested in three-cent nickels--regularly offering to pay the current "bid" of \$120 for strict MS-65/better specimens and a higher \$165 for choice MS-65+ proofs. The most active Jefferson roll is the scarce 52-D--bid now \$48.50; minor losses are widely scattered across the rest of the BU roll chart--with trading volume down considerably in comparison with recent weeks.

**DIMES:** Some ready buyers on the circuits are willing to take 1916-D dimes--"any grade--any quantity"! (Sellers of this elusive key are few and far between.) All Mercury rolls are strong at current bid--with the 40-S moving up sharply to \$205 bid. Action in the Roosevelt issues has slowed--very active bidding has finally brought some 47-D rolls out of hiding (the 48-D is still very tough at a higher \$70). Choice proof Merics are wanted in quantity at a higher \$57.50.

**QUARTERS:** One dealer listed a "gem BU full head" 28-D for sale early in the week--the price tag was \$500 and there were at least six anxious buyers! Washington rolls are less active than last week--demand is still evident for 37-P, 41-D, 46-P, 47-P and 48-S.

**HALVES:** Buyers continue to find that no pre-1941 W.L. rolls are available on the tapes--constant bidding for 34-P thru 37-P, 39-P & D, 40-P & S fail to produce results (the 40-S, of course, is wanted only in reasonably well struck condition--which is a "tall order"! The most sought after late roll is 46-P (bid now \$260)--again, none offered. Choice W.L. proofs are following the Mercury proofs--bid is up to \$115. The Franklins are steady in light to moderate trading.

**DOLLARS:** Still quite an active area--numerous prices move in both directions. On the minus side are a number of common dates rolls (available in small to moderate quantities). Gains, on the other hand, are again registered by many of those singles which are very scarce in true MS-65 condition--and a few of the "Redfield" dates.

**PROOF SETS and MINT SETS:** Finally a halt in the proof set "slide"! This week, at least, brought steady prices and a scattering of buying. Several dealers were still "bargain" hunting--but nearly all of the small sales noted were within current bid-ask ranges. Gains noted for the 1940-42 issues (see "The Market in Depth")

**COMMEMORATIVES:** Action in XF/AU commems tops buying in this area; many issues score gains--buyers will take quantities at these new prices. The BU column also boasts several gains--"bargain offerings" of lots are now few and far between. Gold issues remain strong at present levels.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$130.10 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer-to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

## "GEM" TYPE GOLD ALMOST IMPOSSIBLE TO LOCATE

Late Mint Sets And Proof Sets Edge Lower Again This Week; Little Buying Interest Noted

### The Market in Depth

ALLEN HARRIMAN

Those serious teletype bidders who are in the market for "type" gold coins in gem MS-65+ condition are finding that raising bid levels for this very scarce material results in few actual transactions. The current major buyer of these top grade coins has advanced prices for eleven different "types" this week--yet his twice-daily "want lists" are almost totally ignored by the approximate 250 other dealers on the circuits. (There are several buyers in this market--most of them need one, two or just a few issues; the one regular major bidder, however, is in the market for all issues listed in the column opposite.)

Gem \$2½ Indians, for instance, are now bid at \$210--and virtually none of this quality have been located. (Until recently this coin was considered relatively easy to locate--and was priced below the \$2½ Liberty.) Another coin which is eluding all buyers is the \$5 Indian in the same top MS-65+ condition. Also once considered only moderately scarce by most dealers, the \$5 Indian in gem condition will now fetch at least \$425 on the teletype circuits--and up to \$475-\$500 for a truly superb specimen.

There are many dealers who feel that these bids--and others in this area--are "too high". On the other hand, sellers still fail to appear as bids advance! One problem is that, in these days of quality-conscious buyers, coins once considered "choice" (or even "gem") actually fall somewhat short of current grading requirements. As in all other areas of the market, buyers are becoming more and more "fussy". Bid levels are not "too high"--it simply takes a strictly graded MS-65+ coin to command the bid prices in the third column of the gold chart. On today's market such coins are very, very few and far between. Check the "prices realized" list of any recent major auction which included a few "gem" common date gold type coins; you will find that dealers as well as collectors and investors are usually paying well in excess of even these latest bid levels for the right coins!

The "interesting situation" regarding 1940-42 proof sets which was mentioned last week has become even intriguing. Currently there are strong teletype bidders who are in the market for quantities of strictly choice proof Mercury dimes and Walking Liberty halves--and they will now pay \$180 for the pair (\$60 and \$120 respectively). However, the highest teletype bids registered for the 1940-42 sets are \$185-\$190. A logical question is why don't bidders just buy complete proof sets--even at "ask"--and sell the other three coins (which, after all, would now cost only \$20 or so). Two answers are evident. In addition to the fact that the cent, nickel and quarter are "slow sellers" (as was mentioned last week) it seems that a majority of the early sets on the market today contain coins (halves in particular) which are not strictly choice MS-65/better. These sets may trade fairly well as a set--especially in over-the-counter sales--but when examined separately many of the halves and at least a portion of the dimes do not meet requirements set forth by the bidders who are offering to pay \$60 and \$120 for the two key coins!

### This Week's Market

**CENTS:** Prices drift a bit lower for a few later date BU rolls (including the 60-P "small date"--now in the \$113-\$120 range); an exception is the 69-P which is wanted in quantity at a higher \$4.75. The 1976-S "proof only" roll is considerably lower at \$320-\$350. One major dealer, by the way, is now offering to pay \$100 each for "full Good" 1877 Indians!

**NICKELS:** The Jefferson series has again slowed to the usual "light trading"--with a few key rolls (39-S, 42-P (II), 42-D, 50-D) available at slightly lower levels; the 52-D is still an exception (bid moves to \$49.) The key 1885 and 1886 Liberty nickels are wanted "in any grade" by several regular teletype bidders--prices advance for the higher grades.

**DIMES:** Frequent requests for BU roll sets of Mercuries remain unanswered--even when bidders simply ask for "quotes"; both the '41-'45 and the "impossible" '34-'45 roll sets are wanted. Choice proof Merces move to \$60 bid. Although the Roosevelt have cooled considerably during the past couple of weeks, the lone 48-D roll is still forging ahead--with bids registered this week at \$72.

**QUARTERS:** Very little change--and only light activity--noted for the Washingtons; both the BU rolls and early singles are relatively firm at current levels (the 48-S seems a bit tough for the moment at \$62 bid). Buyers still find the 32-D extremely elusive in truly choice condition--one or two anxious bidders will pay "ask" (\$600) for strict gems!

**HALVES:** Further gains for the very scarce 39-P & D W.L. rolls--bids are now \$720 and \$740 respectively; also enjoying moderate demand at current bid levels are 40-P, 41-S, 43-S, 46-P & D and 47-P & D. Choice proof Walking Liberties have moved ahead again this week--with quantities wanted now at \$120. The Franklin issues remain quiet and steady--with some interest noted for the 54-S roll at a slightly higher \$104. Strictly AU Bust halves advance to \$90 bid.

**DOLLARS:** All changes--in both directions--have been relatively minor this week; small gains noted for a number of non-Redfield P-mint rolls. Several buyers are in the market for MS-65/better "full prooflike specimens" of the scarce to rare dates--and they are willing to listen to "quotes" on the right coins!

**PROOF SETS and MINT SETS:** The Bureau of the mint has apparently delivered a large number of 1976 six-piece proof sets during the past week or so--sellers abound and the "bid-ask" level has dropped substantially to \$10-\$10.75.

Early sets (1940-42) register gains due to interest in proof Merces and W.L. halves, many issues from '59 to date (plus the '70-'76 mint sets) resume the slide toward lower levels--sales are light and widely scattered.

**COMMEMORATIVES:** Once again the Texas PDS sets are on the move--the BTW and W-C sets, on the other hand, edge lower (except for the '50 BTW which is firm at \$95 bid). At least three major teletype dealers are in the market for all eleven gold commems in choice condition--but they are sticking to present bid levels (almost entirely without success).

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$127.10 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

1<sup>ST</sup>and Still  
Foremost

## PROOF SETS BEGIN TO LEVEL OFF

### Moderate Buying Noted For A Number Of Sets; A Few Prices Edge Higher

## The Market in Depth

ALLEN HARRIMAN

Proof sets seem to be levelling off--finally! A number of dealers are obviously seizing this opportunity to replenish store stock by picking up a few each of the dates they need at current low prices--this is especially true for the issues from 1955 thru 1964. One or two major proof set dealers are now even offering to take "up to a couple hundred" of several dates--1956, 1957, 1959, 1961-4. As a result, prices have edged forward very slightly this week for the 1962-64 sets--and are firm for virtually all of the others. Several of the later S-mint issues, on the other hand, have continued to drift a bit lower. Even so, numerous transactions were also recorded in this area during the week; the '75-S set registered scattered sales around \$20 and the '76-S issue has apparently settled to relatively normal trading in the \$9.75-\$10.50 range.

Bidding for the early 1936-42 sets has also increased this week--and prices have moved ahead for all issues. Much of this strength is probably still due to the continued demand for choice proof Mercury dimes and Walking Liberty halves (bids remain strong for these two coins at \$60 and \$120 respectively). Choice examples of these early issues are, as usual, not easy to locate; a great many of the sets listed for sale have problems of one sort or another--spotted cents and/or nickels or hairlined silver coins. Many "fussy" collectors, by the way, prefer to assemble their early sets coin by coin in order to have top quality.

Although buyers of higher grade circ as well as MS-60 and MS-65 type coins seem basically content with present bid-ask levels, relatively frequent "want lists" on this material continue to be monitored. As one major buyer in this area regularly states on the teletype circuits, "We are still in the market for all choice type material--and will pay bid on any properly graded coin". Very few coins are offered, however--and the scattered selling lists which include choice specimens almost invariably have price tags attached which are at "ask" or higher. Most dealers who do manage to locate a few choice type coins already have retail customers waiting in line--as a result, most really desirable material never appears on the teletype circuits.

When a dealer needs a specific coin for a ready customer he often simply requests a "quote" on the piece needed--or he may phone one of the few major dealers whom it is known has a reasonably adequate stock of choice material. Sales as a result of this tactic are usually at prices somewhat in advance of current teletype bid-ask levels--but at least, in many instances, the coin has been located and the sale made. Those collectors who wait for major auction sales to corner the coins they want often find that floor bidding on truly choice pieces reaches prices which leave the Guidebook as well as teletype prices far, far behind!

## This Week's Market

**CENTS:** Attempts to locate the one-year-of-type 1859 Indians in choice MS-65 condition are entirely unsuccessful; common date copper-nickel cents (1862 or 1863) in the same condition are also eluding bidders at \$110. Lincoln rolls register few changes--some interest (and sales at slightly higher levels) is noted for 46-S and 47-S; the 60-P "small date" roll is lower in the \$108-\$115 range.

**NICKELS:** The Buffalo issues of 1934 and 1935 are very difficult to locate--higher bids produce no results. The Jefferson series has remained very quiet throughout the week (minor losses for 43-D and 55-P). Continued and frequent efforts to buy "any quantity--any grade" of circulated 1879, 1880, 1881 and 1885 nickels are meeting with no success (buyers are sticking to current bid levels--at least for the moment).

**DIMES:** All Mercury rolls remain strong--but potential buyers seem reluctant to raise their offers above present levels. Not a single '41-'45 BU roll set has been located in spite of repeated buying requests. Prices are lightly mixed for the Roosevelts; some profit-taking is noted for 47-D and 54-S--small gains for 48-D and 49-P. Higher bids are recorded for 1916-D dimes: Good \$115, VG \$140, Fine \$240, VF \$315, XF \$450--buyers will take "any quantity"!

**QUARTERS:** Dealers are offering a few Washington rolls at slightly lower prices (44-P, 45-PS, 46-S, 47-S & 53-S); on the other hand, recent gains have shown 41-D and 48-S elusive at bids of \$530 and \$63 respectively. The 37-P also remains on several teletype "want lists"--bidders will now pay up to \$15 for choice singles. The bid for strictly MS-65 "no drapery quarters" (1838-40) has moved to a record \$3000--and one major dealer is willing to pay \$3450 for "gems". (It should be pointed out once again that MS-65/better specimens are rare and that buyers at extremely fussy at these prices.)

**HALVES:** Gains for the 34-P, 41-S, 42-D, 43-S and 46-D Walking Liberties. (One dealer, by the way, is offering to pay \$85 each for "gem" 41-S's.) Mild profit-taking has lowered ask levels for a few Franklin rolls (the 54-S and 55-P register small advances); numerous buyers want large quantities of common date Franklins--now at a minimum of \$39. Strictly AU Bust halves move to \$95 bid.

**DOLLARS:** Very minor changes for the Morgan and Peace dollars--check page six. In the Eisenhower series only the relatively low mintage 1973-S proof is eluding bidders--at a slightly higher \$16.25.

**PROOF SETS AND MINT SETS:** See "The Market in Depth" for the latest on proof sets. By the way, it is interesting to note that the very highest bids noted on any of the numerous teletype circuits for mint sets in the 1959-64 group are

below the pro-rated roll prices of the coins involved--and sales at these low levels are occasionally recorded!

**COMMEMORATIVES:** Virtually unchanged except for continued buying pressure by one major bidder for all of the Texas issues--and resumed interest by another bidder for the BTW and W-C sets.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$125.50 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer-to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

## PROOF SETS MODERATLY ACTIVE; BU ROLL ACTIVITY SLOWS Early Canadian Prooflike Sets Begin To Appear On More Buying Lists

### The Market in Depth

ALLEN HARRIMAN

The general tone of the market seems to be reaching the "summer lethargy" usually noted by late June or early July. No pattern of demand is easily discernible; both buyers and sellers are basically sticking to current bid-ask ranges in most of their daily trading. The recent BU roll surge has abated considerably during the past few weeks and selling lists in this area are beginning to lengthen. Scattered dates, of course, remain on various "want lists"—but even for these buyers are only willing to pay "bid" or just slightly higher. No series is "hot" at the moment—as a matter of fact, "warm" would probably be an overstatement.

One area in which bidding has increased somewhat in recent days is the earlier Canadian prooflike sets. The low mintage 1954-61 sets are suddenly appearing regularly on teletype buying lists—with a few prices edging forward this week. The mintages, by the way, for these sets are extremely low in comparison with corresponding years for U.S. sets; it is obvious that only the considerably smaller demand keeps prices at current low levels. For instance, the mintage of the 1956 Canadian set is barely over that of the 1939 U.S. set (9018 vs 8795)—yet bid for the '39 U.S. issue is over five times that recorded for the '56 prooflike issue! The following are the mintages for the 1956-61 Canadian group:

1954 - 7,426	1957 - 11,862	1960 - 64,097
1955 - 6,301	1958 - 18,259	1961 - 98,373
1956 - 9,018	1959 - 31,577	

It is interesting to note that bid levels for many original U.S. mint sets remain slightly below the pro-rated roll prices for the single coins involved. On top of this numerous "bargain hunters" regularly attempt to snare sets at "5%-10% off bid"! This is an excellent way, of course, to fill in "store stock" on this late date BU material in small quantities—rather than buying rolls of each date. True, there aren't many sellers at these low prices—but persevering bidders do occasionally manage to locate small mixed date lots within the bid-ask range.

An unusual situation in silver commems has developed during the recent "push" on the Texas issues. In the past, the "type" Texas coin was always priced at or slightly below the listing for the 1934 issue. However, the strong Texas-based bidder who is presently in the market for all of the Texas commems will pay \$39 for any single Texas issue except the 1934—for which his bid remains only \$34.50. If this buyer is lucky enough to locate singles from the 1935-37 sets he will then be able to assemble PDS sets at below his own current bid prices for the complete sets. The problem, of course, is locating the correct quantity of each of the various dates and mintmarks needed!

### This Week's Market

**CENTS:** Several buyers are still in the market for quantities of Good/better key date Indians—offering to pay current bid levels isn't proving very effective. Dealers are also interested in the 1955/55 double die in all grades at "bid"—as well as the 1972/72 version in choice BU at \$75 (or \$3750 per roll); only scattered singles have changed hands.

**NICKELS:** A few choice rolls of 1938-D Buffalos have traded within the current bid-ask range; otherwise, most of the earlier rolls are quite difficult to find (especially the '34 and '35 issues which began to stir last week). The rare 1918/17-D is wanted in the lower grades (bid for Good has moved to \$115)—even a single specimen is seldom encountered on the teletype circuits.

**DIMES:** Bid for choice proof Mercuries has now moved to \$62.50 (only strictly MS-65/better pieces are wanted at this price—others are being returned). Mercury rolls remain quite strong—one bidder regularly offers to take "any choice roll at bid" (gains noted for 37-P and 39-PDS). Except for the 48-D (with sales at a higher \$74) several Roosevelt issues continue to reflect mild profit-taking.

**QUARTERS:** Dealers find that the 1916-P and 1918/17 S.L. quarters are nearly impossible to corner at current price levels—bidders will consider any grade (particularly Good thru Fine) and most want several specimens. Trading in Washington rolls has remained light throughout the week; changes have been minimal (41-S, 47-P, 48-S up slightly; 53-S, 55-D, 58-P down just a bit).

**HALVES:** Higher bids of \$125 produce only an occasional choice proof Walking Liberty (again all except full MS-65/better pieces are being returned to sellers). Moderate interest is evident, as usual, for nice W.L. rolls—a couple of issues edge forward slightly. Strong demand is noted for large quantities of common date Franklins; the minimum bid is now \$39—and buyers are in the market for bags of any date in the lower priced 1960-63 group.

**DOLLARS:** As with the halves, quantities of common dates are now wanted by several major teletype buyers—bags are rather elusive at current bid prices. The better dates have been very quiet for the past couple of weeks—exceptions: 1894-S now bid at \$850 and 1901-P on "want lists" at a record \$1250 (both in full choice MS-65, of course).

**PROOF SETS and MINT SETS:** Interest is evident for several proof sets—particularly 1956 and 1958 (both of which are now wanted in quantity a higher prices). The three "S less" issues are enjoying considerable attention from one major dealer—with substantial advances again registered by the 1970 and 1971 sets. Early sets remain firm—basically on the strength of the proof Mercs and Walking Liberties.

**COMMEMORATIVES:** Four gold issues edge forward slightly; choice MS-65/better specimens of all eleven issues are difficult to find—and bids of \$5950 for complete sets are totally ignored. Changes in the silver series are very minor—except for an impressive \$7 jump recorded for the elusive 1928-P Oregon Trail.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$125.00 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer-to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

**ADVERTISING RATES:**

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

COMPLETE SETS. 50 PC. (SIL) BID \$6100 - ASK \$6500, 144 PC. (SIL) BID \$12,500 ASK \$13,250, GOLD - BID \$5950 - ASK \$6300.

The prices listed are for "choice BU" (MS-65) specimens; gem pieces (MS-65/70) will bring more—often substantially more—and "UNC" coins of lesser quality will sell for lower prices. Accurate grading is extremely important.

## IN DEPTH REPORT ON BARBER DIMES Proof Set Activity Continues; MS-65 Dollars Appear On Want Lists

### The Market in Depth: A REPORT ON BARBER DIMES

With this issue we begin an exclusive three-part study of Barber coinage. This week's article will pinpoint the many dates in the dime series which consistently elude collectors and dealers even though they may be listed at or near the common date level in the '77 Guidebook—as well as dates which may list higher but still bring from double or triple catalog prices when available. Guidebook prices are probably for MS-60+ coins—our figures in these three articles are for CHOICE MS-65 specimens; we are showing the RELATIONSHIP between dates in the series—not "revising" the Guidebook.

**PHILADELPHIA ISSUES:** Two Philadelphia coins have emerged from the CDN study on Barber coinage as definitely under-valued—1894-P and 1896-P. The '77 Guidebook prices are \$135 and \$120—barely over the common date listings of \$110. However, bourse table price tags and recent auction records place these two coins in the \$250-\$275 and \$210-\$235 areas respectively. Those seeking these two dates will find proofs offered far more often than choice business strikes; neither of these issues should be considered a common date. Another Philadelphia coin which is almost always found in proof rather than BU condition is 1895-P—business strikes in choice condition have appeared very infrequently in our research (no more than four or five pieces have been offered for sale during the past year). The availability of proofs has kept GB listings quite low. It should be noted that only three Barber dimes have proof mintages which are larger than the 1895 issue. In this case it is the elusiveness of the BU coin which has pushed the price for proofs to levels in excess of true scarcity. The 1895-P is the one coin in the Barber dime series which should catalog at a higher price in BU than in proof; the few choice pieces which have sold during the past year have registered sales as high as \$500-\$575—and a superb specimen has recently changed hands at \$850!

Two other P-mints deserve mention. The 1893-P easily sells for at least \$200 when offered at auction or when located on a bourse table; this is definitely not the common date that the GB indicates. The second is a completely overlooked issue—the 1915-P (with a mintage of 5.6 million). Only the 1893-96 issues have lower mintages, most other P-mints have mintage figures which range from double to four times that of the 1915-P. In checking auction catalogs, selling lists and various other sources the conclusion is that the 1915-P will not remain in the common date category indefinitely.

**NEW ORLEANS ISSUES:** Of the several under-valued New Orleans issues, the 1899-O and 1900-O top the list. The 1899-O is listed in the '77 GB as a common date (\$110) and the 1900-O is listed at only a slightly more realistic \$150. Both coins, however, have proven in research to be extremely scarce in choice condition and both can already boast of sales records in the \$300-\$375 range. Most dealers can only offer these two coins in AU and most auction catalogs simply skip these dates. Following closely behind is the 1898-O—with recent sales in the \$300-\$350 area (GB \$165).

The 1895-O is, of course, the "key" of the Barber dime series; it lists at \$900 in the latest Guidebook. Sales in recent months have been verified at \$1250. The 1894-O is nearly as scarce, however, as the 95-O—but carries a GB price of only \$400. Again, most auction catalogs skip this date or offer AU specimens; at least one sale of a choice piece has been noted at \$875 within the past year. This date is rarely encountered and is certainly another of the under-valued dates. The 1896-O is also becoming recognized for its true scarcity—the GB price moved from \$275 in '76 to \$340 in the new '77 copy. Still, most recent sales records for choice specimens have been above the \$500 level and at least one major dealer considers this as elusive as the 1896-S with his selling list price of \$750! Somewhat even more overlooked, however, is the 1897-O—which our research has shown to be just about as scarce as the 1896-O (GB only \$285). Again recent offering on bourse tables have been above the \$500 mark—and a choice piece brought \$425 at auction nearly a year ago. The GB listing for the 1897-O should be the same as for the 1896-O.

Two other New Orleans coins appear to be more elusive than generally thought—1906-O and 1908-O. Both have relatively low mintages and both are often absent from even major auction catalogs. Currently worth at least \$200 each, these are two dates to keep an eye on.

**DENVER ISSUES:** The Denver mint presents us with no unrecognized rarities; coinage did not begin in Denver until 1906—so the scarce dates and low mintages of the early years are automatically eliminated. Only the 1909-D and 1910-D issues seem to elude buyers on a rather consistent basis. The GB considers 1910-D to be a common date but it would be more in line with scarcity to list both the 1910-D and lower mintage 1909-D at about the same price. Both have sales records in the \$200-\$225 range.

**SAN FRANCISCO ISSUES:** Placing the numerous under-valued San Francisco issues in the proper order is a difficult task; actually there are very few S-mint Barber dimes which fall into the common date category. Probably the most under-valued issue is the 1904-S—with a GB price in the '77 edition of a very low \$225. Recent records show sales as high as \$750! This coin is very rarely offered; in fact, it appears to be available less frequently than the more highly rated 1903-S. Even so, the 1903-S is still quite under-valued with its GB listing of \$290—sales in the \$500-\$575 range have been registered and offering are again very infrequent. Our research also shows that the 1902-S deserves a second look. One knowledgeable dealer lists this date for sale at \$375—while the Guidebook considers this issue barely above the common date status at a very low \$130. Auction records for the 1902-S have already reached the \$290 level.

Research indicates that the BU 1901-S is another very elusive issue. Sales records are extremely sketchy—so few truly BU specimens have been available in recent years. Suffice it to say that a strictly choice piece would fetch a price in the \$900-\$1000 range if offered at auction today. Recent attempts on the various teletype circuits to corner even a single piece have been unsuccessful—bids have ranged from "full Redbook" (\$550) to \$750-\$800 to simple requests for "reasonable quotes". The new '77 GB listing is \$625. It should be noted that although "sliders" are not common, dealers do tend to overgrade the rare 1901-S and AU-55 specimens often become "unc" when they reach selling lists or auction catalogs.

Other under-valued San Francisco issues include:  
1895-S—holding the distinction of being the "most common" issue of 1895 (which adds to the demand by those collecting year sets rather than date sets). This is an elusive coin in top grade; sales records as high as \$300 (current GB is \$200).  
1915-S—very seldom available; sales have been recorded in the \$200-\$250 range for several years (GB is still a low \$140).

1896-S—recognized as scarce with a GB price of \$400. This coin has sold during the past year for as much as \$750.

1898-S and 1899-S—these two are of about the same scarcity—they are currently bringing \$225-\$275 even though GB listings are only \$160 and \$115 respectively.

1900-S—the availability of all grades up to MS-60 often leads to the conclusion that MS-65 specimens are common. Such is not the case—truly choice pieces are very scarce and are currently worth at least \$225-\$250 (GB \$125).

1909-S, 1910-S and 1914-S—three issues which appear to be somewhat more elusive than previously thought; these are more dates to watch.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$123.40 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a  
weekly basis. Under the present system,  
it is impossible to monitor all transactions  
or offers to buy and sell, but the broad  
information sources of the Newsletter  
make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the price in the  
Newsletter are from dealer-to-dealer trans-  
actions. As an investor, you may place  
your buy and sell orders through a dealer  
for a fee, as you would buy stock  
through a broker.

**ADVERTISING RATES:**

\$10.00 per column inch; four  
consecutive ads (no changes)  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

COMPLETE SETS: 50 PC. (SIL) BID \$6100 - ASK \$6500; 144 PC. (SIL) BID \$12,500 - ASK \$13,250; GOLD - BID \$5950 - ASK \$6300.

The following bid-ask prices are for fully struck choice BU (MS-65) specimens; weakly struck, bag marked or otherwise inferior pieces bring lower prices and superb gem (MS-65+/70) coins may well command premiums over listed prices.

## SPECIAL RESEARCH REPORT ON BARBER QUARTERS

### Commem Gold Advance Continues; Proof Set Activity Moderate

#### The Market in Depth: A REPORT ON BARBER QUARTERS

The following is the second of our three-part study of Barber coinage. This week we pinpoint the many dates in the quarter series which consistently elude collectors and dealers even though they may be listed at or near the common date level in the '77 Guidebook--as well as dates which may list higher but still bring from double to triple catalog prices when available. Guidebook prices are probably for MS-60+ coins--our figures in these three articles are for CHOICE MS-65 specimens; we are showing the RELATIONSHIP between dates in the series--not "revising" the Guidebook.

**PHILADELPHIA ISSUES:** One of the greatest one-year percentage increases noted in the new '77 Guidebook was for the long under-valued 1913-P Barber quarter. The jump from \$375 in the '76 edition to this year's \$700 was obviously the result of the vast amount of publicity this scarce coin has received during the past couple of years. Actual sales records are extremely few and far between. Teletype bids in the \$800-\$900 range have remained totally ineffective and recent auction records are non-existent. Dealer-to-dealer transactions, however, have been registered during the past year in the \$1000-\$1200 range--still well over the latest GB listing of \$700. This coin is rare in BU condition--most collectors have settled for a proof. It should be noted that for the first time the GB has recognized the rarity of a BU Barber quarter to the extent of listing it higher in BU than in proof condition.

Surprisingly, the 1916-P (with a low mintage of only 1.8 million) appears for sale far less often than might be expected. Generally it is assumed that last-year-of-issue coins are saved in quantity--such does not seem to be the case for the 1916-P. Another date which appears less often than most is the 1910-P--also a relatively low mintage date. Neither of these issues presently commands a premium over the common date price--but this situation might well be rectified during the next few years. Other Philadelphia issues to keep an eye on are 1894-P, 1896-P, 1906-P, 1911-P and 1915-P; our research has revealed that these are also often missing from auction catalogs and selling lists. All are currently considered common dates and all still trade at the common date level.

**NEW ORLEANS ISSUES:** The New Orleans coins have presented quite an impressive line-up of under-valued dates to our researchers. Topping this list is the 1896-O--with an extremely low '77 Guidebook listing of only \$350. This coin is rarely available in grades above AU and already holds one or two sales records of \$900 or more. One major dealer recently stated that, in his opinion, the 1896-O is just as scarce as the highly touted 1896-S (a recognized rarity with a current GB price of \$2000). This comparison might be a little strong--but it is definite that the 1896-O is a very, very scarce quarter in choice BU condition. Following closely behind are these other very tough O-mint issues:

1897-O--this one seems to be nearly as scarce as the 1896-O. It is seldom seen on bourse tables and is missing from most auction catalogs; current GB listing is again only \$350--sales have been registered during the past year, however, in the \$750-\$825 range. One current selling list includes a "gem" at \$1500!

1901-O--no recent auction records on strictly BU specimens; teletype bids in the \$800 area (double the latest GB price of \$400) have produced no sales. Easily worth \$900-\$1000 in today's active market.

1909-O--this last O-mint issue is extremely difficult to find in BU condition; the GB lists this as the fifth scarcest date in the series at \$500. One private sale was recorded at \$850 late in '76. Specimens at auction and in selling lists tend to be "sliders" more often than not. A choice piece in an auction today would almost certainly set another new price record! Again on a current selling list in "gem" condition at \$1400!

Three more New Orleans issues which are highly under-valued according to research are 1898-O, 1899-O and 1900-O. Although mintages on these three issues vary considerably, all seem to be of about equal scarcity; sales in the \$425-\$500 range have been registered by each--even though they still carry GB listings at or just above common date levels. A "gem" 1899-O is currently advertised at \$750.

Dates to watch: 1902-O, 1903-O, 1904-O and 1905-O--none are easily located and all bring well in excess of catalog prices when located. These dates are on the "want lists" of numerous dealers.

**DENVER ISSUES:** Again only two Denver coins stand out as under-valued. Research has shown that the scarcest D-mint is the tough 1913-D. This date is almost always missing from even the most extensive auction catalogs--or is available in AU or "slider" condition. If located on a bourse table in choice condition the price tag will almost certainly be in the \$500 area; the few auction records located are not very recent--and all are in the \$375-\$425 range. The lower mintage 1911-D is perhaps just a bit more easy to locate--yet sales were recorded at \$385 nearly two years ago. The '77 GB notes that the 1913-D is better than a common date with a listing of \$375; the 1911-D is ignored with a price of only \$265.

**SAN FRANCISCO ISSUES:** The 1901-S Barber quarter is the "king" of all regular issue twentieth-century coins. The '77 GB price of \$3200 is just about half that which any knowledgeable dealer would pay for a choice specimen. Most major dealers have a "want list" (often several) on this date--and at least one retail sale has been recorded at the \$8500 level during the past year. This rarity will be the first Barber coin to top the \$10,000 mark!

Perhaps the most under-valued S-mint is the 1899-S--which lists in the new GB as a common date at only \$260 (mintage only .7 million). This coin easily ranks with the tough 1897-S--both bring at least \$500 when offered. While the 1897-S is recognized as somewhat scarce (GB \$375), the 1899-S seems to be almost entirely overlooked by all except those who "know their Barbers". The 1898-S, by the way, also brings at least \$500 when available--a "gem" is now on the market at \$800.

At the current price listing of \$440 a BU 1914-S would be a bargain indeed. This coin is very seldom encountered; only three or four sales have been recorded during the past eighteen months and all have been above the \$800 mark--one specimen selling for \$1150. The 1908-S issue is apparently nearly as scarce--sales have topped the \$750 mark. GB listing is only \$320; most pieces traced were "sliders".

Other S-mint Barber quarters to watch--these bring substantial premiums over catalog prices and are offered only infrequently:

1902-S--recent sales records to \$475 (current GB price is a low \$285).  
1903-S--auction records to \$595--with a somewhat more realistic GB listing of \$360, a current selling list price of \$750 is noted for a "gem".

1907-S and 1911-S--both may well fall into the "sleeper" category. Neither appears very often in auction catalogs and several dealers have noted that both are far from easy to locate. The few recent sales noted, however, have still been rather unimpressive in the \$300-\$325 area--just above the common date price.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$123.10 per ounce.

'36 Oregon Trail	---	---	43.00	46.00					

COMPLETE SETS: 50 PC. (SIL) BID \$6100 - ASK \$6500; 144 PC. (SIL) BID \$12,500 - ASK \$13,250; GOLD - BID \$6100 - ASK \$6450.

The following bid-ask prices are for fully struck choice BU (MS-65) specimens; weakly struck, bag marked or otherwise inferior pieces bring lower prices and superb gem (MS-65+/70) coins may well command premiums over listed prices.

## BARBER HALF DOLLAR SERIES EXAMINED "Type" Gold In Demand; BU Roll Market Inactive

### The Market in Depth A REPORT ON BARBER HALVES

The following is the last of our three-part study of Barber coinage. This article will point out the many dates in the half dollar series which consistently elude collectors and dealers even though they may be listed at or near the common date level in the '77 Guidebook--as well as dates which may list higher but still bring from double to triple catalog prices when available. Guidebook prices are probably for MS-60+ coins--our figures in these three articles are for CHOICE MS-65 specimens; we are showing the RELATIONSHIP between dates in the series--not "revising" the Guidebook.

**PHILADELPHIA ISSUES:** The most under-valued Philadelphia issue in relation to the current Guidebook listing (of only \$570) is the 1905-P. Research has shown this date in BU condition missing from virtually every major auction catalog of the past several years--it is rarely seen even on the most impressive bourse tables. The only definite sale traced during the past year was registered at \$950, teletype bids in the \$800-\$900 area are totally ineffective. If a choice piece were to be auctioned in today's market the winning bid would almost certainly be well above the \$1000 mark! Following closely behind is the 1910-P. This issue carries a '77 GB listing of \$600--and, again, actual sales records of BU specimens are very difficult to trace. Most of the pieces located in auction records and selling lists were in the AU and "slider" category. One major dealer reports a private sale at \$1000 for a truly choice piece--over a year ago. Both the 1905-P and 1910-P are found far, far more often in proof than in BU condition--and both should be considered extremely scarce in MS-65 condition.

Of the three late date P-mint "keys"--1913-P, 1914-P and 1915-P--research has shown that, contrary to the long-standing general assumption, the 1915-P is at least as scarce (if not slightly more so) than the lower mintage 1914-P. The '77 GB perpetuates the thinking about these two coins with the latest listings of \$775 for the 1914-P and \$650 for the 1915-P. The 1915-P, however, has appeared for sale even less frequently during the past several years than the still very scarce 1914-P. Both should at least carry the same GB price. By the way, the latest edition of the Guidebook has moved the BU listing for the 1914-P higher than that for the proof. This is a step forward--in actuality, the BU listings for 1905-P, 1910-P, 1913-P, 1914-P and 1915-P should all be considerably higher than the proofs. (The 1914 is the scarcest of all proofs and should perhaps be the closest to the BU price of any of these five issues!).

One more P-mint consistently manages to elude buyers--the 1896-P. This coin is listed in the GB as a common date (at \$460) yet sales have reached at least \$750 and many "want lists" include this low mintage date.

**NEW ORLEANS ISSUES:** Again the New Orleans mint has presented our researchers with quite a number of under-valued dates. Topping this list are 1900-O and 1904-O. The rare selling list which includes properly graded full MS-65 specimens of either date will tag them at \$1500--or even higher! No recent reliable auction records are available--such is the scarcity of these two issues; recent teletype bids in the \$1200 area have been entirely ignored. The '77 GB still lists these two extremely scarce issues at \$475 and \$465 respectively--about one third of what a choice specimen will bring from a knowledgeable dealer! Three other O-mints appear to be nearly as scarce--1896-O, 1901-O and 1909-O. None of these appear with frequency at auction or on bourse tables--and if a dealer locates a choice piece it usually doesn't remain in stock long enough to be included on a selling list. One choice 1896-O changed hands recently at \$1750 in a retail transaction (GB is almost at common date price at \$500). Standing teletype bids of \$1000 for any of these three receive absolutely no attention.

The recognized O-mint "keys" are, of course, 1892-O and 1897-O--both hold recent auction records of around \$1000-\$1150; the 1897-O appears to be the toughest of the pair--yet many of the 1892-O's traced turned out to be less than choice (first-year-of-issue coins are often encountered in "slider" condition for obvious reasons.)

Other New Orleans issues to watch:

1898-O--while not as scarce the 1900-O, this date is extremely elusive in choice condition and again boasts of auction records as high as \$1050.

1901-O and 1903-O--both are considered nearly in the common date category in the latest GB, yet both create a lot of interest when offered for sale; transactions registered for both as high as \$825-\$900.

1905-O--a very low mintage coin which is likely to move ahead strongly in the next few years. This coin is not excessively scarce--yet auction records in the \$750-\$825 range have been recorded; six or seven choice pieces were traced during the past year or so.

**DENVER ISSUES:** Only seven dates were minted in Denver--and research shows that no rarities were included. Two of the seven issues, however, are considerably more elusive than the other five--1911-D and 1913-D. The toughest of this pair is the 1911-D (now listed in the GB at only \$485); this coin consistently eludes collectors who want choice fully struck specimens. The few recent bourse table price tags noted have been in the \$750 area--occasionally more if the quality warrants (full claw, etc.) Auction records are few and far between--most of the coins located in catalogs have been of the "UNCish" variety. The 1913-D is only slightly more easily located. A choice specimen brought \$765 early this year at auction and retail sales have been reported in this same price area.

**SAN FRANCISCO ISSUES:** As with the Barber dime, the 1904-S appears to be the most under-valued S-mint Barber half dollar. Unfortunately auction records on truly choice specimens are virtually non-existent--but the current GB listing of a mere \$600 has been topped by teletype buying lists in the \$800-\$1000 range for well over a year. One major dealer has expressed to us his willingness to pay "at least \$1250" for a choice piece. Another very under-valued date in relation to the '77 GB price (which is barely above the common date listing at \$500) is the extremely scarce 1914-S. A thorough check of auction catalogs, selling lists and bourse tables indicates that this late date is offered no more often than such recognized scarcities as 1892-S, 1893-S, 1896-S and 1897-S.

The 1898-S and 1899-S issues have recent major auction records of \$1000 and \$1350 respectively--even though the '77 GB carries these at only \$485 and \$435. Neither can be located without considerable effort; teletype attempts to locate either date has netted only an occasional "super-slider".

The long recognized key dates are definitely elusive in top grade--1892-S, 1893-S, 1896-S and 1897-S--and even the latest GB listings in the \$540-\$600 range are often doubled when these dates are available at auction. These issues, however, along with two other well known scarcities--1892-O and 1897-O, are not "overlooked" in the general sense of the word. It is only that GB prices should be raised to the general level of trading for these scarce "key" dates. Other S mint issues to watch:

1913-S--very scarce, this date sold for \$150-\$200 when common dates were worth \$25! The latest GB price of \$525 was recently doubled with an auction sale of \$1050!

1894-S--not much more easily located than 1893-S or 1896-S, sales record to \$1000 for a "perm" (GB still a low \$500).

1902-S--this one seems to be more difficult to find than the more highly rated 1903-S, sales record to \$900 (GB \$525).

1904-S--considered by most a common date, this date is often one of the last several

to be located by date collectors--catalogs at a strictly common date level of \$460, sales registered as high as \$750.

1909-S--an auction record early this year is verified at \$1250 (GB is at a common \$460); teletype bids in the \$750-\$800 area have produced no results.

1911-S--another issue which should not be considered common in spite of the low GB price of \$475; sale records to \$750--and seldom seen.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$122.50 per ounce.

## BU ROLL SUMMARY FOR '76 THUS FAR

Several Proof Sets Edge Higher; Gold Commems Register Further Gains

### The Market in Depth

ALLEN HARRIMAN

With last week's issue the CDN concluded the three-part survey of undervalued BU Barber coinage. The reader response to this previously unpublished information has been extremely positive! Subscribers can look forward to further comprehensive studies—covering both BU and circulated coins in areas which still remain basically unexplored.

The "summer lull" is definitely evident on the teletype circuits. Vacations and plans for vacations always affect trading during late June, July and early August. The A.N.A. Convention in late August usually hails the beginning of a "new season" in trading. We are taking advantage of the current quiet market to discuss BU roll activity during the first half of '76. You will note that astute and selective buyers in January and February were in an excellent position to realize substantial profits in an area which is often thought of as less than rewarding! In next week's issue we will cover silver dollars (including opportunities in the Eisenhower series), proof sets and gold and silver commemoratives. By the way, in spite of the weakness in the price of gold bullion, choice specimens of the U.S. gold commems scored another round of gains again this week—with very few sellers being located.

**CENTS:** Trading in BU Lincoln rolls definitely remains in the "ho-hum" category. Current prices in relation to January levels are unchanged to 10%-15% higher in scattered instances (due to the April-May flurry of buying). The most impressive strength has been shown by the 1970-S "small date"—with a 55% gain (\$70 vs \$45). The scattered bidders on today's teletype circuits have little or no trouble locating the dates they need—although finding the quality they want is not always a simple matter. Bid, of course, is for choice BU rolls; the many inferior rolls on the market are worth considerably less.

**NICKELS:** Although buyer interest has remained moderate during the past six months, price changes have been minimal—with no particular date taking the lead (35-D singles in full strike MS-65 condition will fetch well over pro-rated roll price and the 37-P roll has regained a portion of its late '75 losses).

The best January buy in the Jefferson series has turned out to be the 50-P roll. This issue was available for \$25 at that time—reached a peak of \$50 (a 100% increase!)—and even after profit-taking still holds a 76% gain at the current bid of \$44. Other important gainers for the first half of '76: 38-D 34%, 42-P (11 22%, 42-S 25%, 46-S 55%, 48-S 30%, 49-P 35%, 49-D 45%, 51-D 30% and 52-D 35%. The remainder of the series range from unchanged to 10%-15% higher—again due to the April-May "push" in this and other series.

**DIMES:** Although the scarce mintmarked Mercury rolls in the '35-'40 group have fared well during the past half year (with gains in the 10%-15% range), the Philly rolls from these years have made considerably more impressive gains: 35-P up 42%, 36-P and 37-P both up 37%, 38-P up 28% and 39-P up 35%. The '41-'45 P-mints have only moved from \$100 to \$107 bid, but mintmarked rolls in the "short set" have scored gains in the 17%-20% range. Choice BU single sets 1934-45 have advanced \$50 during this period (\$345 vs \$295)—and frequent bidders still find strictly MS-65 sets very elusive.

Since the first of the year the BU roll set of Roosevelts have moved from \$2500 to \$3000 bid. Several individual rolls have proven excellent short-term investments for those fortunate enough to buy at the right time—among these are: 47-P 79%, 47-D 71%, 47-S 58%, 48-D 110% (!), 48-S 31%, 49-D 38%, 50-P 65%, 50-D 94% (!), 51-P 74%. The "popular" and volatile 55-PDS rolls, by the way, are virtually unchanged during this active period for the Roosevelt dimes.

**QUARTERS:** Since January the performance of Washington quarter rolls in general has been quite unimpressive—the '41-'64 BU roll set remains unchanged at \$6800. Unlike the Roosevelts and Franklins, this series usually falls short of "capturing the imagination" of investors (and, to some extent, collectors). The few rolls which have fared rather well are: 46-P (\$58 vs \$46), 46-S (\$115 vs \$84), 47-P (\$89 vs \$68), 47-S (\$97 vs \$83), 48-S (\$64 vs \$56), 50-P (\$72 vs \$59), 51-P (\$55 vs \$44) and 53-P (\$70 vs \$55). The "key" 32-D single has been the one big winner in the series; bid has moved from \$100 in January to its present \$550—a 37% increase in six months!

**HALVES:** The first half of '76 witnessed surprisingly little activity in W.L. rolls—price changes were mostly in the plus or minus 5% category. Two major exceptions were 1939-P & D—rolls which "came into their own" when the buying began. The 39-D gained an impressive 52% (\$760 vs \$500) and the 39-P registered an increase of 31% (\$720 vs \$550). Interest in the "short set" at current levels can best be termed "moderate"—led by the 46-P & D and 47-P & D rolls together with choice, well-struck S-mint issues from 1940 thru 1945 (the 46-S, by the way, is the easiest S-mint issue after 1939 to locate in fully struck condition). All but two (33-S & 38-D) of the scarce 1933-39 singles have slipped lower since January (unprecedented gains, of course, were recorded last fall). Topping the list is the 36-S with a loss of 48%—followed by 36-D and 37-S (both down 20%), 35-S down 18% and 37-D down 16%. Interest at present is light and the scattered buyers all seem to want only "exceptional" specimens.

The Franklin BU roll set has gained 14% since January—led by the following issues: 49-D up 38% (\$520 vs \$375), 49-S up 24% (\$900 vs \$725), 51-D up 32% (\$430 vs \$325), 52-D up 62% (\$94 vs \$58) and 54-S up 59% (\$107 vs \$67).

Current buyer interest centers around the common late dates—still wanted in bag quantities in the \$36-\$37 per roll range.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$122.30 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes)  
10% discount.

Advertising space is limited; ads  
will be placed in first possible  
edition.

1<sup>ST</sup>and Still

## SILVER DOLLAR PERFORMANCE FOR '76 Commem Buyers Concentrate On Gold Issues; BU Roll Market Mixed

**SILVER DOLLARS** The influx into the marketplace of part of the phenomenal hoard of silver dollars known as the "Redfield Collection" has been the greatest influence in this area of numismatics to come along in many years. With the release of the Redfield coins and subsequent retail ads and teletype trading by major dealers, silver dollars were divided into two categories--Redfield dates and non-Redfield dates. Not only have the dates which were included in the hoard moved ahead substantially due to strong bidding by some of the dealers involved in the initial distribution--but numerous other dates have advanced on the strength of the fact that they are NOT in the Redfield hoard.

It is a non-Redfield date which holds the record for top gainer in the Morgan series--the 1879-O roll has advanced 81% (from \$240 to \$435) since January. Strong interest in the P-mint rolls of the early 80's has resulted in the following gains: 80-P up 18% (\$226 vs \$190), 81-P up 32% (\$246 vs \$185), 82-P up 36% (\$226 vs \$165), 83-P only 7% (\$170 vs \$158) and 84-P up 17% (\$185 vs \$158). Other impressive advances by Morgan rolls include: 87-O up 47%--from \$230 to \$340, 91-P up a strong 70%--from \$440 to \$750, 97-P up 37% (\$225 vs \$185) and 98-P up 39% (\$230 vs \$165).

Non-Redfield O-mint singles in strictly MS-65 condition have registered several very substantial advances--among them are: 86-O--a 57% jump from \$105 to \$165, 89-O up 31% (\$42 vs \$32), 91-O up 26% (\$43 vs \$34) and 92-O very tough in full MS-65 with an advance of 53% (\$150 vs \$98). Some of the very tough New Orleans singles have also scored major gains: 93-O up 26% (\$825 vs \$650), 94-O up 41% (\$460 vs \$325), 95-O up 25% (\$2000 vs \$1600), 96-O up an impressive 69%--from \$215 to \$365 and 97-O up 48% (\$335 vs \$225).

The San Francisco Morgan issues which ARE part of the Redfield hoard have, as a result, also performed extremely well during the first half of '76--percentage gains for MS-65 singles include: 85-S 23%, 86-S 35%, 87-S 71%, 88-S 31%, 89-S 35%, 90-S 72%, 91-S 76%, 96-S 35%, 97-S 78%, 98-S 23%, 99-S 31%, 00-S 32%, 01-S 14%, 02-S 28% and 04-S 20%. Miscellaneous single dates which have recorded notable advances are 91-CC up 38% (the other CC issues have averaged gains in the 15% range), 92-P (up 66%) and 01-P (up 50%--from \$850 to \$1275 bid).

The Peace dollar series has scored consistent gains. The following prices and percentage increases, it must be stressed, are for strictly choice MS-65 specimens. Grading standards have become considerably more exacting during the past couple of years and, if anything, are becoming even more conservative. This is true across the entire market--but in no area is current demand for QUALITY more evident than silver dollars. The impressive gains, then, for strictly MS-65 Peace dollars are: 1921 up 27% (\$140 vs \$110), 22-D & S and 23-D & S up an average of 38% for full strike MS-65 pieces, 24-S--the biggest winner of ALL silver dollars with a gain of 111% (\$190 vs \$90), 25-S up 55% (\$90 vs \$58), 26-P up 55% (\$28 vs \$18), 26-D up 48% (\$40 vs \$27), 26-S up 90% (\$40 vs \$21), 27-P up 37% (\$62 vs \$45), 27-D up 46% (\$122 vs \$83), 27-S up 46% (\$190 vs \$130). The later issues easily enjoyed as much interest--with the 28-P up 27% (\$185 vs \$145), 28-S up 80% (\$155 vs \$86), 34-P up 33% (\$60 vs \$45), 34-D up 43% (\$95 vs \$66), the key 34-S is up 27%--from \$725 to \$925, 35-P up 31% (\$56 vs \$38) and 35-S up 55% (\$155 vs \$100).

**PROOF SETS:** Proof sets haven't fared very well during the past six months. A small percentage of the spring losses are currently being regained; buyers, however, are quite conservative when edging their bids higher--and none of the '50 to date sets can be termed elusive at the moment. The '36-'39 group is up slightly over January levels--an average gain of 5% for these four dates (with the most interest noted for the '38 issue). The '40-'42 group has performed considerably better than the earlier sets--up an average of 18% on the strength of the "in demand" proof Mercury dimes and Walking Liberty halves. These two singles, it should be mentioned, have each registered gains of 30% since January (\$65 vs \$50 for the dimes and \$130 vs \$100 for the halves).

In the '50-'55 group only the '53 set has remained unchanged since January (at \$34); the other five issues are all lower--ranging from 6% for the '55 flat pack to a loss of 16% for the '52 set. The '56-'64 later silver issues also range from unchanged ('56 and '58) to an average of 10% lower. The S-mint issues from '68 thru '75 have all registered even more substantial losses during the first half of 1976. Both the '68 and '69 sets are down about 16% and the '70-'74 sets have an averaged loss of 24%. Trading remains sluggish in this area and sellers continue to considerably outnumber buyers. The 1975-S six-piece proof set, on the other hand, has held up amazingly well in relation to the remainder of the San Francisco issues. The January bid was \$22.50 and this week's bid is \$20.50--a loss of only 8% for this still very popular issue.

**COMMEMORATIVES:** Most silver commemoratives have changed only a matter of five percent or so in one direction or the other since January; these small gains and losses have been about evenly divided. A few issues, however, have moved ahead notably: The Roanoke is up 31% (\$58 vs \$44), the '34 Boone has registered a 22% increase (\$54 vs \$44), interest in the '38-PDS Oregon set has moved the bid from \$120 to \$138 (up 15%), and the very tough Lafayette is up 12% since January (\$700 vs \$620). The Lafayette dollar, by the way, if located in true gem and fully-struck condition will easily fetch \$1000 or more; "gem" specimens of this issue remain on many dealer's "want lists".

Three groups of PDS sets have enjoyed the lion's share of attention during the first six months of '76. A "spring push" on the BTW and W-C sets led to the following gains--which are still in effect even after the obvious profit-taking of a few weeks ago:

BTW	JAN	JULY	GAIN	W-C	JAN	JULY	GAIN
1947	\$25	\$34	36%	1951	\$41	\$50	21%
1948	55	70	28%	1952	47	57	21%
1949	100	105	5%	1953	78	90	13%
1950	72	95	31%	1954	40	48	20%
1951	53	68	28%				

The Texas PDS are enjoying continued attention from one major Texas based dealer. The four sets currently stand as follows:

1935	\$110	\$135	22%	1937	\$132	\$177	34%
1936	125	153	22%	1938	265	335	26%

Single Texas "type" coins are now bid at \$40 (up 20% from the January level of \$32). This bid does NOT include the '34 issue--which is virtually unchanged since January.

The gold issues have been recording gains during recent weeks--and bidders are finding that choice pieces are now few and far between. The January bid for the complete eleven piece set was \$5250--this week's bid is \$6400 (an increase of 21% in six months).

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$113.00 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the price in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

## MAJOR CDN REVISIONS THIS WEEK

Considerably Increased Market Coverage Is Part Of Two-Phase Expansion Program!

### The Market in Depth

ALLEN HARRIMAN

Rather extensive format revisions---and considerably expanded market coverage---begin with this first issue of August. These latest additions, of course, are in line with the CDN's continuing policy of keeping up with ever-changing market conditions. Next week, by the way, we will present the "second stage" of our current expansion program---SUBSCRIBERS CAN LOOK FORWARD TO A TRULY EXCITING BONUS ISSUE---all details in the August 16th issue!

This week's "new look" includes increased space for weekly trading summaries and market comments. The "Early Singles" section previously found on this page has been moved to page two---just above the new position for the beginning of the regular BU roll price chart. In addition, an explanation and guide to roll pricing now heads this section of CDN coverage. Canadian prooflike sets (also previously located on the front page) have been moved to page six along with U.S. proof sets and mint sets.

An entirely new "AU" bid-ask column has been added to the "Circulated Key Date Singles" chart on page four. Most of these prices cannot be located elsewhere on a regular weekly basis---and, as BU prices advance to higher levels, these "AU" listings become more and more important. The section of this chart devoted to silver dollars has also been greatly expanded to cover all of the Morgan and Peace dollar issues which are currently receiving measurable attention---with this major addition subscribers have a complete picture of the entire dollar market (full MS-60, MS-65 and BU roll coverage remains on page six). By the way, the key 1869/8 Indian cent is another new addition to the circ key date listings.

The "Single Sets and Roll Sets" chart (also page four) has been considerably expanded. For Lincolns there is a new listing for the "memorial reverse" set---1959 to date and including both small dates and all S-mint proof issues. The Jefferson set is now divided into two listings---1938-64 and 1965 to date (again with all of the S-mint proofs). The same division has also been applied to the Roosevelt and Washingtons---with '65 to date with S-mint proof listings for both. Trading in these '65 to date "short sets" is becoming more frequent on the various teletype circuits. Morgan dollar sets in circ have been added---together with a very important new bid-ask listing for the Eisenhower dollar sets and roll sets. Common date circulated roll coverage now includes an additional six listings---take a thorough look at page four!

Page five "type" charts include three new issues. To the MS-60 and MS-65 uncirculated listings have been added both the Draped Bust "small eagle" half-dime (1796-97) and the 1796 quarter of the same design. These are, of course, extremely scarce issues---but dealers do occasionally ask for or list specimens for sale. A new addition to the circ chart is the very elusive 1796-97 Draped Bust half dollar with the "small eagle" reverse; this is another seldom encountered issue, but several dealers are currently in the market for nice circulated examples. Again, these are CDN "firsts"---up-to-the-minute prices for these issues are not available on a regular basis in any other publication!

Please note the new expanded explanation which now appears above the silver dollar charts on page six. Grading is becoming more and more conservative---and silver dollars have been affected by this trend toward conservation more than any other denomination. Many dollars which were considered by some of the most knowledgeable dealers as MS-65 five, three or even one year ago are now often considered MS-60 or MS-60+! Generally rolls are no longer just "original BU rolls"; more often than not current teletype buying requests are for "original full MS-65 rolls"---a very "tall order" in many instances! Specific bid-ask prices for most of the scarce to rare dollar rolls have not been listed for some time, better date rolls each speak for themselves---and should be priced on the basis of the quality of the individual coins in the particular roll. Price listings, therefore, for MS-60 and MS-65 singles can easily be used to determine roll prices for dates which a single bid-ask price spread would not apply. The more frequently traded rolls are listed, of course---as "average for the issue"; also listed are several more expensive rolls which are usually well-struck and which are still traded as "choice, original rolls" (the 1878 issues, 1882, 83, 84-CC, etc.) In many instances, however, dealers now tend to ask for the number of dollars they need and to specify the grade wanted (even though they often want "twenty pieces").

The Eisenhower dollar chart on page six now lists twenty-six separate dates---a rather extensive series to have begun only five years ago! Interest in "likes" is definitely evident on the teletype circuits and indications are that trading will continue to increase. Did you know that a complete set of Eisenhower dollars contains two more coins than a complete Peace dollar set!

The staff hopes that this week's many changes and additions will prove beneficial to all CDN readers---and remember with next week's issue an extra surprise is in store for all subscribers!

### This Week's Market

**CENTS and NICKELS:** Very little buyer interest noted in either group; sellers are rather numerous as many issues slip lower. An exception in the Lincoln series is the 1976-S proof only roll---bid has moved up to \$325 (a couple of sales have been recorded as high as \$340.) The relatively plentiful 1937-P Buffalo roll is listed in a lower \$245-\$265 range while both the 35-S and 36-S rolls have registered slight gains.

**DIMES:** Interest in choice MS-65 pre-1934 Mercury singles remains high---particularly for "full bands" specimens; the 1934-45 rolls are quite firm at current levels and the few sellers usually want "ask" or slightly more. Bids of \$345 for complete 1934-45 "short sets" are basically unsuccessful---except, perhaps, when a seller tries to sneak through a set with a few "sliders" (an AU 1935-D, for instance, quickly reduces the value of a set by about \$50!) The Roosevelt series is quiet---with a few minor changes noted; the widely scattered buyers are mostly "bargain-hunting".

**QUARTERS:** Better dates in the Standing Liberty quarter series are appearing on several major dealers' buying lists---virtually all bidders are in the market for "at least full MS-65 pieces with full heads". Current bids, for example, include \$1000 for the rare 1919-D, \$880 for the almost as elusive 1919-S, \$1500 for the still-overlooked 1927-S and an impressive \$12,500 for the 1918/17-S! (None of these has yet been located.) The Washingtons remain very quiet---practically any roll is easily located within present bid-ask ranges.

**HALVES:** In the Walking Liberty series, the 1939-P & D rolls again top "want lists"---this week with new bid levels of \$730 and \$790 respectively! Several buyers also are asking for rolls of the low-mintage 46-D---very few have been located. In the Franklin series, sellers outnumber buyers---prices edge lower for many of the high-powered issues. The "common" late dates, by the way, are also now included on numerous selling lists.

**DOLLARS:** Quite a number of issues (mostly Redfield dates) are carrying plus signs this week; although bidders usually ask for "one to five pieces" of each date, sellers of strictly MS-65 specimens seldom offer to supply even these few pieces. Common date Morgan dollar rolls slip back a bit---buyers in this area are also basically looking for below-market bargains.

**PROOF SETS and MINT SETS:** The 1936-42 sets are all on the plus side of the ledger---bidders want only choice sets at these higher prices (a large percentage of early issues have "problems" of one sort or another). By the way, this week's higher bids of \$67.50 and \$135 for full MS-65 Mercury and Walking Liberty proof singles are still just behind the bids for the entire sets---still, the strong bidder for these two singles doesn't want complete sets because, as he says, he has no market for the other three coins! In the later issues, buyer interest is evident for the '53, '54, '56, '58 and '60 issues (as well as continued demand for the '70 and '71 "S-less" sets), the '68-'72 issues are lower and available in quantity.

**COMMEMORATIVES:** Again a strong round of gains for the eleven gold commems; two major dealers continue to top each other's buying prices---very, very few choice pieces have been located. The silver issues remain relatively quiet---prices are lightly mixed (the Texas sets are strong as buying attempts continue).

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$112.60 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## NEW MONTHLY BONUS ISSUE INTRODUCED!

Separate Eight-Page Publication Covers Many New Areas Of Market Trading

### The Market in Depth

ALLEN HARRIMAN

The exciting new "bonus" we promised last week is enclosed with this second issue of August. As you can see, the entirely new "MONTHLY SUMMARY and Complete Series Pricing Guide" is a completely separate eight-page publication--one which gives the CDN staff an opportunity to report up-to-date bid-ask prices for many new areas of the market. All of the series which are covered by date in all grades are experiencing more and more collector and investor attention and the need for accurate dealer-to-dealer pricing has become increasingly evident in recent months. Of particular need are the bid-ask prices for the AU grade and the division of uncirculated prices into both MS-60 and MS-65! In this day of "quality conscious" buying, a price listing simply headed BU is far from adequate.

The expansion of our gold charts into XF/AU, MS-60 uncirculated and ch. BU MS-65 heralds another "first" in up-to-the-minute bid-ask pricing for these series. Although the gold bullion price is far from exciting at the moment, there is considerable interest in the scarce and rare dates in these late series and, again, the need for expanded and accurate coverage has been met through this new monthly CDN publication.

It should also be noted that the circulated roll prices which were previously found in the regular weekly CDN will now appear on page three of the "MONTHLY SUMMARY"--although trading in this area is generally light to moderate, price changes are hardly frequent enough to warrant inclusion on a weekly basis. The considerably expanded Circulated Key Date Singles" chart, on the other hand, will now appear on page four of every issue of the weekly CDN publication. Interest in this area is keen and prices changes are rather frequent and often substantial.

Our new publication also gives the CDN staff considerably more opportunity to present in-depth surveys of various other active areas of the market as well as timely articles of general interest which heretofore has been limited due to lack of space. We are pleased with the results of the research and effort which have gone into the preparation of this new monthly service to subscribers--and we hope that subscribers will find these entirely new eight pages of market coverage useful in their every day numismatic activities. The "MONTHLY SUMMARY and Complete Series Pricing Guide" will accompany the second CDN issue of each month and, of course, is to be sent to all subscribers free-of-charge!

Although price advances are scattered across the various charts--particularly for XF/AU commems, scattered BU rolls, a few MS-60 proofs and the key late date proof sets and mint sets--most of the mid-summer bidding continues to fall into the usual "bargain-hunting" category. Prices have been edging slightly lower here and there in both the uncirculated and circulated "type" charts--no trend is developing--just sellers who are attempting to move scattered type coins at slightly below the bid-ask levels which were established several months back. Numerous dealers are on vacation--and even more of their customers are out of town--which means that slightly lowered "ask" prices do not always result in immediate sales. This doesn't apply, however, to the more scarce circulated early material--or to exceptionally choice pieces--the tough material remains in demand whether "summer trading" is in effect or not!

### This Week's Market

**CENTS:** Bidding for the lower grade (Good thru VF) 1869/8 Indians has produced few if any results; this is a tough coin to locate--especially more than one or two occasional pieces at a time. A couple major teletype dealers are in the market for several rolls in the Lincoln series--at this week's slightly advanced bid levels only choice BU rolls are wanted. It should be remembered that many Lincoln rolls tend to be inferior in one way or another--and that such less-than-choice material usually brings less than the MS-65 roll prices.

1948S & 1949S - Bids move back up to \$18 and \$40 respectively  
1960P (sm) - Offers to pay \$110 now result in few transactions  
1975S & 1976S - These proof only rolls are strong again; bidders offer \$700 and \$330--and find rolls very difficult to locate

**NICKELS:** Prices remain nearly unchanged for BU rolls--exceptions are: 38-D (J) back up to \$155 bid, 43-D buyers will again pay \$70 and 44-S now bid at a slightly higher \$65; the losers include--42-P (2) now in the \$280-\$310 range and 52-D at \$52.50-\$56. The 1879-81 Shield nickels remain on numerous "want lists" (current dealer bids for Good specimens already range from 30% to 45% over the new '76 "Redbook" listings!)

**DIMES:** Proof S.L. "legend" half-dimes and dimes, as well as the 1873-74 "arrows" dimes, are wanted in MS 60 condition at higher levels. Mercury rolls remain firm--sellers continue to list the few available rolls at "ask". In the Roosevelt series, a few rolls are on buying lists at higher levels.

1948D - This roll can often be extremely elusive--bid moves up to \$83

1953P - Another tough date; buyers now offer \$50

1954S, 55P & D - Slight gains have been registered by these popular issues

**QUARTERS:** Locating properly graded specimens of the three key Barber quarters--96-S, 01-S and 13-S--can be a frustrating matter; the few pieces offered often tend to be over-graded or to have "problems". Washington rolls still create little excitement when offered for sale on the various teletype circuits; slightly lower prices have been registered by several dates in the early 50's.

**HALVES:** Another advance for the very scarce 1939-P W.L. roll--those bidders willing now to pay \$760 are still going empty-handed--the 1946-D roll also remains in hiding at current bid of \$365. Franklins remain in the lightly traded category--with a few more rolls edging lower (52-P, 53-D & S, 54-D and 58-P); an exception in this series is the 1951-P roll--which has moved ahead \$10 (after last week's loss) and which is now wanted in quantity.

**DOLLARS:** An "common date" Seated Liberty dollars (both versions) move ahead to \$215 bid--up \$15 over last week's levels. The problem in this area is that "cleaned up" XF's are often shipped as AU--buyers should check their purchases carefully. Morgan and Peace dollars remain unchanged (for a change). It should be noted that current buyers of MS-65 specimens are very fussy--the old MS-65 standards of a year or two ago are no longer applicable.

**PROOF SETS and MINT SETS:** Scattered gains--including higher bids of \$9.25 for the 73-S set, \$22 for the 75-S set and \$12.25 for the 76-S set (bidders will take rather substantial quantities. The two "key" mint sets are also up and in demand--1970 at \$15 and 1973 at \$13.75.

**COMMEMORATIVES:** One major teletype buyer is seriously in the market for XF/AU commems--and the bid level has been increased for thirty-four issues this week (probably a record in this area!). The BU silver commems are steady within present bid-ask ranges and the gold issues are still quite strong at last week's higher bids (the complete eleven piece set in choice MS-65/70 condition is bid at a slightly higher \$6650).

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$113.40 per ounce.

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a weekly  
basis. Under the present system, it is impossible  
to monitor all transactions or offers to buy and  
sell, but the broad information sources of the  
Newsletter make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the prices in the Newsletter  
are from dealer-to-dealer transactions. As an  
investor, you may place your buy and sell  
orders through a dealer for a fee, as you would  
buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads will  
be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## EXPECTED IKE DOLLAR UPSURGE BEGINS Gold Commems Score Another Impressive Round Of Gains!

### The Market in Depth

ALLEN HARRIMAN

Even though many teletype dealers have been preparing for the A.N.A. Convention, several have had time to get on the new "Eisenhower bandwagon"! Not only have the "bargain lots" of Ike issues all disappeared from the circuits, but in this one week the bid for complete twenty-six coin sets has advanced 13%—from \$85 to \$96. The BU and proof roll set is now unsuccessfully bid at \$1900! Led by the very elusive 1973-S 40% silver proof (up from \$17 to \$19.50 bid), virtually all of the S-mint BU and proof issues have moved ahead substantially—bidders topping each other's bids several times each day. Quantities are wanted and most sellers are quite content to remain on the sidelines!

This sudden and strong interest in the Eisenhower series, of course, is due to the virtual certainty that the series will end with the various Bicentennial coins—or with possible '77 issues. Until this announcement, very few dealers could muster even mild interest in the series—which, as was mentioned once before, already consists of two more coins than the Peace dollar set. Now the situation is different—Eisenhower dollars top numerous buying lists and this week's considerably advanced bid levels are meeting with only a minimum of success.

The usual "mid-summer doldrums" do not seem to have had much affect on prices for choice material at the auction presented by the Steve Ivy Numismatic Auctions in conjunction with the recent Missouri Numismatic Society Coin Show (St. Louis, August 13-14.) Compare some of the prices realized in the active floor and mail bidding with current teletype bids for the same type material in top condition.

An 1828 half-cent in "gem MS-65+" brought \$700 and an 1820 large cent described as "gem red/brown" (MS-60+) was knocked down by auctioneer George Bennett at \$400. Another "gem MS-65+" specimen—the scarce 1864 two-cent piece with small motto—sold for \$575. In the three-cent area, another scarce issue—an 1871 silver piece (again in "gem MS-65+" condition) also brought \$575 and a "gem proof" 1885 nickel version fetched \$425!

A common date Liberty nickel—1903—in an uncommon "MS-65+" grade went to the high bidder at \$137.50 (current bid for MS-65 specimens is only \$85). A very choice "MS-65+" 1831 Bust half-dime sold for an impressive \$725 and the tough 1850-O S.L. half-dime in the same ultimate grade reached \$1250! One of the very elusive fully struck 1926-D Buffalo nickels appeared on the block—and was awarded to the high bidder at \$710.

The buyer of the extremely scarce "full MS-65+" 1894-O Barber dime paid only \$600—a bargain price for this tough date. An 1896-S in the same condition, on the other hand, brought \$750 and the relatively easy 1902-O topped out at a strong \$325. A "gem MS-65+" 1942/41 Mercury dime (but not "full bands") went for a high \$2750! In quarters, another common date—1861—in a very uncommon "MS-70" grade sold for \$1200 (exactly double the current teletype bid for choice MS-65 specimens). Barber quarters in top grade were very strong—led by an "MS-70" 1902-O which brought \$660; other impressive prices for "choice MS-65+" Barber quarters include: 1907-O at \$475, 1908-S at \$950 and 1911-S at \$575! The rare 1927-S Standing Liberty quarter (MS-65+, "half head") realized \$1350—which is the current teletype bid level for the even rarer "full head" version.

Seated Liberty halves also enjoyed strong bidder interest—an "MS-70" 1843-O bringing \$1650 and the large mintage 1860-O in "MS-65+" reaching \$1050. A beautifully toned "MS-65+" specimen of the very rare 1878-S went to a successful bidder at \$8000—certainly a fair price for a coin of this rarity. The very low mintage and popular 1884 half described as "MS-70" sold for \$1100 (the 1879-91 halves continue to top records at auction after auction).

Following this strong action at the St. Louis show, dealers are looking forward to the up-coming Stacks auction which will be held in conjunction with next week's A.N.A. Convention in New York City!

### This Week's Market

**CENTS:** A few Lincoln rolls move higher on the strength of one dealer's attempt to locate choice rolls of these particular issues (37-P, 44-PS, 46-S, 48-S and 60-P sm). Still, selling lists, in general, far outnumber buying lists—and most dates can be located with little effort. Quantities of Good/better large cents are wanted at \$3.25 per; bidders seldom find more than a dozen or so pieces at a time.

**NICKELS:** Frequent attempts to locate circ key dates in the Liberty and Buffalo series are almost totally unsuccessful—very few dealers will part with such dates as 1855, 1886, 1913-S (2), 1918/17-D or 1937-D (3-legged) at current bid levels. These coins can occasionally be located—but most teletype dealers usually have retail customers ready and waiting. Scattered dates in the Jefferson series are available at slightly lowered ask levels; little interest is noted—losers include: 48-S, 49-PS, 51-S and 52-D.

**DIMES:** Circulated 1916-D Mercuries are very few and far between on the tapes—all grades from Good thru AU are on "want lists" at higher bid levels (see page four). Scattered sales of 1942/41 specimens have been recorded within current bid-ask ranges—but bidders will take far more than they have managed to locate so far. Nothing very exciting has been happening this week in either the Mercury

or Roosevelt roll area—prices are basically steady and trading has been rather light 1940S - Slightly lower—now in the \$190-\$210 range  
1951S - Also down a bit—choice rolls are available at \$260

**QUARTERS:** Also very little to report for the Washington rolls; minor increases have been noted for a few dates which are on current buying lists (43-P, 45-PS, 48-PS, 52-P)—while the 51-D roll is slightly lower and the often popular 55-D roll is offered for sale in quantity around \$90. Frequent attempts to buy the key 16-P and 18/17-S quarters in any grade are almost always unsuccessful.

**HALVES:** The higher grade circ 1921-P & D halves are proving to be extremely elusive to higher bidders—now offering \$290 and \$600 for the Philly issue and \$375 and \$700 for the Denver coin in XF and AU grades. Two minor losses for the Walking Liberty rolls (45-D now \$310-\$340 and 46-S now \$375-\$405); three lower ask prices have been noted for the Franklins (48-D and 49-D & S) and one higher—\$100 again bid for the 51-P.

**DOLLARS:** Numerous issues in both the Morgan and Peace series have registered gains after last week's lull—including several "Redfield dates" which are again on a couple of major dealers' buying lists. The 1889-97 O-mints (mostly non-Redfield) are in particular demand; these dates are almost all very tough in fully struck MS-65 condition—choice pieces are seldom available on any of the teletype circuits.

1892O - Easily located in MS-60/60+ condition—but bids of \$155 fail to produce fully struck MS-65 specimens

1894O - No choice specimens offered to higher bids of \$475

1897O - This one has caught up with the 96-O—both are now bid at \$365 in MS-65

**PROOF SETS and MINT SETS:** Last week's indication of new strength in this area continues—with more bidders entering the market. The early 1936-42 issues are all wanted "at bid" (small gains noted for the '37 and '40 sets); the "S-less" issues are enjoying considerable attention from one very strong teletype buyer—now offering \$6000 for the rare 1968-S version plus \$550 and \$850 for the 1970-S and 1971-S issues respectively. Particular interest is also noted for:

1954 - Wanted in quantity at a higher \$18.50

1956 & 1958 - Bidders will take "up to 100 sets each" at \$9.75 each

**COMMEMORATIVES:** Bargain-hunting dominates activity in the BU silver commems—quite a number of issues edge slightly lower as buyers manage to keep their bids just below current levels (exceptions: Cincinnati type, 1938-PDS Oregon set and the '36, '37 and '38 Texas PDS sets). The gold issues, in contrast, are wanted now by even more dealers—all eleven have recorded further gains and the complete MS-65/70 set is bid this week at \$6900 (up \$250). One or two buyers are also interested in circ specimens—at the following bids:

	VF	XF/AU		VF	XF/AU
'03 La-Pur/Jeff	\$ 85	\$140	'16 McKin	\$ 75	\$105
'03 La-Pur/McK	85	140	'17 McKin	85	125

**THE COIN DEALER NEWSLETTER**  
reports the national coin market on a weekly  
basis. Under the present system, it is impossible  
to monitor all transactions or offers to buy and  
sell, but the broad information sources of the  
Newsletter make it a very accurate reflection of  
the market.

**INVESTORS NOTE:** the prices in the Newsletter  
are from dealer-to-dealer transactions. As an  
investor, you may place your buy and sell  
orders through a dealer for a fee, as you would  
buy stock through a broker.

**ADVERTISING RATES:**

\$10.00 per column inch, four  
consecutive ads (no changes)  
10% discount.

Advertising space is limited, ads will  
be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## MARKET CLOSING PRICES \* Refer to "Early Singles" above BU ROLLS

## CONGRATULATIONS TO THE '76 A.N.A. Collectors And Dealers Search Bourse Tables For Choice Material

### The Market in Depth

ALLEN HARRIMAN

Many dealers have descended upon the '76 A.N.A. Convention armed with extensive "want lists"—generally they are in search of the top quality material which is currently in such strong demand across the country. Of course, as usual, truly choice early type coins attract considerable attention when offered for sale. But, in addition, specific dates in the three Barber series and all of the various twentieth-century series have been topping numerous teletype buying lists—many of these same bidders are now searching A.N.A. bourse tables for the coins they have not been successful in locating with frequent bidding and higher bid levels. Recent auction results for exceptional pieces and choice examples of scarce dates continue to highlight the fact that serious collector/investors want quality and that they are willing to pay for it—even "common dates" in gem MS-65+ condition have been setting records in auction after auction.

One series which has been mentioned in previous CDN issues as definitely under-rated is Standing Liberty quarters—particularly specimens in the ultimate MS-65/better "full head" condition. Certainly serious collectors of this beautiful, relatively short-lived series have known for many years that several dates are extremely scarce in top condition—and that a few border on the "rare" category. Many dealers, of course, are and have been aware of the "tough dates" in the Standing Liberty quarter series. However, it has taken just a few new serious collectors to emphasize just how thin is the available supply of choice specimens—even demand for just two or three choice pieces of a particular date can push bid prices into considerably higher ranges. As an example, take a coin which has been previously discussed as extremely scarce in MS-65 "full head" condition—the 1919-D. This issue was bid at \$675 in January '76—moved to \$900 two weeks ago when the first issue of the new CDN "Monthly Summary" was released—and has now advanced to \$1100! This is an increase of 62% in the bid level in less than eight months—and yet not a single strictly "full head" specimen has been listed for sale on the teletype circuits at any price! (This coin is probably just as rare as the 1919-D half dollar in top condition—and the half in "ch MS-65" condition just realized \$2800 at auction.) Another issue which has always been recognized as "scarce"—but which has never really "come into its own"—is the very low mintage (396,000) 1927-S. However, the recent auction record of \$1350 for a choice MS-65+ (but not "full head") may change all this. The current teletype bid for "full head" specimens has now advanced to \$1500—and chances are that even higher bids will produce the same results—no sales!

There are numerous other dates in the Standing Liberty quarter series which have a long way to go—in fact, virtually all of the pre-1925 mintmarked "type two" issues are very elusive in strictly choice "full head" condition (including even the relatively large mintage 1917-D & S, 1918-S and 1920-S issues). And, of course, all of the later (1926-29) Denver issues seem to elude almost all of these bidders who want only the ultimate in quality.

Several major teletype bidders have also been quite determined to locate most of the pre-1934 Mercury dimes—again in top MS-65/better grade with "full bands". In this area, also, offering to pay bid prices as recorded in the CDN "Monthly Summary" (see the August edition) has produced only widely scattered results. Actually, "full bands" Mercury dimes are not nearly as scarce as "full head" S.L. quarters—yet there are several issues which are still considerably more difficult to locate than current bid "premiums" would indicate. Among the toughest are: 1918-D, 1919-S, 1920-D & S, 1925-D and 1926-D. And, probably topping the entire list is a most unlikely date—the common 1945-P. Although actual records are quite sketchy, it is generally assumed by those who have specialized in Mercury dimes that no more than a dozen 45-P's with fully separated and rounded bands are known! At least one dealer has a standing buy order at \$150 for exceptional examples! Of course, there are probably many "unsearched" rolls of this common date still around. One dealer, however, recently sold an original bag of this date—without having found even a single fully struck piece among the 5,000 coins!

Another series which now seems to be receiving more thorough attention is Buffalo nickels. Still more vastly under-rated twentieth-century issues are to be found in this series. There are many dates for which collectors have often settled for "second best" in past years—but which are now wanted in fully-struck MS-65/better grade. As with the Standing Liberty quarters, even a moderate amount of bidding for the really tough dates can advance bid levels substantially. Issues which range from scarce to rare in top condition (with full details on the Indian's braid, sharp LIBERTY, all details on the Buffalo's shoulder and a "forked tail") are: 1913-S (both I & II), 1916-S, 1917-S, 1918-PDS, 1919-DS, 1920-DS, 1923-S, 1924-D, 1925-D, 1926-DS, 1927-D, 1928-D, 1929-D, 1934-D and 1935-D. This is, of course, quite a list—but, as any one who seriously collects Buffalo nickels can tell you, putting a truly choice set together can take a lot of searching—and a number of years!

### This Week's Market

**CENTS:** All of the key and semi-key Indians are wanted in the lower grades—wanted in quantity; bidders seldom locate more than a few mixed date singles. The key 1877, by the way, has advanced once again—bid now at \$105 for full Good specimens and at \$120 for full VG's. Prices for BU rolls remain unchanged—major bidders in this area are attending the A.N.A. Convention.

**NICKELS:** Except for frequent attempts to find choice fully struck 1934 D and 1935-D singles, interest in the "short set" Buffalo issues is more or less at a stand still; very few rolls are offered for sale, however—and ask prices are firm at current levels. The Jeffersons, too, have remained quiet this past week—with a few small

losses recorded (particularly for the late date "proof only" S-mint issues).

**DIMES:** Thd 1942/41 Mercuries have now followed the lead of the key 1916-D—with gains registered this week for all grades from Good thru AU (see page four); bidders want quantities—especially of the lower grades. Late date P-mint Merc rolls edge just a bit lower—into the \$105-\$111.50 range; the mintmarked rolls are unchanged although trading has been quite limited in recent weeks.

1938S - Bid moves unsuccessfully to \$475—now rarely seen by the roll

1950S - Slightly lower—now in the \$320-\$350 range

**QUARTERS:** Except for mild interest—mostly bargain-hunting—in the pre-1941 Washingtons, there is little to report from this week's very light trading. Buyers, of course, are still anxious to acquire choice 1932-D's—but this is usually the one that is missing from the occasional selling list.

**HALVES:** One or two teletype buyers are in the market for fully struck MS-65/better S-mint W.L. singles from the "short set" years. Recognizing that "original rolls" of these issues are usually weak to "average" strikes, these astute bidders are now offering to pay well over the pro-rated bid prices for coins which fill their requirements. Bids for top quality singles have recently been monitored in the following ranges:

1941-S \$75 - \$85      1943-S \$20 - \$23      1945-S \$18 - \$21

1942-S \$40 - \$45      1944-S \$20 - \$23      1946-S \$20 - \$23

These prices, thus far, have not produced many sales—dealers most likely have retail customers for all truly choice S-mint halves. The Philly and Denver rolls, in general, are usually well struck—so completing a top quality "short set" is primarily a problem of locating the San Francisco coins.

**DOLLARS:** Interest in the Eisenhower series remains strong after last week's upsurge. Although price advances have been more cautious this week, several issues are again sporting plus signs; topping "want lists" is the 1976-S Type One clad proof roll (from the 75-S six piece proof set)—up from \$50 two weeks ago to this week's bid of \$72.50 (a 45% gain). The Morgan and Peace series are quiet—again probably due to the fact that major buyers in this area are attending the A.N.A.

**PROOF SETS and MINT SETS:** Again the "S-less" issues have recorded gains—bid is now \$570 for the '70 version and \$885 for the '71 issue. The same bidder has now offered to pay \$6200 for a strictly "gem" 1968-S set with the "Philly" dime! The '36-'38 sets advance slightly and interest in all of the sets thru 1942 remains quite evident.

**COMMEMORATIVES:** Continued strong attempts to buy choice gold commems was still meeting with little success as dealers left their teletype machines for New York City and the A.N.A. Convention; bourse table price tags will in all likelihood have kept up with recent rapid advances. In the silver series, the 1938-PDS Oregon set is wanted by several bidders—at a higher \$147.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$103.50 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

### ADVERTISING RATES:

\$10.00 per column inch; four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## WIDESPREAD PRICE LOWERING FOR BU ROLLS Price Cuts Also Affect Virtually All Silver Commemoratives

### The Market in Depth

ALLEN HARRIMAN

As the extremely crowded and largely successful '76 A.N.A. Convention drew to a close, the main complaint of many dealers was that there wasn't sufficient "gem MS-65+" material for sale—at least, not at prices reasonable enough for resale "back home!" Most of those "want lists" which were enthusiastically taken to New York City were only partially filled—many of the truly choice coins on bourse tables carried price tags, as one dealer said, "of the 1980's". Specimens which "just missed", on the other hand, were rather plentiful and were not selling well except when priced at levels commensurate with current teletype bid-ask ranges. More extensive comments regarding this year's major convention event will appear in next week's second issue of the new CDN "Monthly Summary and Complete Series Pricing Guide!"

Meanwhile, back at their teletype machines a few dealers were busy lowering ask prices for BU rolls—and for virtually all of the silver commemoratives. One major roll dealer, in particular, seemed to be well stocked in rolls and was offering a very wide range of dates in all series from Lincoln cents thru Franklin halves. Many of the dates listed for sale are available in ten roll lots—and numerous late date Lincolns and Jeffersons are being offered in bag or multi-bag quantities. The only series not affected to any extent are the Buffalo nickels, Mercury dimes and Walking Liberty halves.

In the past, this sort of "across the board" price lowering has usually resulted in very few transactions. The approach of most dealers who see such lengthy selling lists is simply to lower their bids correspondingly—assuming that such general price cutting will not be a one-week phenomenon. Even though dealers and investors may well be interested in many of the issues offered, they seldom buy immediately—expecting (often rightly so) a further lowering of prices within another week or so. Of course, if they are wrong an excellent opportunity has been missed. (It's sort of like trying to "pick the bottom" in the price of gold bullion.)

And why does a dealer (or dealers) suddenly decide to lower so many prices in a single stroke? Overstocked?—perhaps. However, knowledgeable roll dealers are certainly aware that such a general price lowering often encourages other dealers with a smaller stock of rolls to follow along and lower their prices. Thus the value of everyone's inventory is reduced—and very few rolls have been sold! The number of "telephone transactions" at a further discount after such a rash of minus signs is, of course, unrecorded—but in previous instances the volume has often been substantial. Whether price lowering will continue for another week—or weeks—is, at this point, only a matter of conjecture. Readers can be certain, however, that a number of interested dealers and investors will be watching the action closely! There are many who have quite an interest in this area of the market and who are not involved in the current price cutting.

Following right along with this week's lower prices for BU rolls is an almost complete run of minus signs across the silver commem chart. Several dealers began by offering small lots "at bid plus postage"—then a major teletype dealer (who specializes, among other things, in commems) entered the market with a complete list of both buying and selling prices for all but a very few of the 144 issues. Checking the page two chart it is needless to say that the selling prices were substantially lower than previous levels. This particular dealer's buying prices, by the way, could certainly be considered in the "bargain hunting" category. Again, most potential buyers seem to be in no hurry. The feeling of at least a few dealers is that this sudden drop in commem prices might well precede another major "push." Opinions vary as to the possible timing—whether prices will continue to edge lower for one or two weeks more—and whether "below market" buying has already begun. One thing is certain—commems are popular and are "good sellers" on the retail level. Readers can be sure that numerous dealers will also be keeping an eye on this new situation!

### This Week's Market

**CENTS:** With scattered exceptions the entire '34 to date Lincoln series seems to be for sale at somewhat lowered price levels. In general, interest in BU Lincoln rolls is at a standstill—with buyers occasionally picking up a roll or two for their customers or to fill gaps in store stock inventories. In contrast, gem MS-65/70 specimens of the early dates do create interest when offered; such choice pieces, however, are seldom available—and when listed for sale usually carry price tags well in excess of current Redbook listings.

**NICKELS:** Basically the Buffalo rolls have escaped this week's lowering of BU roll prices—only the 1937-S and 1938-D issues have been offered at slightly lower levels (the '34-'36 rolls still aren't easily located). The Jefferson series, on the other hand, has also fallen victim to extensive selling lists—with about 85% of the '38 to date rolls registering lower ask levels. Again buyers remain on the sidelines.

**DIMES:** None of the Mercury rolls have been included in this week's rather extensive offering of BU rolls—at least, not at lowered price levels. Continued efforts to locate choice MS-65 "full bands" early singles are meeting with very little success (bid levels in the new CDN "Monthly Summary" are beginning to be topped—a new report is scheduled to accompany next week's Sept. 10 issue). Most of the Roosevelts, it must be added, are reflecting lower ask levels; prices have moved lower for twenty-one individual rolls in the '46-'55 group—and, again, buyers take only the occasional date that they need for specific orders.

**QUARTERS:** Although not as extensively affected as the three smaller denominations, numerous Washington rolls are also appearing on selling lists at lower levels—with most potential buyers assuming the same "wait and see" attitude. A lone exception is the rather tough 1939-P roll—up again this week at \$270 bid (few rolls have been offered to one very persistent bidder); also on the plus side of the ledger are choice 1935-S and 1936-S singles—both now bid at \$50 each. By the way, the key 1913-S Barber is wanted in all grades at higher bid prices—check page four!

**HALVES:** Changes for the lightly traded Walking Liberty rolls are minimal. The late common date P-mint rolls are slightly lower—in the \$240-\$260 range; small gains have been recorded for the still very elusive 1939-D roll (bidders now offer \$800) and the rather scarce 1946-P roll (up \$5 at \$265 bid). Quite a number of Franklin rolls have also been listed for sale at somewhat lowered prices; sales of the later dates ('56-'63) have been moderate—while lower price tags for the more high-powered earlier rolls aren't generating much excitement.

**DOLLARS:** The 1972, 1973 and 1974 S-mint "brown" Ikes (40% silver proofs) register substantial gains—buyers will take "up to one hundred of each". Dealers will also take quantities of the relatively large mintage 1971-S proofs—but in this case they are sticking with the current bid level. Bid, by the way, for the complete 26-coin Eisenhower set is now \$94—an advance of 11% since August 1st! Both the Morgan and Peace dollar series are unusually quiet—the 1882, 83, 84-CC and 1935-S issues are slightly lower and one very fussy bidder is offering to pay "above bid" (\$105) for fully struck gem 1925-S specimens (a very scarce coin in this ultimate condition).

**PROOF SETS and MINT SETS:** Still further advances for the three "S-less" sets: 1968—bid now \$6,400 (up \$400!); 1970—bid \$590; 1971—bid \$900. Otherwise, changes are few and minor. The 1976-S six-piece set occasionally trades in small lots in the \$12 area and the 1975-S version eludes most bidders at the current \$22.

**COMMEMORATIVES:** Exceptions to this week's very thorough rash of minus signs are: 1936-S Oregon—bid at \$87 (up \$7); 1938-PDS Oregon set—still on the move at \$150 bid; both the 1937 and 1938 Texas sets (up \$5 each). The gold issues are firm at recently attained levels—few choice specimens are encountered on the teletype circuits.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$104.70 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## PRICE LOWERING SLOWS FOR BU ROLLS

Silver Commems Continue Downward Trend; Type Coins Wanted At Current Levels

### The Market in Depth

ALLEN HARRIMAN

The BU roll market--along with silver commemoratives--continued to reflect lower prices this week. Minus signs, however, were not as general as during last week's trading. Several dealers were sticking with previous ask levels or were simply not running the extensive selling lists which dominated the teletype circuits immediately after the A.N.A. convention. Those dealers who continued to lower prices (particularly in the Jefferson nickel series) were finding that buyers were still extremely difficult to locate. The very few bidders for BU rolls who were at their teletype machines had interest in only scattered dates in the various series--and, generally, were willing to pay only prices well below even recently reduced levels. It is known that at least a few astute dealers are taking at least partial advantage of the "phone offerings" they have been receiving as a result of this slump in the BU roll market. It is when a sudden rash of minus signs occurs that many holders of quantities of rolls decide to sell--at the very time that they will receive the lowest offers!

To some extent this same attitude currently prevails in the silver commemorative market--although "bargain hunters" aren't quite as conservative when offering to buy. The actual available supply of choice commems isn't nearly as large as BU rolls and the "ready market" is stronger. What would be considered a large offering of commems--in a dollar amount--would not be a particularly impressive hoard of BU rolls. When truly looking for bargains, dealers might tend to offer 30% less than bid in a weak market for a large hoard of rolls--whereas a relatively impressive quantity of commems would probably elicit bids in the "10%-15% off" range. Whether sellers accept these well-below-market offers or not depends, usually, upon their concern with the overall tone of the market. Price cutting in specific areas such as is being experienced at the moment is nothing new--and such periods in the market have always in the past utilized to advantage by knowledgeable dealers and investors.

Having returned from the A.N.A. with a somewhat depleted stock, one major dealer who specializes in "type" has spent the past few days offering to "pay bid" for all properly graded MS-60 and MS-65 type coins. In spite of the fact that advances in this area have been quite limited during the past several weeks, sellers remain few and far between. These recent attempts to buy at present levels have proven rather unsuccessful. It should be mentioned that the current bidder--as well as nearly all type coin buyers--are quite exacting in their grading requirements and that coins which "barely miss" are quickly returned to the sender. Strictly graded material, on the other hand, definitely finds a home just as quickly!

### This Week's Market

**CENTS:** Only scattered roll prices have been lowered after last week's exceptional number of lower levels. Buying is more or less at a standstill as dealers continue to exhibit a "wait and see" attitude toward the entire BU roll market. The 1947-S roll is bucking the trend with a slightly higher bid of \$21.

**NICKELS:** The Jefferson series remains in a very weak position--minus signs again pepper the chart and buyers definitely are on the sidelines. The '38-'64 BU roll set is now recorded in a lower \$3800-\$4150 range; strictly choice single sets still occasionally reflect bids of \$100--but buyers are extremely fussy! Both the 37-S and 38-D Buffalo rolls have edged lower again thisweek (one eight roll lot of the '38-D's was available).

**DIMES:** The previously mentioned rare 1945-P "full bands" Mercury dime has received bids of \$175 per coin this week!--not a single piece has been located which fits the bidder's exacting requirements. Far fewer prices have been lowered in the Roosevelt series; buyers, however, are very cautious and the little bidding noted was certainly in the "bargain hunting" category!

**QUARTERS:** The very scarce choice MS-65/better 1932-D quarter is receiving frequent bids of \$565--with no truly nice specimens available on any of the various teletype circuits. A year ago this coin was bid at \$375; this is a 50% gain in twelve months--not a bad investment for those lucky enough to have located a specimen or two in the \$375 area! Price cutting has almost completely skipped the Washington rolls this week--only the 40-S, 41-P and 58-P issues carry minus signs. As with the entire BU roll market, however, bidders are very few and far between--and are less than generous with their bids.

**HALVES:** As last week, the Walking Liberty rolls have remained steady in the face of widespread lowering of prices. Several Franklin issues--mostly earlier more expensive rolls--are again offered at lower levels; the '48-'63 BU roll set is now registered in the \$4900-\$5250 range--single sets at \$255-\$275. Several dealers are in the market for nice circulated examples of the low mintage 1839-O half dollar--the following bids are generally ineffective: VG \$55, Fine \$85, VF \$120, XF \$150.

**DOLLARS:** Most of the "Redfield" dollars are now on the market at somewhat lower prices; the "dollar buyers" of recent months are noticeably absent from the teletype circuits. The 1976-S "type one" clad proof Eisenhower dollar roll is appearing on several buying lists--bids of \$72.50 are producing no results. Demand for this coin makes the 1975-S six-piece proof set doubly desirable--now buyers want not only the "proof only" Lincoln but the "type one" proof dollar (also only available from the 75-S set).

**PROOF SETS and MINT SETS:** Increased interest is evident for the 1953, the 1956-59 and the 1960 "small date" sets--bidders want relatively large quantities of these very reasonably priced issues. The three "S-less" sets continue their upward swing--courtesy of one strong teletype buyer. The 1976-S six-piece set is a bit strong--bidders will again take "one or two hundred" sets at \$12.

**COMMEMORATIVES:** Many of the silver issues are again victims of price lowering. Numerous dealers will buy choice commems--however, in light of current price patterns, they are definitely expecting to pay only bargain prices (hoping to have built up a sizeable stock by the time the "turn around" begins; they're not trying to "pick the bottom" by paying any dealer's current ask prices.)

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$111.90 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## IKE DOLLARS SCORE STRONG GAINS Silver Commems Are Mixed; BU Rolls Suffer Further Price Cutting

### The Market in Depth

ALLEN HARRIMAN

Although the selling pressure on silver commems has been somewhat alleviated by a few rather selective buyers issues entering the market, the BU roll market hasn't been as lucky. Buyers of BU rolls are nowhere to be seen--and, as a result, this week's further widespread price lowering has resulted in very, very few transactions. It seems rather obvious, of course, that as long as dealers continue to make substantial reductions in their ask prices, buyers will remain out of sight. And to compound the present situation, more dealers are now running selling lists--often quite extensive--on the various teletype circuits.

It is interesting to note that only a few months ago bid levels for BU rolls were experiencing a strong upswing and locating many issues was a rather difficult task. Now there are sellers of these very same dates--in quantity--at considerably lower prices than buyers were willing to pay a few months ago. Where were these rolls--and these sellers--then? As an example, not too many weeks ago several dealers were anxious to buy BU rolls of 1950-P nickels--and they were paying over \$50 for the few rolls they managed to find. Today sellers are willing to part with rolls at \$37--and no buyers are to be found. Now, of course, the holders of 1950-P nickels (and numerous other dates which were "hot" a few months back) are probably wondering why they waited--and subsequently "missed the top".

One area of the roll market is definitely bucking the trend. Many strong buyers want quantities of Eisenhower dollars. But, of course, this is the one area in which rolls are not being offered! The price chart (on page six) is peppered with plus signs this week--and several major dealers are attempting to top each other's daily bid levels. The 1973-S 40% silver proof is the "key" to this twenty-six coin set with a mintage of slightly over one million. Bids for this coin have moved from last week's \$20.50 to \$23.25 this week--and still only a few pieces have changed hands. Also coming into its own is the 1974-S version (with a mintage of 1.3 million)--the bid has moved this week to \$9 and sales were recorded as high as \$9.50. The entire roll set of twenty-six issues is now receiving frequent bids of \$2050 (single sets - \$102.50)--with no sellers on the horizon! Many dealers and investors feel that this series--destined apparently to be a short-lived one--still has a "long way to go". Retail sales are already reported to be brisk and when the series is definitely ended dealers expect even stronger investor and collection market.

One teletype dealer recently ran a buying list for several "gem BU full struck" Mercury dimes. Requirements were that all coins must have "100% full bands and strike"--and the bidder admitted that he is a "fussy buyer". The following bids speak for themselves and again show that dealers are willing to pay for quality. In most cases, these bids are well in excess of the levels for "MS-65 full bands" specimens which are reflected in the latest CDN MONTHLY SUMMARY (September issue)--and yet, in spite of these impressive bids, few if any true "gems" have been offered to the bidder:

1916-D	\$2300	1923-S	\$ 250	1927-D	\$425
1918-D	155	1924-S	250	1927-S	400
1918-S	150	1925-S	325	1929-S	75
1919-S	325	1926-D	200	1930-S	190
1920-S	145	1926-S	1000	1931-S	175
				1945-P	175

### This Week's Market

**CENTS:** After last week's lull, prices have again been extensively lowered for BU rolls. More dealers are now running selling lists; many dates are available in quantity. To be expected, virtually all buyers are still waiting on the sidelines. The '34-'58 BU roll set is now registered in the \$1675-\$1850 range--with single sets at \$36.50-\$40--other roll sets are down proportionately.

**NICKELS:** The 1938-54 Jeffersons are again battered by an almost complete run of minus signs. As with the Lineolns more sellers have entered the arena--and potential buyers have ample reason to assume a "wait and see" attitude. Two teletype buyers have already topped the bid prices for 1884 and 1885 three-cent nickel pieces which were recorded in last week's MONTHLY SUMMARY--perhaps the following changes should be noted in your copy:

	G	VG	F	VF	XF	AU
1884	\$40	\$45	\$60	\$72	\$ 90	\$115
1885	50	55	67	87	100	135

**DIMES:** Again the Mercury rolls have managed to avoid price cutting; the Roosevelt, however, haven't fared as well--practically all issues are now for sale at lower levels. The '46-'64 BU roll set is now in the \$2700-\$2950 range--with single sets pegged at \$56-\$60. Dealers continue to run frequent teletype "want lists" for circ specimens of the low mintage 1863-67 S.L. dimes and half dimes--none have been offered to bidders (not even to those who simply ask for "quotes" rather than listing specific buy prices.)

**QUARTERS:** Several more Washington rolls have joined the selling parade--numerous issues in the '46-'55 group are now being offered to a largely disinterested teletype audience. The '41-'64 BU roll set is lower at \$6500-\$6900--with single sets now in the \$165-\$177.50 range. As with the low mintage dimes and half dimes, bidders are finding that virtually no circulated 1879-90 quarters are available (circ examples of 1864-70 are also extremely elusive).

**HALVES:** Three Walking Liberty rolls seem fairly plentiful at the moment--the 36-P is offered now at \$455, the 45-D at \$310 and the 46-D at \$350; the remainder of the series is unchanged. All Franklins, on the other hand, are being included on lengthy selling lists--nearly all at lower prices. The '48-'63 BU roll set is registered this week in the \$4750-\$5100 range--single sets at \$250-\$270.

**DOLLARS:** Last week's lowered prices for many of the "Redfield" dollars has resulted in at least one major dealer's "support of the market"--offers to buy all of these dates at last week's bid levels are now being monitored on all of the teletype circuits. Again it should be pointed out that this buyer (as well as most other) wants top quality MS-65 material only! General interest in a number of the non-Redfield issues is also evident (86-O, 96-O, 97-O for example)--bidders, however, are sticking to current levels. See "The Market in Depth" for details on the Eisenhower dollar upswing.

**PROOF SETS and MINT SETS:** Buyers still want the '56-'60 sets--but bid prices are unchanged this week and several transactions have been registered at current levels. The one major buyer of "S-less" sets has again raised bids for all three issues--with sellers very seldom supplying even a single set. The 76-S six-piece set is frequently traded in the \$11.75-\$12.50 range.

**COMMEMORATIVES:** Quite a number of plusses have joined still more minus signs this week as the silver issues begin to adjust to the recent downward trend. The gains have been recorded for "type" issues while the losses (with a few exceptions) are for PDS sets. The gold issues reflect only minor changes--buyers still are in the market for truly choice examples.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$111.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## BU ROLL PRICE CUTTING SLOW (AGAIN)

### Eisenhower Dollars Continue Upswing; Silver Commems Reflect Numerous Gains

## The Market in Depth

ALLEN HARRIMAN

Although there is yet another fairly liberal scattering of minus signs across the charts this week, the overall tone of the BU roll market seems somewhat improved. First, fewer issues in all series have been offered for sale at lower prices--and smaller quantities have been included on this week's selling lists. Second, several dealers have begun to run teletype buying lists for selected dates. Most bid prices are still in bargain hunting ranges, of course--but for specific dates wanted by their investors some dealers were offering to "pay bid" this week. This is definitely a welcome change from the "hands off" attitude of practically all buyers during the past month or so. It remains to be seen whether this week is a mere lull in price cutting storm--or if this leveling trend will result in normal trading within the next few weeks. Another new influx of rolls into the marketplace would have to be handled very professionally at this stage--simply buying a large quantity of rolls at well below market and then offering to sell at lower--and then still lower--prices would not result in many sales and would again cause widespread selling (probably at even lower prices) among most teletype dealers. At this point, all but a few dealers have either stopped lowering their ask prices or have removed BU rolls from their selling lists.

Interest in circulated key date singles has been very strong--and prices have been advancing in a steady and orderly manner--for many months now. Dealers continue to scour bourse tables at every coin show in search of virtually all of the dates listed on the page four charts--and they run lengthy and frequent buying lists on all of the numerous teletype circuits. High on "want lists", of course, are 1869/8 and 1877 Indians, 1922-Plain Lincolns, the 1879-81 Shield nickels plus the 1885 Liberty nickel, 1916-D and 1942/41 Mercuries, the 1913-S Barber quarter and both the 1916-P and 1918/17-S Standing Liberty quarters and virtually all of the key date Barber halves together with 1916-S and 1921-P & D Walking Liberty halves. In addition, several dealers have recently begun attempts to buy not only the very tough key circ Morgans (1889-CC, 1893-S and 1894-P), but rather extensive buying lists now usually include all of the circ Carson City issues. Very seldom do bidders locate more than a single coin or two at a time--and they often pay "ask" to get them. The "old days" of locating small hoards of this sort of material are almost completely gone--and should a dealer still be lucky enough to find ten or twenty pieces of a particular issue he has no trouble at all getting top dollar. One problem which is becoming more acute in this area is the tendency of many sellers to "push" the grading just a bit--perhaps half a grade. The phrase is often heard, for example, that a particular coin "grades Good for the date". The fact is, of course, that grading does not depend upon the date but only on the condition of the coin. There has long been this tendency to grade a rare date a little higher than a common date in the exact same condition when selling. The astute collector or investor should not make these grading allowances for, when it comes time to sell, an AG 1916-D dime is just as AG as a 1916-P!

A few buyers are again in the market for quantities of large cents, two-cent pieces and three-cent nickel pieces. They are not yet offering to pay higher prices and results of continual bidding have not been very impressive. Bidders ask for one hundred to occasionally as many as five hundred pieces; sales usually consist, however, of far fewer coins. These obsolete types in low grade are excellent candidates for "store promotions" to the non-numismatically oriented public--particularly in the Bicentennial year!

## This Week's Market

**CENTS:** The 1972/72 double die is once again receiving moderate attention; one major buyer is now in the market for quantities--and will pay \$4100 per roll for strictly choice specimens (that's \$82 per coin). Only a light scattering of minus signs has appeared in the BU roll chart this week. Even though price cutting has slowed, however, many buyers still are "waiting in the wings".

**NICKELS:** Again the low mintage 1937-S and the popular 1938-D Buffalo rolls have recorded lower ask levels; the few current buyers in this area are concentrating on the '34-'36 rolls - which are considerably more difficult to locate. Very few losses have been registered by the Jeffersons for a change--but, as with the Lincolns, very few buyers are yet on the scene.

1938D (J): Several choice rolls are listed for sale around \$140

1942P (12): The "key" of the wartime series - now in the \$250-\$275 range

1942S: Teletype selling lists include this issue at \$135

**DIMES:** Several rolls in the Mercury series are again on "want lists"--1937-D, 1939-PDS, 1940-D 1941-D, 1942-S among them (at this point, buyers are content with present bid levels). Although losses are not nearly as drastic as last week, the Roosevelt series has still registered several more lower ask prices; a few "below market" bidders are beginning to see just how little they can pay and still be "in the ballpark". Single BU sets ('46-'64) are now pegged in the \$55-\$59 range--with the corresponding roll set at \$2650-\$2900.

**QUARTERS:** Again the very scarce 1913-S Barber quarter has moved ahead in all grades from Good thru AU--sellers almost always manage to keep their asking prices somewhat ahead of the bidders for this sort of material. Two Washington rolls have actually managed to report plus signs this week (1939-P at \$275 bid and 1945-P at \$54 bid); several other dates have edged a bit lower--but in this series also price cutting has slowed noticeably.

1940S - Usually quite scarce--now buyers show no interest at \$435 ask

1946D - Another date which often eludes bidders--now offered at \$106.50

1949D & 1951S - Two semi-key dates--available at \$180 and \$217.50 respectively

**HALVES:** The low mintage and "popular" 1946-D W.L. roll has moved still lower this week--at least one five roll lot is now available at \$330 per roll. Franklin roll losses are fewer; scattered (and cautious) bidders are beginning to enter the market.

1949P - Once the "key"--now offered at \$460

1951D - Also lower; choice rolls available around \$420

1952D & 1953D - For sale now at \$86 and \$64 respectively

1956P - On the market in quantity at a lower \$75

**DOLLARS:** Many more advances have been registered this week by the "in demand" Eisenhower series (check page six); the BU and Proof roll set of all twenty-six issues is now receiving unsuccessful bids of \$2100. One lone bidder is "supporting" most of the Redfield dollar by offering to pay "the current bid" for strictly MS-65 specimens. A few more common date rolls edge slightly lower--virtually all of the bidding in this area falls into the "bargain hunting" category.

**PROOF SETS and MINT SETS:** Recent lowering of BU roll prices has affected the early mint sets--prices are lower for nearly all of the '46-'58 issues (check page six). Again the "S-less" sets have been pushed to new record levels--but, in general, very little actual trading has been recorded in the proof set area. The 1976-S six-piece set is slightly lower at \$11.25-\$12--with moderate sales noted within this range.

**COMMEMORATIVES:** Plus signs have outnumbered minus signs this week! Two or three major commem buyers have stepped in to "pick up the bargains" created by the recent price lowering. However, many of the issues available just a week or two ago have all but disappeared from the circuits. A bit of profit-taking is now evident in the gold commem series--a few strictly choice pieces offered at slightly lower levels have failed to excite readers of this week's teletype messages.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$118.00 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly  
basis. Under the present system, it is impossible  
to monitor all transactions or offers to buy and  
sell, but the broad information sources of the  
Newsletter make it a very accurate reflection of  
the market.INVESTORS NOTE: the prices in the Newsletter  
are from dealer-to-dealer transactions. As an  
investor, you may place your buy and sell  
orders through a dealer for a fee, as you would  
buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch, four  
consecutive ads (no changes) -  
10% discount.Advertising space is limited, ads will  
be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## BU ROLLS LEVEL OFF; SALES VERY LIGHT Bids Of \$2200 Fail To Produce Roll Sets Of Eisenhower

### The Market in Depth

ALLEN HARRIMAN

Price cutting for BU rolls has been almost at a standstill this week—with only scattered issues in each series (cents thru halves) being listed for sale at lower levels. This, of course, does not necessarily mean that the lowering of ask levels in this area will not resume again in the next week or so. However, the obvious reluctance of most dealers to make further drastic cuts has resulted in the disappearance of many BU roll selling lists—and the “sticking to current prices” for most of the lists which do occasionally appear. Even a few “want lists” are beginning to be noted. Potential buyers are mostly looking for bargains—hoping to locate a few sellers who are still willing to discount prices.

There is one area in which rolls are continuing to edge lower—the common date Morgan (issues under \$150 or so) and the early Philly Peace dollars. Several sellers regularly list quantities for sale on the several teletype circuits, but buyers are showing very little interest. Small lots of choice to gem singles of these common dates sell rather easily—and at prices somewhat over the pro-rated roll price. At this point, on the other hand, the usual MS-60/65 roll (as they usually come from original bags) are not in demand. Dealers prefer to pay a little more and receive the “hand selected” singles which sell much more quickly over-the-counter or from convention bourse table displays.

There are a number of issues which are quite easily located by the roll—in quantities up to bags. Yet these same dates are not always available in truly choice MS-65 or gem MS-65+ condition. Although this doesn't apply to the 1878-82 S-mints, the common O-mints (and, to some extent, the Philly coins) from 1879 thru 1885 are more often located in MS-60/65 rather than in choice fully struck condition. One dealer stated that he had recently examined an entire bag of 1883-O dollars and hadn't come up with a single coin which would qualify as a gem! This problem is accentuated when it comes to the 1886-92 New Orleans coins—and particularly the higher priced 1892-O. Original rolls of these dates are occasionally encountered—but, again, the coins in these rolls rarely qualify for the MS-65 classification. For example, dealers are willing to sell fully original—but not well-struck—1892-O Morgans in the \$52 area. Yet a true gem, if offered, would easily fetch \$200 or more!

One major teletype bidder is now running frequent and lengthy buying lists for “Good or better” Barber coins. These lists cover all three series and are not limited to only the key dates. In fact, virtually all dates—even the most common P-mints—are wanted in quantity. Several higher bids for the “keys” are reflected in this week's charts (page four)—and next week's October “MONTHLY SUMMARY” will give subscribers a complete picture of the bidding for all dates in these series.

Grading of silver commemoratives seems to be getting more and more strict—at least, grading by buyers. In general, original BU commemoratives are nice MS-65 specimens—unless, of course, they have been mishandled or have noticeable bag marks. There are a few exceptions—issues which are almost always poorly struck (examples: Maine, Monroe, Panama Pacific, Sesquicentennial, Vancouver). There are a few other issues which, although probably well-struck originally have not weathered the years well and are now rather difficult to locate without marks or “cabinet friction” (the common Columbians, Grant with star, Hawaiian, Hudson, the two Missouri issues, Spanish Trail and both the Isabella quarter and Lafayette dollar). Current bidders apparently want MS-65+ specimens of all issues—yet few are willing, at the moment, to pay more than the MS-65 bid price to get them. (The Lafayette dollar is an exception—a “gem” specimen will fetch as much as \$1200 from many dealers.)

### This Week's Market

**CENTS:** For a pleasant change, only a few scattered late date Lincoln rolls have edged lower this week. Bidders for the earlier issues, however, remain few and far between—and all are in the bargain-hunting mood. Quantities of Good/better large cents are wanted at \$3.50 per—and rolls of Indian cents in the same grade are receiving regular quantity bids at \$18.

**NICKELS:** Also only a light scattering of minus signs across the Jefferson chart—again with a few dealers running “below market” teletype buying lists. The scarce 1912-S Liberty nickel is in demand—with bidders asking for “several pieces” in each grade thru XF (only a few lower grade specimens have changed hands).

1943S & 1944P - Both are now available at \$45

1946S - Often a “popular” issue—rolls are offered this week at \$17

1951D - Also elusive at times; ask slips to \$35

**DIMES:** The scarce 1936-D Mercury single has moved up to \$41 bid—and both the 35 S and 39 P rolls have registered small gains (bids are now \$635 and \$195 respectively). Interest remains high for pre 1934 Mercuries in “full bands” MS 65 condition, next week's October issue of the “MONTHLY SUMMARY” will carry the latest impressive bid prices for these early dates. The Roosevelt series

is virtually unchanged this week—in extremely light trading.

**QUARTERS:** An occasional teletype dealer is now asking for a few rolls in the Washington series. However, in light of recent price lowering. Nearly all bidders hope to pick up the issues they need at even less than current levels. In general, however, sellers aren't nearly as plentiful as they were a couple of weeks ago.

1941P - Lower—rolls are now available at \$111.50

1944P & 1945P - Both issues register small gains

1955D - Several buyers are interested—but most want to pay only \$80-\$81

**HALVES:** Mild profit-taking continues to be experienced by the pre-1940 Walking Liberties. This week the lowered issues are 1936-S (\$130-\$145), 1937-D (\$190-\$210) and 1937-S (\$180-\$200). The '41-'47 “short set” rolls are firm in light trading (dealers still want choice fully-struck specimens of all the S-mints). In the '52-'59 Franklin group a number of rolls has continued to drift lower—to a rather disinterested teletype audience.

1952D & 1953D - Now offered at \$82 and \$62 respectively

1955P - Several sellers—ask slips to \$119

1957P, 58D, 59P & D - All are slightly lower

**DOLLARS:** Bid for the complete roll set of Eisenhower dollars (twenty-six issues) has moved up to \$2200—none have been listed for sale. Plus signs are once again scattered liberally across the chart (page six); among the most elusive issues are:

1972S & 1973S 40% BU - Both are wanted in quantity at \$2.90 and \$3.95 respectively

1973S 40% Proof - The “key” of the series—bid has reached a record \$25.50!

1974S 40% Proof - With a low mintage (second only to the 73-S proof) this issue is quite elusive at this week's higher bid of \$9.35

(Watch for major article on Ike dollars in next week's October “MONTHLY SUMMARY”)

**PROOF SETS and MINT SETS:** The available supply of 1975-S sets seems once again to have dwindled to a trickle—bid edges back up to \$22; the 76-S six-piece set is also slightly stronger at \$11.50 bid. Except for one dealer's continuing attempts to buy the three “S-less” sets (again at higher levels), the remainder of the proof set area is witness to only the lightest trading.

**COMMEMORATIVES:** Now rather an active area—with numerous prices moving in both directions. In general, the issues needed for 50-piece sets are steady or are on the plus side—with the various PDS sets and other issues needed only for complete 144-piece sets again edging lower.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$115.90 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## THE TYPE COIN MARKET — A REVIEW

### Early Type Strong; "Dated" Material In Later Series Takes Spotlight

#### The Market in Depth

ALLEN HARRIMAN

During the past few months very little change has been registered in dealer bid levels for "type" material. Prices, however, have remained quite firm during this period and frequent teletype "want lists" which offer to "pay bid" for the various type coins in both MS-60 and MS-65 condition are meeting with little actual success. Grading has been the main factor limiting sales during recent months. At current price levels, buyers tend to be conservative—some feel that many are overly so; sellers, on the other hand, often tend to "stretch" just a bit when describing material listed for sale. Teletype dealers frequently ignore selling lists which offer "choice" type material at "bid" (or less), suspecting that the coin will be overgraded. They are very often correct. At recent major auctions, however, the story is a different one. Floor bidders have usually examined the coins beforehand and it doesn't take an expert observer to note which coins at auction are properly graded. It is a frequent occurrence that two or three coins which carry the exact same catalog description will bring prices that are at wide variance. The floor bidder knows which coins are graded "right on" (or even undergraded)—the mail bidder usually does not. The following is a general examination of what has been occurring at recent auctions for both "type" and better dates in the various denominations—with a few specifics included for emphasis. The second part of this recap of the past few months' activity in this area will appear in next week's issue.

**HALF-CENT CENTS and TWO-CENT PIECES:** Properly graded specimens of the "one year of type" 1793 half-cent always enjoy strong demand in any grade. At the October Bowers and Ruddy auction, a VG/F piece sold for \$650 and an "XF with some unevenness" brought \$2800. The "choice XF" example in Stack's A.N.A. went to the winning bidder at \$3900! The 1794-97 Liberty Cap type is also bringing at least "ask" (often to dealers)—with nice VF specimens typically selling for prices in the \$525-\$575 range. In the three later types, choice frosty "brown unc" (MS-60 or MS-60+) are fetching prices well in excess of teletype bids (a problem here is that many of the "MS-60" pieces offered on the circuits are just nice AU coins). True MS-65/70 half-cents without spots or other impairments are now seldom seen even at major auctions; strictly choice ones without problems easily bring \$550-\$650—but lesser quality pieces usually sell in the \$300-\$350 area. Low grade common date half-cents are wanted, as usual, in quantity—dealers continue to offer around \$14 for G/VG.

The Stack's A.N.A. auction proved that truly choice "common date" large cents can bring very impressive prices—with, as example, an 1851 in "MS-70" condition selling for \$1050! Finding original uncirculated large cents is becoming increasingly difficult—so many of the pieces encountered have been recolored. The earlier "types" usually tend to have marks, poor surfaces or other detracting features, but defect-free examples usually bring prices at least in line with currently recorded levels. The two 1793 issues and the Classic Head design are particularly strong—especially in the Fine to XF "without problems" category. Again, low grade common dates are wanted in quantity—at the usual \$3.50 per.

Buyers of the early small cents now tend to be more conservative than, say, a year or so ago—it takes a strictly graded piece to satisfy most collectors; prices realized drop sharply from MS-65/70 levels when even very minor defects are noted. Gems, of course, still bring substantial premiums. Date collectors are becoming more numerous for both Indians and Lincolns. The "keys" (particularly 1877 and 1922-Plain) are wanted in all grades at advancing levels and all "MS-70 gems" bring well over Redbook at auction (while spotted or weakly struck specimens attract very little attention).

A "full color gem" (MS-65/70) 1864 two-cent piece sold for \$400 at the A.N.A. auction (teletype dealers currently offer \$250). Date collectors are active in this series also—with strong interest noted for the 1872 in all grades and the rare circulated specimens of the "proof only" 1873 issue. Choice AU and brown unc (MS-60) two-cent pieces are also in considerable demand at current levels—as are quantities of G/VG specimens.

**THREE-CENT and FIVE-CENT PIECES:** The three-cent nickel series is enjoying strong collector interest. Most buyers are looking for "at least MS-65" examples of all dates—with special emphasis on BU (rather than proof) specimens of the low mintage 1879-89 issues. Refer to the September issue of the "Monthly Summary" for in-depth coverage of this series—including the latest dealer bid prices for all grades of the scarce and rare issues.

The three-cent silver series is relatively quiet—and firm—at present "bid-ask" levels. Gems, of course, bring well over ask when offered at auction (again, strict grading is a must). The rare choice BU "type three" dates are very strong—at the recent Bowers and Ruddy auction, an 1864 brought \$575 and an 1868 sold for \$550 (BU's of the 1863-72 years are far rarer than proofs).

Shield, Liberty and Buffalo nickel type coins have been faring well at auction when properly graded—but most of the "choice" pieces listed on teletype selling lists turn out to be more in the "MS 60/65" category. The main buyer interest, however, is presently concentrated on the scarce and rare dates in all three series

in circulated as well as "choice MS-65 or better" condition. A recent auction conducted by New England Rare Coin Auctions included a complete set of Buffalo nickels—many in choice to superb condition. Some of the prices realized for fully struck MS-65/better pieces: 1913-S (I) \$100, 1913-D (II) \$160, 1914-D \$270, 1916-D \$190, 1916-S \$240, 1917-D \$230, 1919-D \$675, 1920-S \$425, 1923-S \$375, 1925-D \$475, 1926-D \$850, 1928-S \$160 and 1937-D (3-legged) a record-setting \$900!

**HALF DIMES and DIMES:** From Good thru Uncirculated, correctly graded specimens of the earlier issues tend to bring over (often well over) current teletype bids. Again this is probably due, at least in part, to the tendency of many teletype sellers to overgrade by half-a-grade or so—and to the fact that auction floor bidders examine coins before bidding. An "MS-60" 1795 half-dime sold for \$3750 and an "AU" 1796 dime for \$2800 at the most recent Bowers and Ruddy auction and virtually all of the early specimens in Stack's A.N.A. auction brought prices in excess of current teletype "bid-ask" levels. Strongest collector and dealer attention is currently focused upon the "no stars" half-dimes and dimes—but bidders are reluctant to raise their offering levels (escalating prices seldom bring out very many choice coins). Common dated Seated Liberty dimes show some weakness in all grades except choice MS-65 or better—but the scarce and rare dates in this long-lived series are experiencing a strong upswing of collector interest and bid prices. The S.L. dimes present many as yet greatly undervalued dates—experts in this field are rather few and they can still often make very good buys because of the lack of general knowledge in this series.

Choice "type" Barber dimes are firm in the \$125-\$135 range—but "dated" material is also taking the spotlight in this series (and in the Mercury series). Better date Barbers and "choice, full bands" Mercuries have been enjoying highly competitive bidding at auction. It is obvious that more and more collectors are completing sets—and that the majority of them want only the very best. Specimens of lesser quality (in the MS-60 or MS-60+ range) usually bring considerably less than Redbook—while gems leave current listings far behind.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$116.40 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## TYPE COIN REVIEW --- PART II BU Rolls Suffer Another Setback (Except Eisenhowers - They're Up!)

### The Market in Depth

ALLEN HARRIMAN

This week we continue reviewing the status of the type coin market. Again, when considering current prices, it should be reiterated that grading in general is more conservative than, say, two years ago. It is certainly far more conservative than it was six to ten years back when coins were much less expensive--when a BU coin was simply a BU coin! Today of course, strike, color, surfaces, bag marks, etc. are all taken into consideration. There is a current school of thought which sees the breaking down of "BU" into at least three categories as detrimental to the hobby--but the fact is that today's price levels demand such descriptions as Unc MS-60, Ch. BU MS-65 and Gem BU MS-65+ (if not full MS-70).

Years ago many dealers were advising their clients to "pay a little more and buy the very best" (in those days, the very best usually cost only a little more). Those who followed this advice have seen their "choice" and "gem" material advance to levels which were unthought of at the time. Today, if a collector has the right material in the ultimate condition, he can almost "name his own price."

**QUARTERS:** While the one-year-of-type 1796 quarter is not a rare coin, it is "an American classic" and is always in strong demand--with original, defect-free specimens in the VG-VF range currently attracting considerable attention. The piece in Stack's A.N.A. auction which was catalogued as a "strong VG, completely free of any defect" brought an impressive \$3300. (Teletype bid at the time was only \$2150 for Fine!) The 1796 quarter, by the way, seems to be included in major auctions in AU or BU more often than in the various lower grades. Properly graded "large eagle reverse" Draped Bust quarters also trade rather briskly on today's market (there is a tendency to overgrade the 1804-07 quarters in the higher grades). An 1806 in AU brought \$1400 at a recent Bowers and Ruddy auction; at the A.N.A. auction a "choice XF" specimen sold for \$925 and a "VF+" piece went for a high \$650! Both types of Capped Bust quarters now seem relatively easy to locate in all grades except full MS-65. The few top quality pieces which reach auction still fetch quite substantial prices; the lesser grade examples, however, are frequently found on teletype selling lists within current price ranges and sales volume is only light to moderate.

In both the Seated Liberty and Barber series, scarce and rare dates have at least partially taken the spotlight. As with the dimes, the long-lived S.L. quarter series still presents numerous opportunities for the well-informed buyer to locate truly scarce dates and varieties at very reasonable levels. Although more is now being published about the undervalued issues in this series, there is a vast amount of information which most numismatists do not yet have. As for MS-65 type coins, teletype bidders and auction buyers are extremely fussy--particularly for the more plentiful "with motto" version. Common date "gems" continue to fetch prices in the \$500 area but prices tend to drop rather sharply if the coin has any defects. (Buyers do tend to be just a bit more liberal when grading the scarce earlier S.L. types.) As mentioned, the Barber series--and, in addition, the Standing Liberties, are experiencing a definite upswing in collector interest for specific dates. Choice and gem BU specimens of the scarce and rare issues in both series now often bring prices in the "double Redbook" range when offered in a major auction. "Type" in these two series remains rather static at current levels.

**HALVES:** As with the other denominations, strictly graded and problem-free specimens of the early half dollars are in considerable demand. The Flowing Hair (1794-95) and both Draped Bust types in auction regularly bring prices in excess of teletype bid-ask levels. A "VF with lovely iridescent toning" 1795 realized \$800 in Stack's A.N.A. auction this past August; A "slider BU" 1807 brought \$1150 in the Bowers and Ruddy October auction. Attempts to locate "any grade" examples of the rare 1796-97 "small eagle reverse" halves are frequent on the various teletype circuits--very few pieces have been located and those located usually bring prices somewhat ahead of current Redbook listings (the two VG/F specimens in the A.N.A. auction both sold for \$6250!)

Dealers frequently complain that the bidders who offer \$700 for "full MS-65" Capped Bust halves are "too fussy"--yet the fact is that this particular type is generally among the most overgraded of all U.S. coins. Strictly MS-65 or better pieces are very scarce--"super sliders" are not. The difference in bid levels between MS-60 and MS-65 reflects the true scarcity of choice specimens--and at the \$265 bid for MS-60 buyers usually get AU-55 coins (the usual "BU with cabinet friction"). It should be mentioned also that the 1815 half is wanted--in all grades--and again usually at prices over Redbook listings.

Common date Seated Liberty and Barber halves seem relatively plentiful on teletype circuits and bourse tables--in all grades through MS 60. Buyers, however, are far more interested in the occasional gem piece which may be encountered--chances for a general upswing in prices for a general upswing in prices for other grades in the near future appear rather remote. On the other hand, there again is strong interest in "dated" coins in these two series--with the key and semi key issues now bringing strong prices in virtually all grades. The Walking Liberty series reflects this interest in scarce and rare issues even more definitely. Any early date W.L. half in truly choice condition is currently

selling easily at figures well over Redbook--and buyer interest in middle grade specimens is also on the increase. The 1934-39 issues have witnessed profit-taking during the past few months with only "gems" sparking more than light interest.

**DOLLARS:** A "choice XF/AU" 1795 Flowing Hair dollar just brought \$3200 at auction--with a "nice VF" in the same auction bringing \$900. These prices indicate continued demand for accurately graded early dollars; prices for both Draped Bust types have also been quite strong--although, of course, these two later types are more readily available and buyers tend to stick more closely to current teletype dealer-to-dealer bid-ask levels. Demand for "gem MS-65+" Seated Liberty dollars is very evident--on the teletype circuits as well as on the auction floor. The problem in this area is that dollars of this ultimate quality are extremely few and far between. Superb examples of either type (when available) usually bring very impressive prices--in the \$1500-\$2500 range! Lesser quality common date S.L. dollars, on the other hand, fail to create much excitement when offered--recent auction prices have been more or less in line with current teletype levels.

Truly MS-65 or better proofs of the S.L. dollars, Morgan dollars (and Trade dollars) continue to enjoy moderate demand at current price levels--but, again, a grading problem arises. Most major auctions include a number of each and teletype sellers seem to have an ample supply--so buyers have plenty of proofs to choose from and they are very selective. Most of these dollar proofs fall into the MS-60 or MS-60+ category and those generally realize prices considerably below those for gems (as reflected in the MS-60 proof column on page five).

### This Week's Market

As is evident from the BU roll chart, sellers again dominate this area of the market. Lengthy selling lists include practically all dates in most series (excluding Buffalos, Mercuries and Walking Liberties). There are only three or four major sellers--but the lack of buyers has resulted in this week's very extensive rash of minus signs. The only bright spot in this picture is the Eisenhower dollar series (check page six). The silver commens, by the way, are also reflecting only plus signs--few sellers can now be located!

**U.S. GOLD:** (prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$114.70 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## EISENHOWER DOLLARS CONTINUE UPWARD SURGE Key 1973-S Proof "Ike" Trades At Record-Breaking \$40!

### The Market in Depth

ALLEN HARRIMAN

The Eisenhower dollar series is soaring! Teletype bidders are tumbling over one another in order to top the latest bids and this week's moderate volume of sales has not made much of a dent in the current very strong demand. The "key" 1973-S proof has scored an extremely impressive 26% gain since last week---now being registered in the \$38-\$41 range. One major buyer, by the way, has managed to pry loose a relatively substantial quantity of this very elusive issue---a few at a time---paying \$40 per coin! The second biggest winner this week is the second lowest mintage issue of the twenty-six coin set---the 1974-S proof. The bid for this one has moved from \$9.75 to \$11.75---a 20% gain (with quantity sales recorded at \$12.25). Single sets of Ike dollars are now pegged in the \$130-\$145 range---with several transactions noted at one teletype dealer's selling price of \$145. Frequent bids for complete roll sets---now at \$2500---are totally ignored. It should also be mentioned that, although bid levels have not advanced this week for the 1971, 1972 and 1974 Philly and Denver uncirculated dollars, buyers are having a difficult time locating even a roll or two within current bid-ask ranges. Practically no sellers are to be found and the few rolls which do appear on the teletype circuits almost always carry price tags well ahead of even today's active market.

Price cutting in the BU roll market has slowed considerably. Actually, both sellers and buyers have been rather scarce this week---most sellers apparently not wishing to lower prices any further and buyers, for the most part, simply concentrating elsewhere. This week's minus signs, then, are the result of just a couple of dealers running lower selling prices coupled with very little demand. There have been a few scattered bidders tentatively entering the BU roll market---but, in general, they are taking advantage of the recent major slump by offering to buy at even further discounts from current low levels. Sales in this area, therefore, have been quite limited throughout the past trading week.

Choice Buffalo nickel rolls---with the exception of 1937-PDS and 1938-D---are eluding potential buyers. The 1934-36 rolls aren't being offered for sale and the occasional bidder finds that locating even a single roll can take weeks. Prices for practically all Buffalo rolls have been static for months now---but this is not, in this case, a sign of equal availability and demand. One dealer, for example, has been attempting to buy a single choice 1936-S roll for several weeks now---without success. The 1934-D has advanced in recent weeks, but the 1934-P, 1935-D and 1935-S are nearly as elusive---with the 1935-P and 1936-PDS not much more plentiful. Buyers, of course, want choice rolls---nicely struck full MS-65 coins. Many of the rolls seen in the past few years, however, fall more into the MS-60/65 "average strike" range. The 1935-D is, by the way, very scarce in top condition---every roll seen has been very weakly struck. One dealer has a standing offer of \$50 for a "gem MS-65+" specimen---and, so far, he has not been able to fill the order!

### This Week's Market

**CENTS:** Continued and frequent attempts to buy key and semi-key Indians are meeting with very little success---bidders want quantities of defect-free G/VG specimens but current bid levels apparently are not high enough to entice sellers. Dealers also want large quantities of Good/better large cents---offering to pay \$3.50 per nets an occasional small lot. A few BU rolls (mostly in the '44-'46 group) have again edged lower.

**NICKELS:** Scattered dates in the Jefferson series recorded at slightly lower levels, but last week's widespread price cutting has abated considerably; a few BU single sets traded during the week in the \$90-\$95 area. More dealers are trying to locate not only choice MS-65 Buffalos but "want lists" now also regularly include the key dates in all grades and most of the pre-1934 issues in "full horn VF or better" condition. Current bid levels (see the October MONTHLY SUMMARY) result in only scattered transactions.

**DIMITS:** The key 1935-D and 1936-D Mercuries are wanted in quantity at current

respective bids of \$78 and \$43---only a few pieces have changed hands. Two rolls have registered gains---1935-S is now bid at \$650 and 1938-S at \$485; otherwise, the 1934-45 Mercury rolls are firm at present levels. Only a few dates in the Roosevelt series carry minus signs---several "bargain hunters" have now entered the market. Choice BU single sets (1946-64), by the way, continue to trade in the \$55-\$59 range.

**QUARTERS:** The scarce (in MS-65 condition) 1932-D quarter has reached a record \$600 bid! Specimens encountered almost always fall into the "super slider" category---truly original pieces with no rubbing are very, very few and far between. Other advances for the early MS-65 Washingtons: the 1932-S is now receiving bids of \$215 and both the 1935-S and 1936-S are wanted in quantity at a higher \$54. The BU rolls have witnessed only a few scattered changes; most selling lists have been withdrawn from teletype circuits.

**HALVES:** Numerous gains have again been registered by key date circulated Barber halves. One major dealer regularly runs lengthy buying lists for virtually all dates in this series---asking for quantities in "good or better" condition. A few dealers have responded with small lots, but apparently not enough to satisfy the bidder's current needs. Walking Liberty rolls remain firm (the 1947-P is up slightly at \$350 bid); a few small losses are noted for the more high-priced Franklins---with at least one frequent bidder now in the market for BU roll sets at \$4500.

**DOLLARS:** A number of Carson City issues are now trading at slightly lower levels on the various teletype circuits---with the majority of current bidding now in the "bargain hunting" category. Also carrying further minus signs are a number of the common date Morgan rolls. Most buyers in this area keep their offering prices just below market and relatively few actual sales are being completed. One dealer is still managing to support the "Redfield dollar market" with frequent buying lists for strictly MS-65 specimens---with emphasis on the word strictly! See "The Market in Depth" for details on the very active Eisenhower dollar market.

**PROOF SETS and MINT SETS:** Several minor changes this week---sales have remained rather light. The 1976-S six-piece issue has traded in lots of one hundred sets in the \$10.75-\$11.00 area; bids of \$21.50 fail to produce many of the 1975-S version. Both of the three-piece Bicentennial issues are slightly stronger.

**COMMEMORATIVES:** Again a few advances have been recorded by the silver issues---with several dealers now in the buying mood. Virtually all sellers have disappeared and, as a result, most "want lists" now go unanswered. Interest seems to have waned for the gold commems---prices now appear to be a bit more "negotiable" than they were a few weeks ago.

U.S. GOLD: (prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$114.60 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch, four  
consecutive ads (no changes) -  
10% discountAdvertising space is limited, ads will  
be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## KENNEDY ROLL SETS ELUDE BIDDERS Eisenhower Dollars Remain Strong; BU Roll Market Records A Few Gains

### The Market in Depth

ALLEN HARRIMAN

An occasional plus sign has begun to slip into the BU roll charts. While most of the new buyers in this area are quite cautious (still usually offering only to buy at "below market" levels) a few want lists have edged a price higher here and there. This week's scattering of minus signs is basically the result of a few "left over" selling lists--not a new batch of rolls entering the market place. It is intriguing to note a usual pattern. Even in a "down market" bidders find that they have difficulty locating the few specific rolls they need--it seems that as soon as any interest is expressed in a few rolls, those particular rolls disappear from selling lists!

Although the bid has not yet advanced, several dealers want to locate "a few roll sets" of Kennedy halves. Naturally the possibility that the half dollar might be discontinued along with the current dollar has created new interest in this series. Noting what has recently occurred in the Eisenhower series, at least some investors want to get in "on the ground floor" with the Kennedy halves. This 1964 to date series contains either twenty-six or thirty-two coins--according to which rolls are included. The twenty-six coin set contains all of the rolls listed in the BU roll chart on page three--1964-P & D thru the three 1976 issues. The bid for BU single and roll sets reflected on page four is for these twenty-six dates. Some dealers, however, are trading what might be termed complete complete sets--containing thirty-two coins. The additional issues included are: 1964 proof rolls, rolls of the three "special mint set" issues of 1965, 1966 and 1967 plus rolls of both the 40% BU and 40% proof coins from the respective three-piece Bicentennial sets. Current bid prices for these six "extra" rolls are as follow:

1964 pr.	\$58	1967 s.m.s.	\$45
1965 s.m.s.	\$28	1976-S 40% BU	\$60
1966 s.m.s.	\$29	1976-S 40% pr.	\$90

Bid, then, for rolls of all the possible dates in the set is about \$1240--or \$62 per single set. One major dealer has been "retailing" thirty-two piece sets in albums for \$78-\$82!

Some dealers have been taking advantage of the greatly bid levels in the Eisenhower dollar series. Several rather large lots of mixed dates changed hands during the week. Even so, bid levels have again moved ahead this week--if at a somewhat slower pace due to the volume of actual sales. The "key" 1973-S 40% proof issue has witnessed further trading at \$40 or slightly more--and most sellers are now asking at least \$43. The "second key" of the series, the 1974-S 40% proof has traded frequently during the week in the \$12-\$12.50 range. Complete twenty-six coin sets are still selling at \$145--and \$2500 bids for complete roll sets one still totally ineffective.

### This Week's Market

**CENTS:** Three or four bidders have entered the BU Lincoln roll market--but, of course, most are attempting to pick up "lots" at discounts from even today's low levels. One major buyer is still in the market for large quantities of the rather elusive 1969-P roll--bid has moved to \$5.25 (and this bidder will pay slightly more for twenty or more "gem" rolls at a time).

**NICKELS:** The "1965 to date" roll set (including all S-mint issues) is now recorded in a slightly lower \$525-\$565 range--the '74-'76 rolls having been offered for less this week. A few scattered minus signs are registered for earlier Jeffersons--still with little buyer interest noted. The "key" 1912-S Liberty nickel is wanted in quantity in G/VG condition--bid has again advanced just a bid.

**DIMES:** The scarce 1936-D Mercury is receiving quite a bit of attention from one buyer; the bid for choice MS-65 pieces has moved up to \$45 this week--and very few have been located. Both the Mercury and Roosevelt rolls are now basically firm; minor gains have been recorded by 1940-P, 1943-S and 1947-D--and losses have been noted for the 1970, 1975 and 1976 S mint proof rolls.

**QUARTERS:** Two of the three key Barber quarters are wanted "in all grades"; bids have advanced once again for both the 1901-S and 1913 S--and, so far, frequent bids have met with few if any results. The considerably higher mintage

1896-S is somewhat less difficult to locate--hence the unchanged bid levels. It should be added that all but the most common Barber quarters are receiving quantity bids in "Good or better" condition (the latest bid prices will appear in the November MONTHLY SUMMARY). Gains were registered this week by two elusive Washington rolls: 1939-P now bid at \$290 and 1939-D now bid at \$625.

**HALVES:** Late date Franklin rolls are fairly plentiful at the moment on the various teletype circuits--sales have been only light to moderate (bidders are mostly in a bargain-hunting mood.) A few complete sets of Franklins were traded during the week at \$245 and the current bid of \$4500 has failed to produce the desired 1948-63 BU roll sets. It should be mentioned that bids for BU roll sets of Kennedy halves have been unsuccessful (see "The Market in Depth").

**DOLLARS:** Minus signs are again plaguing the common date dollar rolls--with particularly all bidders hoping to pick them up at still lower levels. One exception is the 1900-O roll--which has moved ahead to \$135 bid. The "S-mint" Redfield issues continued to be supported at present levels by one major silver dollar dealer.

**PROOF SETS and MINT SETS:** Relatively large quantities of the six-piece 1976-S sets have changed hands this week--again in a slightly lower price range (now \$10.25-\$10.85). Rather light trading continues for the remainder of the issues--with a few more minor losses noted. Interest in both the 1970 and 1973 mint sets is moderate at the current respective bids of \$14.50 and \$15.

**COMMEMORATIVES:** Three or four major buyers are in the market for virtually all of the silver "types"--offering now to pay "full bid" in most instances (most of the recent bargain-huntings seems to be over). However, except for a few sets ('37 & '38 Boone, '38 Oregon and the Texas issues), bidders are generally ignoring the various PDS sets and the better date single Orecons; scattered minus signs will be found in this area. All of the gold commems have edged lower in a bit of profit-taking--with the lone exception of '04 Lewis & Clark.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$119.70 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## IKES STRONG; KENNEDY HALVES IN DEMAND

### Additional Kennedy Issues Added To Page Three Roll Chart

### The Market in Depth

ALLEN HARRIMAN

As is evident from the Eisenhower dollar chart on page six, interest in this active series continues at a reasonably strong pace. Although a number of dealers are now taking advantage of greatly increased bid levels, many are still keeping their selling prices just above current bid levels. Most of the Ikes being offered are small mixed quantities--a few of several different issues offered "as a lot". Those lots do not always sell as quickly as they might if they consisted of all the same date or variety--most bidders are interested in particular issues. The two or three major buyers (those who run regular comprehensive buying lists which cover the entire series) have begun to leave a number of bids unchanged for several days. This is in contrast to advancing bid levels every day which was the tendency a week or so ago. All of this, of course, points to a leveling out of prices for the recently volatile 40% BU and proof versions--at least for the moment. One dealer is still taking the key 1973-S proofs at \$40 and another was offering to pay \$41--but both now want limited quantities. The major buyers have lowered their bid levels to the \$36-\$38 range.

Attention has turned at least partially to the 1971-73 Philly and Denver circulation strikes (or, in the case of '73, "mint set" strikes). Advances have been registered this week by all six of these rolls and potential buyers are not easily locating the quantities they need. The scarcity of the 1973-P & D rolls is obvious--but, in spite of very large mintages, it appears that relatively few investors or dealers put away many of the 1971 or 1972 issues. The Eisenhower dollar was not very popular from the outset and, of course, few if any investors gave thought a few years ago to the possibility of the discontinuance of the series.

Further efforts to buy roll sets of Kennedy halves have been totally unsuccessful throughout another week; numerous dealers are in the market for them--and several will take five or even ten. Only one seller has been noted on the various teletype circuits--this one dealer is offering to sell the "complete thirty-two issue" roll set at a price somewhat ahead of the current bid for the individual rolls involved. PLEASE NOTE THAT THE "EXTRA" SIX KENNEDY ROLLS DISCUSSED LAST WEEK HAVE BEEN ADDED TO THE PAGE THREE ROLL CHART. In addition, of course, the bid and ask levels for single and roll sets (page four) have now been adjusted to include all thirty-two issues of the Kennedy series. So far, buyers have not advanced their buying prices for the individual rolls--but it most likely is going to take more inducement than current bid levels offer to pry loose most of these rolls.

One major commem dealer's recent attempts to buy a rather lengthy list of silver commems has been only partially successful--hence this week's slightly higher bids for many of the "type" issues. As this indicates, current buying interest is centered around the fifty coins necessary to complete a silver commemorative type set. The remaining issues which are needed only if one is assembling a complete 144-piece set are not receiving much bidder attention. Exceptions this week include the Alabama 2x2 and the 1937-PDS Texas set (the plus sign for the Rhode Island PDS set is only a reflection of higher bids for the type coin).

### This Week's Market

**CENTS:** All of a sudden several buyers are in the market for "original BU" (MS-65/70) 1972/72 double die Lincoln; most bidders are now offering to pay around \$90 per--but one or two anxious dealers will go as high as \$95. Roll quantities are wanted. The 1960-P "small date" roll is lower again this week--now pegged in the \$97.50-\$103 range; the remainder of the series is basically unchanged in extremely light trading.

**NICKELS:** The pre-1937 Buffalos continue to give bidders trouble. The 1936-S roll has now joined the elusive 34-P & D and 35-D on the "want lists" of those who are looking for choice MS-65 specimens (gains have been registered by all four issues). Sales of both the 37-D and 38-D Buffalo rolls were recorded during the week at \$245. Mild interest is now evident for BU roll sets of both the War-time nickels and the entire Jefferson roll set--but at current bid levels few if any sellers can be found.

**DIMES:** The key 1916 D Mercury is again enjoying a complete run of plus signs in all grades--bidders manage only to pick up an occasional piece or two. A number

of the pre-1941 Mercury rolls are appearing on the buying lists of several major dealers--particularly the P-mints. Virtually all holders of this material, however, are sticking with current ask levels and, as a result, very few transactions have taken place. A few more minus signs are scattered across the very lightly traded Roosevelt series; BU single sets ('46-'64) continue to trade in the \$55-\$59 range.

**QUARTERS:** Two gainers have been noted in the Washington series--the scarce 39-D roll is up again at \$650 bid and the often popular 55-D has edged back up to \$80 bid (buyers will take quantities of this one). Three issues are slightly lower (44-D, 46-S and 54-S)--otherwise the series is unchanged in lackluster trading. Continued attempts to buy circulated 1901-S and 1913-S Barbers are still unsuccessful--the major bidder will take "several of each grade from Good thru VF".

**HALVES:** Common date P-mint Walking Liberty rolls are listed now in a slightly lower \$230-\$250 range and the low mintage 1946-D roll is available at \$315. Both the 1947-P & D rolls are on dealer "want lists"--present bid levels are producing no results on these two relatively scarce dates. A light scattering of lower ask levels in the Franklin series has not stirred buyer interest noticeably; current sales are almost exclusively in the "for store stock" category. A few BU single sets changed hands during the week around the \$240 level.

**DOLLARS:** Prices are lightly mixed for the Morgans and Peace dollars. The bid for "any S-mint roll" has edged back up to \$120 while the 1882, 83 and 84-CC along with the 91-CC have slipped a bit lower. Several dealers are running regular and lengthy buying lists which include virtually every Morgan roll priced under \$250--but their offering prices definitely are of the "bargain-hunting" variety and they are not attracting much attention. See "The Market in Depth" for the latest on the active Eisenhower series.

**PROOF SETS and MINT SETS:** Minor changes in both directions are scattered across the proof set chart. The early 1936-52 sets are steady in very light trading; interest in the '53 to date issues is somewhat more evident as several quantity buyers attempt to pry loose sets at the best possible price level. The 1976-S six-piece set is rather plentiful in a slightly lower \$10-\$10.50 range.

**COMMEMORATIVES:** All but one of the numerous changes registered by the silver commems have been on the plus side of the ledger. The eleven gold issues are steady after last week's general price lowering.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$124.60 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads will  
be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## GOLD AND SILVER BULLION PRICES UP SHARPLY! BU Rolls, Proof Sets And Mint Sets Enjoy Increased Demand

### The Market in Depth

ALLEN HARRIMAN

At press time gold bullion was pegged at \$136.60—up \$12 this week!—and silver bullion was tagging along with an increase from \$4.28 to this week's \$4.53. These strong performances seem to have given at least a small "shot in the arm" to several other areas of the market. Buying lists have lengthened considerably—and although many bidders are still looking for bargains, more and more of them are being realistic with their offering prices.

Several of the usually "popular" BU rolls are beginning to appear on a few major dealers' "want lists". These are the dates which in the past have generally lead the various cyclical upswings in this area of the market—not the more scarce issues which are rather difficult to locate in quantity even in a "down market". One or two bidders have begun to edge their offering prices just a bit higher in scattered instances—even though others still hope to pick up the relatively large quantities they want at five or ten percent under today's low bid levels. Among the wanted dates of course, are 1955-S and to a lesser degree 1960-D "small date" Lincolns, 1943-D and 1950-D Jeffersons, 1954-S as well as 1955-PDS Roosevelts, 1955-D and 1958-P Washingtons and most of the 1955-60 Franklin P-mint rolls. The reporting of this activity, it should be pointed out, does not necessarily indicate an impending surge in the BU roll market—but it does at least mean that several major buyers feel the "bottom" has been reached for these popular and "promotable" issues!

Even though a few minus signs continue to be recorded, readers will also note a scattering of other plus signs across the BU roll charts. Numerous dealers are attempting to fill specific "want lists"—needing a few dates here and there. Sellers, however, simply aren't as plentiful as they have been recently and locating rolls isn't nearly as easy as it was during the past couple of months.

Strong buyer interest is noted in the late proof set and mint set area. It is apparent that many dealers now feel that continual "below market" bidding isn't going to do the job. The increased demand for Kennedy halves and higher silver prices coupled with today's "well-below-issue-price" prices for all the S-mint sets in the 1968-72 group except 1970 have led at least a few bidders out of the bargain-hunting category. One dealer is now hoping to locate two thousand 1968-S sets "at bid" and several others are in the market for quantities ranging from fifty to a few hundred. The two "key" mint sets, 1970 and 1973, are also both wanted in quantity—with one hopeful bidder asking for "up to one thousand of each"! Bid prices for both have advanced substantially this week—to \$16 and \$16.50 respectively. In line with this interest, bid levels for the coins which make these sets desirable have also moved ahead—the 70-D Kennedy half roll now bid at \$300 (sales as high as \$310) and the 1973-P & D Eisenhower rolls have both advanced to \$145 bid (few if any available). It should be noted that while bid for 70-D Kennedy is over double that for the 73-P & D Ikes, the mintage of these two key Eisenhower dollars is somewhat less than that of the half (1,767,691 vs. 2,150,000). By the way, a few sales of complete thirty-two coin Kennedy sets were recorded during the week at \$65—but buyer demand in this area continues to considerably exceed the available supply.

### This Week's Market

**CENTS:** At least one buyer will now take choice original BU 1972/72 double die Lincolns at \$100 per coin—and roll quantities are wanted! Several dealers are also in the market for "gem BU" (MS-70) key and semi-key Indians as well as virtually any early Lincoln. Finding this quality, however, is extremely difficult—practically all of the specimens encountered have problems of one sort or another (spotting, fingerprints, weak strikes, etc.). In the roll area, the 1955-S has moved up slightly—to \$8 bid—and bag quantities are now wanted!

**NICKELS:** Although a few Jefferson dates have edged just a bid lower, selling lists are now widely spaced and last week's buying interest is still evident. There is even a plus sign this week! (the 43-D roll has moved up to \$63 bid). Moderate buyer interest is noted for quantities of "full Good or better" Liberty nickel rolls (bid has edged up to \$11.25). Although these can usually be located in quantity rather easily, a very large percentage of the available rolls contain mostly AG or AG/G specimens—coins with full rims both sides constitute perhaps only 25% of the average circulated pieces available.

**DIMES:** The rare 1945 P "full hands" Mercury is now receiving bids of \$225! Naturally at this impressive price the bidder wants gem specimens with absolutely full hand separation—none which fit this description have been offered. Other

Mercuries which are on the move include the 1935-39 Denver issues—all wanted in quantity. In addition, bidder attention is also noted for 54-S and 55-PDS Roosevelts—again twenty, fifty or even one hundred rolls are needed (the 55-P is up two dollars at \$28 bid).

**QUARTERS:** Dealer attempts to buy strictly choice "full head" key and semi-key Standing Liberty quarters are almost totally unsuccessful. An occasional 1917 "type one" specimen or one of the 1925-30 dates can be located, but the 1917 (2) thru 1924 issues are practically unobtainable in this ultimate condition. The 1935-S Washington is again on the plus side of the ledger (bid now \$56)—and one dealer is now willing to pay \$60 for "true gems". Small increases have been recorded by the 1955-D and 1958-P Washington rolls (bids are now \$82 and \$37 respectively.)

**HALVES:** The "short BU roll set" of Walking Liberty halves (1941-47) is bid at a higher \$7600—with choice single sets registering transactions at \$400. One quality-conscious dealer, by the way, is offering to pay a record-breaking \$100 for "gem full strike" 1941-S specimens! The following "above-Redbook" bids have been noted for the scarce 1855-S half: Good \$65, VG \$90, Fine \$125, VF \$250 and XF \$395 (few if any have been located).

**DOLLARS:** Profit-taking has lowered the 1973-S 40% proof Eisenhower—to the \$36-\$39 range. In contrast, the 1971-73 Philly and Denver rolls have again recorded gains—along with the low mintage 1976-P "type one" issue. (Check your October MONTHLY SUMMARY issues for relative mintage figures for all twenty-six Eisenhower dates.) The 1900-O Morgan roll changed hands during the week as high as \$150—and higher bids of \$1050 have failed to produce strictly choice MS-65 1934-S Peace dollars (some dealers simply ask for "quotes" on this very scarce coin).

**PROOF SETS and MINT SETS:** The 1976-S six-piece set is slightly higher this week—with quantity transactions noted within the \$10.25-\$10.75 range. The 1976 mint set seems rather difficult to locate—even at this week's higher bid of \$6. For more information on recent action in this area, see "The Market in Depth".

**COMMEMORATIVES:** A light scattering of gains has been noted for the silver commems. Sellers manage to keep their ask prices just ahead of the bidders in most cases and, as a result, sales have been light throughout the week.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$136.60 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

## ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes)  
10% discount.

Advertising space is limited; ads will  
be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## EARLY TYPE MATERIAL ELUDES BIDDERS Silver Commems Score Further Gains; Late Proof Sets Wanted In Quantity

### The Market in Depth

ALLEN HARRIMAN

Strong interest in properly graded defect-free early type material has been evidenced by extremely active bidding at several recent major auctions. Collectors and investors have had to overcome keen competition from dealers who are in need of this material to replenish drastically reduced store and bourse table stocks. The fact is that a relatively large percentage of these early pieces which are available have "problems" of one sort or another--edge dents, scratches, uneven wear, etc. Those specimens which are not victims of one or more of these defects now almost invariably experience considerable "floor action" in addition to usually substantial "mail bids"--and the prices realized have, in recent months, been well in excess of current teletype bidding attempts. (Often these coins are awarded to the same dealers who are bidding less on the various teletype circuits for the same coins in the same grades.)

This week's numerous plus signs are a result of current strong activity in this obviously underpriced area of the market. It should be noted that very few dealers are willing to part with nice early type coins on a wholesale basis--preferring, instead, to sell any specimens they may locate to their ready and waiting retail clients (or to consign them to a major auction.)

The prices being realized for "gem" material at these same major auctions have also been extremely impressive. "Dated" coins in the various twentieth-century series (including the Barber issues which began a bit earlier but are generally considered twentieth-century coins) have also been enjoying particularly strong collector and investor demand (as well as a considerable amount of dealer competition)--when offered in the ultimate MS-65 or better condition. It should be added that although interest in "type" specimens of these later series is still evident, it has recently been somewhat eclipsed by demand for the scarce and rare "dated" pieces.

Two examples which adequately illustrate this current demand are the sale at last week's Bowers and Ruddy auction of a "gem, full bands" 1916-D Mercury dime at \$3400 and of a similarly described 1942/41-P at an incredible \$4500! A major article covering a number of areas in which gem quality material is bringing extraordinary prices is in preparation--and will be presented in the upcoming December issue of the MONTHLY SUMMARY.

### This Week's Market

**CENTS:** See page four for the numerous changes in bid levels in the earlier "types" of half-cents and large cents--nice defect-free specimens consistently elude buyers and price tags at the retail level usually far exceed even these advanced bids. The 1972/72 double die Lincoln is still on the move--one major buyer will now pay \$105 for choice fully original pieces and \$80 for "MS-60" coins. The BU roll market is static--with a few dealers picking up scattered dates within current bid-ask levels without much trouble. (Bidders are still in the market for quantities of 1955-S rolls.)

**NICKELS:** The few truly choice MS-65 or better early Buffalos which have been included in recent major auctions have brought very impressive prices (particularly the dates in the 1920's which are generally poor strikes--a "full strike MS-65" 1929-D, for instance, just sold for what must be a record breaking \$110!) A few bargain-hunters can be found in the Jefferson series--sales remain extremely light.

**DIMES:** Plus signs are numerous for the early half-dimes and dimes. These issues are practically never listed for sale on the teletype circuits--and the occasional piece which appears almost invariably has a "problem or two." The 1934-39 Denver dimes remain on several buying lists--with gains registered this week by 34-D, 36-D and 38-D. The 1955-P Roosevelt is up again (bid now \$29) and quantities of 1955-PDS rolls are still of interest to a few major dealers who specialize in this area of the market.

**QUARTERS:** Gains have been recorded by the 1801-07 Draped Bust halves and by the three key Barbers--1896-S, 1901-S and 1913-S. Buyers will take several pieces of each as long as they are properly graded, but sellers are very few and far between. The 1927-S Standing Liberty quarter is wanted in the higher circ grades; bids of \$90 for XF and \$200 for AU specimens are totally ineffective. The 1955-D roll is still on "want lists"--with sales noted this week as high as \$85, the remainder of the Washington series is quiet in light trading

**HALVES:** Only minor changes are registered this week for the Walking Liberty and Franklin rolls. The complete 32 piece Kennedy set continues to change hands around \$65 and a moderate amount of bidding for the various S-mint rolls has been noted. Two scarce early halves are now receiving regular bids in all grades (check the bids for the 70-CC against current Redbook prices!)

	G	VG	F	VF	XF
1839-O	\$ 45	\$ 55	\$ 95	\$135	\$200
1870-CC	\$150	\$250	\$400	\$600	\$900

**DOLLARS:** Mild profit taking continues for several of the "blue" and "brown" Eisenhowers. Sellers, however, are edging their prices only slightly lower since a number of dealers are still in the market for quantities of most issues. Interest in the 1973-P and D and the 1976-P (I) rolls has again resulted in plus signs. A few Morgan rolls are a bit lower--most of the bidding in this area currently falls into the bargain-hunting category (very few actual sales have been recorded.) The key 1893-S sells quickly in any grade when offered at a "reasonable" price.

**PROOF SETS and MINT SETS:** Bidders continue to be interested in locating rather large quantities of the 1968-72 S-mint sets--and, in addition, this quantity bidding now includes the 1961-64 issues. Bids have been inched forward for several dates but sellers in general somehow manage to keep their prices just ahead of the bidders. As a result, actual sales have been rather limited. Buyer interest remains strong at current levels for both the 1970 and 1973 mint sets (again, transactions have been light.)

**COMMEMORATIVES:** One major commem dealer has slightly advanced bid levels for numerous "type" silver issues--quantities of strictly MS-65 specimens are wanted. Several prices have moved lower for the gold issues--with only mild "below market" interest noted.

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$131.50 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## S-MINT PROOF ROLLS OFFER INTERESTING COMPARISONS Early Type Still Difficult To Locate; Mild Profit-Taking Affects Ike Dollars

### The Market in Depth

ALLEN HARRIMAN

Over the months numerous subscribers have written to ask why prices for the various S-mint proof rolls vary as widely as they do—especially when considering that mintage figures for the 1968-75 proof sets do not vary nearly to the same extent. Several factors must be examined when looking at this area of the market—not the least of which, of course, is the fact that a few “promotions” have directly affected prices for specific rolls. The 1970-S dimes and quarters as well as the 1974-S nickels are such examples. Prices for the two 70-S issues have been edging back to “normal” levels for months now—the 74-S soared during a promotion a year or so ago and is still by far the highest priced S-mint Jefferson roll. (Even though the total mintage of the 74-S nickel is only about five percent lower than the 73-S, the current bid price is 129% higher!)

Of prime importance when considering S-mint proof roll prices is whether the coin involved is a “proof only” issue or not. All of the dimes, quarters and halves fall into this category; the 1968-70 nickels do not—while the issues from 1971 to date do. And, of course, only the 1975 and 1976 Lincolns are “proof only” issues. Pre-1973 proof sets did not include Eisenhower dollars and the glamour of the S-mint clad proof dollars from 1973 to date has been somewhat reduced due to the separate minting of both 40% silver BU and proof S-mint dollars. The clad dollar from the 1975-S proof set, however, is the “type one” variety and this has added a considerable premium over the “type two” dollar which is found in the 1976-S six-piece set. (The circulation mintage of the “type one” dollar is quite low at 3,644,000.

A major exception to the price pattern is the current bid of \$100 for the 70-S Kennedy roll. Since no 1970 halves were minted for circulation, both the 70-D (from government issue mint sets only) and 70-S proof halves receive a considerable amount of attention. These two issues will probably remain the “keys” to the Kennedy set—unless something unforeseen happens in 1977 (which well may be the last year of half dollar minting).

The following is a comparison chart on the 1968 to date proof sets—showing the premium currently offered for the individual S-mint proof coins versus current bids for intact sets. As can easily be seen, the premium ranges from a low of only 38¢ for both the 1968 and 1969 sets to a rather interesting \$2.77 for the 1974 issue! It should be noted that the rush to “break up” S-mint proof sets slowed considerably as the years passed—and, it seems, that 1973 and 1974 sets may have been the least dismantled issues thus far. The first “proof only” Lincolns again encouraged widespread breaking of sets in 1975 and, to some extent, in 1976. The 76-S cent roll, however hasn’t enjoyed the same wave of enthusiasm as the 75-S version—due possibly to the as yet unknown mintage of the later issue (which it is estimated may end up around four million). The 1975-S six-piece set, then, is rather unique in having both the highly sought after Lincoln cent as well as the “type one” clad proof Eisenhower dollar.

Set	Mintage	Current Bid Complete Set	Current Bid Individual Coins	Premium For Individual Coins
1968-S	3,041,509	\$ 3.40	\$ 3.78	\$ .38
1969-S	2,934,631	3.30	3.68	.38
1970-S	2,632,810	7.60	7.99	.39
1971-S	3,224,138	3.40	4.40	1.00
1972-S	3,267,667	3.50	4.39	.89
1973-S	2,769,624	9.50	11.07	1.57
1974-S	2,617,350	10.00	12.77	2.77
1975-S	2,909,369	21.00	22.49	1.49
1976-S	Not Determined	10.75	12.22	1.47

### This Week's Market

**CENTS:** This area of the market remains quiet. Buyers can locate virtually any Lincoln roll without problem and, as a result, practically all bidding noted is below market and rather unenthusiastic. Early type material has scored several more gains—see page five.

**NICKELS:** Interest is strong for large quantities of circulated Liberty Nickels—one dealer is in the market for at least one hundred rolls of full Good or better pieces and will pay \$1150 per bag. Little can be said for the BU roll market this week—prices are lightly mixed and actual trading remains at a minimum (one or two buyers want BU and circ Jefferson roll sets, but they are strictly looking for below market bargains).

**DIMES:** The 1942/41 Mercury is appearing on numerous “want lists” and bid prices have moved higher for all grades, bidders will take quantities—but they seldom locate more than an occasional specimen. Interest is quite strong for most of the pre 1941 Mercuries with special emphasis still focused on the Denver issues.

The Roosevelt series is very quiet; single 1946-64 BU sets are moderately trading in the \$55-\$59 range.

**QUARTERS:** Several dealers again want rather large quantities of circulated Standing Liberty quarters—the bid for Good or better rolls has now edged up to \$34.50 and so far buyer needs have been only partially filled. Slight gains are noted for the 46-S and 58-P Washington rolls—otherwise, the series is unchanged in extremely light trading.

**HALVES:** The 1934-P Walking Liberty is proving to be extremely elusive in choice full MS-65 condition—rolls seem to be almost out of the question and singles are now seldom encountered on the teletype circuits. Dealers are also finding that even asking for “quotes” on gem, fully struck 1941-S halves is ineffective (one buyer has offered to pay \$100 to no avail.)

1946P - Up once again—bid is now \$285

1946D & S - These two are both lower at respective ask levels of \$310 and \$360

1952P, 55P, 56P & 58P - All are available at slightly lower levels

**DOLLARS:** This week is a virtual repeat of last week's trading. The Eisenhower dollars continue to reflect mild and orderly profit-taking (with small advances registered by the 71-D, 72-D and 76-P (I) rolls.) Single complete sets are now pegged in the \$125-\$137.50 range and the clamor to buy has abated noticeably. Changes this week on the Morgan and Peace charts are minimal.

**PROOF SETS and MINT SETS:** Bidders still hesitate to advance bid levels although several are still in the market for relatively large quantities of 1961-64 sets as well as all of the S-mint sets. A bit of profit-taking has edged the '70 mint set back to the \$15.50-\$16.50 range; the '73 issue remains strong at \$16.50 bid.

**COMMEMORATIVES:** Once again bids have moved ahead for many of the silver “type” issues—with very little interest evident for the various PDS sets and singles not needed to complete fifty piece sets.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$132.30 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## CAUTIOUS BIDDING FOR BU ROLLS NOTED Dealers Are Also In The Market For BU Roll Sets

### The Market in Depth

ALLEN HARRIMAN

There has been a noticeable increase in bidding for BU rolls during the past couple of weeks. Potential buyers, however--almost without exception--are keeping their bids rather low and sales thus far have been quite limited. After a major price set-back such as was experienced in recent months, it is only natural that bidders would proceed cautiously when they or their investors want to pick up some of their favorite rolls. It is encouraging, nonetheless, to see that numerous dealers are now running frequent buying lists which cover this relatively depressed area of the market--and that selling lists are far less extensive and prices more "firm".

A few dealers are interested in the usual "popular" rolls--and it is for such dates as 50-D nickels, 55-PDS dimes, 55-D and 58-P quarters plus the later P-mint halves that prices have already begun to edge forward. In general, these bidders want fairly large quantities. For many other of the less "volatile" dates in all series, the buying attempts have been for smaller quantities each of several issues. There are investors who are now "researching" the BU roll market to determine which may be the rolls with the most potential--rolls which were rather elusive even in the "down" market. It should be noted that it is not unusual for even a scarce roll to slip to much lower price levels during a widespread slump in the market such as was recently recorded. When prices are being lowered "right and left", very few buyers will step in and take rolls even if they are dates which are seldom offered. The natural tendency is to expect still lower prices "next week" and, for the most part, even the tough dates are ignored by most teletype readers. When the "bottom" is reached--as now seems to be the case--these more elusive issues are usually withdrawn from the market (some, perhaps, being purchased by astute investors or dealers who were "on their toes").

As an example, two or three bidders have been in the market for several earlier dates in the Washington series (1941-D & S, 1942-D & S, 1943-D & S) and several Walking Liberty rolls (1946-P, 1947-P & D). Although these--and other similarly scarce rolls--were on the selling lists of a few months ago, they are not easy to locate now. True, some of the current bidders still hope to locate such dates at "bid"--or even slightly less--but indications are that those astute enough to put these dates aside aren't willing to sell "at the bottom".

In addition to interest in various specific issues, a few dealers are also now attempting to locate BU roll sets--from Lincolns thru Franklins. So far bids for the Lincolns and Jeffersons are a bit "below market" (and none have been offered to bidders). Buyers who want "short sets" of Mercuries, Roosevelts and Washingtons are generally willing to "pay bid--or perhaps slightly more"--again, sellers are very few and far between. For the BU roll set of Franklins, bids have already edged forward--but even advanced levels have yet to produce results. The Kennedy roll set, by the way, is also on several "want lists"--and, here too, higher bids are being ignored.

### This Week's Market

**CENTS:** The still advancing 1972/72 double die is now receiving bids as high as \$110--with very few transactions recorded (at least one dealer wants roll quantities). One major buyer is now asking for numerous Lincoln rolls in the 1934-55 range--and offering to "pay bid" isn't netting many "choice original rolls". Scattered dealers occasionally have a few rolls for sale, but they often do not qualify as rolls "suitable for single sales".

**NICKELS:** Mild interest is now evident for the various wartime rolls--as well as a few other Jefferson issues (39-D & S, 42-D, 50-D, 52-D, 55-P); price changes are minor and mixed. Bargain-hunting is noted for choice BU single sets and roll sets--none have been offered to current below market bidders. Several dealers continue to include 1937-D 3-legged Buffalos on their "want lists"; prices have advanced for the higher grades this week--and, again, quantities are needed.

**DIMES:** Scattered small gains have been registered for both the Mercury and Roosevelt rolls, although most buyers are keeping their bids at present levels. Actual sales have remained quite limited throughout the week. One dealer is in the market for the Denver version of the 1942/41 dime; the following bids have been unsuccessful thus far:

GOOD	\$100	FINE	\$125	EXTRA FINE	\$200
VERY GOOD	\$110	VERY FINE	\$150	CHOICE AU	\$350

**QUARTERS:** Both of the "key" Standing Liberty quarters--1916-P and 1918/17-S--are enjoying strong demand; buyers will take "several pieces" in any grade. Sellers, on the otherhand, are extremely difficult to locate on any of the various teletype circuits. (check price advances for the 16-P on page four.) Numerous Washington rolls are appearing on buying lists--but still mostly at current levels. Exceptions are: 1944D - A transaction or two noted at \$110  
1955P & D - Both are wanted at higher respective bids of \$36 and \$86  
1958P - One buyer will now take quantities at \$40

**HALVES:** Although prices have edged forward only slightly, both the 1947-P & D Walking Liberty rolls are wanted by several dealers--and they appear to be quite elusive at today's prices. Fully struck choice MS-65/better 1941-S halves are now wanted by at least one bidder at \$125! The bid for the BU roll set of Franklins has moved to \$4650--with no sellers in sight. Also in demand is the complete thirty-two issue roll set of Kennedy halves; bid has advanced to \$1290--again with no sellers having been located. All of the S-mint proof Kennedy rolls, by the way, are sporting plus signs this week.

**DOLLARS:** Numerous price "adjustments" have been recorded this week--in both directions. These changes mostly involve the "under \$200 rolls" and several of the Carson City singles. Many dealers are in the mood to buy bag quantities of most common dates--but, of course, they are "shopping" for the best possible price. Changes in the Eisenhower series are minimal this week--the 1973-S "blue" and "brown" issues are slightly lower and small gains have been registered by the 1973-P & D and the 1976-P (I) rolls.

**PROOF SETS and MINT SETS:** Activity in this area still centers around the 1970 and 1973 mint sets--bid higher this week at \$15.75 and \$17 respectively. The 1975 and 1976 mint sets seem rather elusive at current prices--quantities of both are wanted. The entire proof set line-up is virtually unchanged; several dealers are bidding for relatively large quantities of sets--but they are generally keeping their offering prices at recently established levels.

**COMMEMORATIVES:** Another run of plus signs has been noted for most of the fifty-piece "type set" issues--with the other issues still lagging behind. A few more bidders are entering the commem market, while most of the sellers are on the sidelines.

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$131.00 per ounce.

## THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

**INVESTORS NOTE:** the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

### ADVERTISING RATES:

\$10.00 per column inch; four  
consecutive ads (no changes) -  
10% discount.

Advertising space is limited; ads will  
be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## GEM TYPE GOLD ELUDES BIDDERS

Kennedy Halves Appear On Numerous Buying Lists; Silver Commems Score Further Gains

### The Market in Depth

ALLEN HARRIMAN

Increasing demand for "type" gold has been noted on the various teletype circuits for the past several weeks. Particular emphasis, of course, is being placed on attempts to locate "gem MS-65/70" specimens--and, thus far, most bidders are going empty-handed. This week's rash of plus signs across the price chart (this page) is evidence that at least a few dealers are tired of trying to locate the pieces they need at previous bid levels. As usual, when prices advance in an area of the market such as this, grading becomes all-important. Potential sellers often take a chance that a coin "will stick" even though it isn't a gem--and potential buyers often seem to be looking for "finest known" specimens. Actual sales in this category are usually quite limited. One major buyer, by the way, is currently willing to top even this week's higher bids--substantially, in some cases--to get just the right coins. Needless to say, however, few if any "right" coins have been located to date. Such gem specimens do exist, of course--but they are the coins which almost always bring top dollar thru private treaty sales or at major auctions. They very seldom appear for sale on the teletype circuits.

Even the more "common" gold type coins are very difficult to find in top condition. Witness the fact that for months now several dealers have been trying to buy gem specimens of the \$2½ Indian. Even though the bid has advanced from \$150 in January of this year to its present \$220 (a 46% gain), very few true gems have changed hands. Perhaps the easiest gold type coin to locate is the \$2½ Liberty. Pieces dated between 1900 and 1907 were apparently saved in some quantity and in spite of the fact that the 1908-29 Indians carry considerably larger mintage figures, these later coins were nearly all circulated to at least a minor degree. This accounts for the fact that the earlier Liberty type is now priced at only \$185 compared to \$245 for the Indian--with the Indian showing every indication of moving even higher.

Other "common" types which are very elusive in "gem MS-65/70" condition are the "with motto" \$5 and \$10 and the "type three" \$20 Liberties. Although there is an abundance of MS-60/65 (or even "choice MS-65") specimens available, true gems are very few and far between. Most collectors want top quality in their type sets and many feel that these late relatively inexpensive issues should be represented by gem specimens. They are often surprised at how difficult it is to find this quality in the "common" date category.

Strong interest is also noted, by the way, for the 1955/55 double die Lincoln. Circulated pieces are rather simple to locate, but truly original MS-65/70 examples are not. Most of the "full red" pieces seen in recent years have been cleaned and recolored--and, as time passes, these coins begin more and more to show the effects of such processing. They often develop spots or discolorations and the color begins to appear a bit "off". The uncleaned original coin, on the otherhand, seldom suffers these problems if preserved properly. Current bids for full MS-65/70 pieces range in the \$450-\$500 area--with most dealers just asking for "quotes".

### This Week's Market

**CENTS:** The 1972/72 double die remains at \$110 bid; an occasional single is now offered for sale around \$115. BU rolls are again basically unchanged--with small losses noted for a few of the late S-mint proof rolls.

Recent bids for the various two-cent issues in all grades have been recorded as follow (see the enclosed MONTHLY SUMMARY article on this series):

	G/VG	FINE	VF	XF	AU
1864-65	\$ 2.60	\$ 3.85	\$ 7.25	\$19.00	\$ 45.00
1866-68	2.80	4.00	7.75	21.00	47.50
1869	3.00	4.25	8.25	22.00	50.00
1870	3.40	6.00	10.00	25.00	55.00
1871	4.25	7.00	12.00	27.50	60.00
1872	28.00	50.00	70.00	85.00	110.00

**NICKELS:** The wartime Jefferson are now appearing on several "want lists"--bidders want the various individual rolls (gains noted this week for 44-D & S and 45-D), single sets and, in some instances, complete BU roll sets. Most sellers in this area are keeping their price tags just ahead of the bidders. The 1950-D roll is also in the plus column--with a few sales registered during the week as high as \$280.

**DIMES:** Several dealers need specific dates in both the Barber and Mercury dime series. They want only "choice MS 65 or better" specimens, and, in the case of the Merces, only "full bands" coins will satisfy most quality-conscious buyers. Listing prices that they will pay hasn't been very effective, so now many bidders

are simply asking for "quotes". As usual, however, most dealers have retail customers for this kind of choice material and such coins seldom reach the teletype circuits. The roll market remains relatively quiet--with only scattered sales being registered.

**QUARTERS:** Continued attempts to buy the key Barber and Standing Liberty quarters "in any grade" are meeting with very little success. Most dealers are aware that edging bid levels a bit higher week after week doesn't necessarily result in actual transactions, so, for the most part, bids remain at current levels although interest is very strong. Bids for the higher grades, however, have been advanced this week--see page four. The entire Washington series is quiet--with the exceptions of two gainers (44-D bid now at \$112 and 55-D at \$90).

**HALVES:** Bid for BU roll set of Franklins has reached \$4700--which is about \$100 over the total of the bids for the individual rolls. Still, no sellers have stepped forward. In addition, a few dealers want up to ten rolls of virtually all the Franklin issues "at bid"--with only an occasional sale being recorded. Several minor changes are evident this week in the 1941-47 Walking Liberty group; the 1947-P & D rolls are still rather elusive in spite of higher respective bid levels of \$365 and \$355. Further efforts to buy complete BU and proof roll sets of Kennedy halves (now at \$1300) have still been unsuccessful.

**DOLLARS:** Considerable bidder attention is being directed toward the four low priced S-mint issues from 1879 thru 1882--all carry plus signs this week and all are wanted in quantity. These issues (as well as the 1898-1904 New Orleans coins) have all but disappeared from current selling lists--at least at prices in line with present levels. The Eisenhower series continues to witness mild profit-taking (with scattered exceptions--check page six).

**PROOF SETS and MINT SETS:** Small losses are noted across both the proof set and mint set charts--with both 1973 issues bucking this trend. Sales have been light to moderate throughout the week.

**COMMEMORATIVES:** Once again advances have been registered by the same "type" silver issues. One major commem buyer needs "quantities" of all of these issues--as long as they are strictly MS-65 specimens. (Apparently there are a number of "super slider" or MS-60 pieces on the market--but these are of little interest to current buyers.)

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$137.40 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## "CHRISTMAS BUYING" DOMINATES TELETYPE CIRCUITS No Issue Next Week (Next CDN Will Be Dated 12/31) -- Happy Holidays!

### The Market in Depth

ALLEN HARRIMAN

"Christmas trading" has dominated teletype activity for the past week or so. This year's various new holiday "gimmicks" seem to be selling relatively well and, in addition; many dealers are running "want lists" for specific material which is obviously earmarked for gifts. Along these lines, retail clients want such items as birthyear sets, "short sets" of Buffalos and Mercuries and similar reasonably priced complete sets (Roosevelts, Washingtons, Franklins and Eisenhoweres). In addition, specific single dated coins in many earlier series are wanted for--collections again obviously destined to be placed under a Christmas tree!

Quite a stir of interest has been created on the several teletype circuits by the recently discovered "upside-down" one dollar notes--which have now been discovered for at least seven of the twelve Federal Reserve districts. These notes, as a considerable amount of publicity has explained, have inverted serial numbers and seals. The current active bidding for these notes in full CU condition is already in the \$125 range. Estimates currently are that "at least one thousand" of these one dollar overprint error noted were produced.

A late teletype FLASH has just announced the discovery of some five dollar Federal Reserve notes from the St. Louis district with the same inverted overprint error. No estimated quantity of this five dollar note production has yet been made--but major teletype dealers are already offering to pay at least \$200 for CU specimens!

As subscribers know, few if any price changes have taken place in the area of proof coins for several weeks now. As one dealer recently said, "proofs seem to be more or less out of favor at the moment". This, of course, doesn't mean that proof coins aren't trading--but, in general, choice BU specimens of the P-mint issues are enjoying considerably greater demand. Those collectors and investors who are presently interested in proofs almost all want "superb gem" specimens--coins that fall into (or at least extremely close to) the MS-70 grade. It should be mentioned once again that the bid-ask price listings on page five are for MS-60 and MS-65 proofs. The second column of MS-65 prices is not for superb flawless coins--although there are many buyers who do apparently expect to buy MS-70 gems within the current MS-65 bid-ask range. (Occasionally, of course, they may be successful--but, in general, absolutely flawless proof coins are very few and far between and few dealers will part with them without receiving a reasonable premium.)

PLEASE NOTE that there will be no issue next week! As usual, the CDN is not published Christmas week; your next issue will be dated December 31st and will contain Part One of a review of the 1976 numismatic market. BEST WISHES FOR A VERY HAPPY HOLIDAY SEASON AND A VERY PROSPEROUS NEW YEAR FROM THE ENTIRE CDN STAFF!

### This Week's Market

CENTS: The "1959 to date" BU roll set is now pegged in a slightly lower \$1175-\$1300 range--with an occasional single set trading around \$25-\$27. These sets, of course, include all of the S-mint proof issues as well as both "small dates". Very little interest is noted for the 68-S thru 74-S rolls--and most of the current bidders for the "proof only" 75-S and 76-S rolls are looking for bargains. Frequent buying lists continue to include all of the key and semi-key Indians and Lincolns--present bid levels encourage only scattered transactions. In addition, several dealers want "gem BU" early Lincoln singles--but locating problem-free specimens is very, very difficult!

NICKELS: The 1938-64 Jefferson roll set is a bit higher this week at \$3500 bid--with single sets trading lightly within the \$90-\$95 range. Last week's interest in BU wartime rolls is still evident; several potential buyers want five to ten rolls of each issue (small advances have been noted for 42-P, 44-D and 44-S). Large quantities of circ Buffalo rolls are wanted--respective bids of \$2.90 and \$4.95 for "dateless" and "full four-digit date" rolls are meeting with only limited success.

DIMES: Further gains have been registered by some of the pre-1941 Mercury rolls--the 35-S roll is now bid at \$660, the very elusive low mintage 38-D at \$615 and the 38-S at \$495. Seller of the 1934-40 mintmarked rolls are now seldom encountered--and the few rolls which are located usually carry price tags somewhat "ahead of the market". The Roosevelts are very quiet in light trading,

some interest is evident for the 53-S, 54-S and 55-PDS rolls at current price levels. Single '46-'64 sets record moderately active trading in the \$55-\$59 area.

QUARTERS: Bid for the complete silver Washington set 1932-64 has moved to \$1750; this offering price, of course, is for strictly MS-65 or better coins--and, so far, few if any sets which fit this description have changed hands. The 1941-64 BU roll set has also advanced this week--to \$6250 bid (single "short sets" are now registered in the \$160-\$175 range). Two or three major buyers are in the market for quantities (occasionally up to a bag) of common circulated Barber and Standing Liberty quarters--sales have been light to moderate within current bid-ask ranges.

HALVES: A few more gains have been registered by the Walking Liberties: the 39-P roll is now bid at \$770, the 44-D at \$330 and the still in demand 47-P & D rolls at \$375 and \$365 respectively. The Franklins remain on numerous "want lists"--price levels are virtually unchanged (only 48-D and 54-D are slightly lower). Bid for the very elusive 1839-O half has advanced substantially during recent weeks; one buyer is now offering to pay: Good \$60, VG \$80, Fine \$115, VF \$225, XF \$350 and AU \$575 (check these prices against the current Guidebook listings)!

DOLLARS: With the exception of the 1973-S "brown" issue (the 40% silver proof), the Eisenhower series is unchanged this week. Several buyers are once again interested in small to moderate quantities of a number of issues now that prices have "calmed down" a bit. Bids of \$2300 still fail to produce roll sets although a few single sets have been traded within the current \$120-\$132.50 range. The Morgans have registered a few small advances--mostly for the common date rolls which are wanted by the bag. Gains for the 86-O and 92-O are for strictly choice MS-65 specimens (the latter issue is particularly elusive in top condition).

PROOF SETS and MINT SETS: Very few changes--and rather light trading has been noted this week. Several bag-in-hunters remain on the scene.

COMMEMORATIVES: Further advances for the various "type" silver issues have again been recorded. The major buyer in this area wants quantities of each as long as they meet the MS-65 qualifications. (There still seems to be a number of lesser quality pieces for sale on the circuits.)

U.S. GOLD: (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$136.50 per ounce.

THE COIN DEALER NEWSLETTER

reports the national coin market on a weekly basis. Under the present system, it is impossible to monitor all transactions or offers to buy and sell, but the broad information sources of the Newsletter make it a very accurate reflection of the market.

INVESTORS NOTE: the prices in the Newsletter are from dealer-to-dealer transactions. As an investor, you may place your buy and sell orders through a dealer for a fee, as you would buy stock through a broker.

ADVERTISING RATES:

\$10.00 per column inch, four consecutive ads (no changes) - 10% discount.

Advertising space is limited; ads will be placed in first possible edition.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.

## A REVIEW OF 1976—PART ONE

### A Look At The Year's Action In Cents, Nickels, Dimes And Quarters!

## The Market in Depth

ALLEN HARRIMAN

A REVIEW OF 1976 — PART I

This week and the two following will be devoted to a summary of the year's activity in BU rolls, dollars, proof sets and commemoratives. This follows our mid-October review of the type coin market. Many dealers and investors are looking forward to an active collector and investor market in 1977—the following comments on various areas of the market should come in handy for those who feel that the coming months will be important ones for the informed buyer.

**CENTS:** The BU Lincoln roll market began '76 very quietly—and it remained nearly unchanged during the first three months of the year. Strong buying (in the "promotion" category) started in April and continued thru the end of May—a plateau was reached during June and July—and the inevitable "sell-off" began in early September and lasted thru October. The Lincoln series is currently in another quiet "plateau" period.

The 1934-58 issues moved from a total of individual bid levels of \$1910 in January to \$2127 in late May—an increase of 11%. Strong quantity bidding was the rule during the April-May period. By the end of the year, however, lack of sustained investor interest in this area of the market had resulted in a bid of only \$1705 for all of the individual rolls in the '34-'58 group—a loss of 19% from the May high and an overall loss of 10% for the year.

The 1965-74 issues—including the S-mint proof rolls—were bid at a total of \$322 in January, \$364 in late May and \$317 in mid-December. These figures constitute a 13% gain during the "hot" period in late Spring and a very minor overall loss of 1% for the entire year. These figures do not include prices for the 75-S and 76-S rolls for the obvious reason that trading in these first "proof only" Lincoln rolls has been extremely volatile. Interestingly, the "peak" for both of these issues was reached during the last week in May—with the 75-S receiving bids of \$800 and the 76-S of \$625! The mid-December bids for these two rolls were \$625 and \$285—losses of 22% and 54% respectively.

**NICKELS:** The biggest winner in the Buffalo nickel "short set" during 1976 was the scarce 1934-D single—moving from a bid of \$31 in January to its present \$37 (a gain of 19%). This issue in well struck MS-65 condition is still eluding buyers at this higher level. The year-end results for the various rolls in this group are widely mixed as follows: 34-P up 10% (\$825 vs \$750); 35-P and 36-P both up an unimpressive 1%; 35-D up 9% (\$900 vs \$825); 35-S up 8% (\$500 vs \$460); 36-D down a small 1% for the year; 37-PDS all down—23%, 13% and 9% respectively (a large quantity of 37-P rolls hit the market during '76—which accounts for this unusually sharp drop in the Buffalo group and which may well have dragged the Denver and San Francisco rolls along with it); 38-D no gain—began and ended the year at \$250 bid.

The total of the bids for all individual rolls in the 1938-64 Jefferson series was \$4235 in January—a 6% gain to \$4515 had been registered by the end of May. However, the selling which followed in late Summer reduced the total of these bids to a mid-December level of \$3782. This constitutes an overall loss for the '38-'64 series of 10%—and a 16% drop from the highs reached in May. Few rolls stand out as individual performers in '76. Perhaps the most active issue was the relatively scarce 1950-P—beginning the year at a low \$25, advancing to \$50 by mid-May and ending the year with a gain of 30% gain at \$32.50 bid. The semi-key 49-S and 51-S rolls lost 20% and 25% respectively; the 50-D roll finished the year virtually unchanged with sales in both January and December around \$280. Relatively active at year's end, the wartime issues recorded mixed results for this past trading year. The gainers in this group include: 42-S up 14% (\$128 vs \$112); 44-S up 18% (\$65 vs \$55); 45-P up 6% (\$55 vs \$51.50) and 45-D up 12% (\$45 vs \$40). The losers were: 42-P (II) down 3%, 43-P down 14%, 43-D down 3%, 43-S and 45-S both down 12%, 44-P down 10% and 44-D down 1%.

The 1965-74 Jeffersons dropped a substantial 20% during the past twelve months—due, of course, to the lowering of price levels for the various S-mint proof rolls. The 1974-S, in particular, was a highly promoted issue—reaching \$180 bid during April and May; it has ended the year at \$130 for a drop of 27% from this peak (and still by far the highest priced proof roll). The 75-S roll began the year at \$125 bid and the 76-S began trading at \$100 bid; these two were pegged at \$85 and \$48 respectively in mid-December for losses of 32% and 52%.

**DIMES:** In spite of the fact that 1976 was not "the year of BU rolls", all of the Mercuries performed rather well. The three key singles in the '34-'45 group registered the following advances: 34-D up 18% (\$47.50 vs \$40); 35-D up 6% (\$80 vs \$75) and 36-D up a strong 42% (\$50 vs \$35). The overall 1934-40 roll group gained an average of 16%—and the 1941-45 issues did even better with an 18% advance for the year! Gains in this series were basically of a steady nature—the Mercuries not having been affected noticeably by either the Spring roll "promotion" or by the "sell-off" which followed later in the year.

During the past year particularly strong bidder attention has been directed toward the pre-1934 Mercury singles. Especially wanted, of course, are choice MS-65/better specimens with "full bands". Guidebook "Unc" prices have been left far behind—bidders, in many instances, offering to pay upwards of "double Redbook" for exceptional pieces. The new MONTHLY SUMMARY keeps CDN subscribers abreast of volatile bid levels in this as well as numerous other series—check your latest copy against the current Guidebook listings!

The 1946-64 Roosevelts present somewhat of a surprise with their overall gain of 9% during 1976. This advance held in the face of the rather major drop in roll prices which took place in September and October. (It should be mentioned that between early January and late May, the '46-'64 silver Roosevelt rolls had registered a substantial 25% gain—meaning, obviously, that after May the series lost 16% of this advance—to account for the 9% gain still in effect for the entire year.)

The 1965-47 Roosevelt issues fared far less impressively than their earlier silver counterparts—due to the lack of interest in the S-mint proof rolls. At the beginning of the year the rolls in this later group were bid at a total of \$478; by mid-December this figure was down to \$411—a loss of 14%. As with the other denominations, we are not including the 75-S and 76-S rolls in these figures. This is because the first months of trading in new issues is usually quite volatile and wide price fluctuations would almost certainly distort averages for issues which are experiencing more "normal" trading. (The 75-S roll began the year at \$100 bid and ended at \$75; the 75-S roll began trading in the Spring at \$90 and by mid-December was down to \$48.)

**QUARTERS:** The 1932-D has definitely led the action in early Washingtons during '76—moving from \$395 bid in January to its current level of \$600 (an impressive 51% advance!) Even at today's bid, dealers are still finding that this is an extremely elusive coin in strictly choice MS-65 or better condition—practically every "BU" specimen encountered is a "super slider" (or simply AU).

The other pre-1941 singles fared during 1976 as follows: 32-P unchanged at \$23 bid; 32-S up 19% (\$215 vs \$180—and still quite scarce at this higher bid); 34-D, 35-D and 36-D all up an average of only about 4%; 35-S and 36-S up 31% and 16% respectively (due to recent strong buying attempts by one major bidder); 37-D up 10% and 37-S up only 4%; 38-S and 39-S up 9% and a small 2% respectively. The two losers were 38-P (down 2%) and 40-D (down 5%). The only changes of note for the pre-1941 rolls were recorded for the 37-P (up 14% - \$600 vs \$525); 39-P (up 22% - \$295 vs \$240); 39-D (up 13% - \$650 vs \$575) and 40-S (down 20% - \$360 vs \$450).

The BU roll "promotion" which was the highlight of late Spring trading actually had very little effect on the Washington series. There were, of course, a few exceptions—but most dates advanced only 2%-5% during this period. Those few rolls which enjoyed a bit of the action included: 46-S up 39%; 47-P up 29%; 47-S up 20%; 50-P up 22%; 52-P up 23%; 53-P up 27% and 54-S up 18%. Unfortunately these gains were all in effect by the end of May and, on the average, were reduced by about half by the end of December (except for the 54-S roll which ended up right back where it started a year earlier).

The overall 1941-64 group lost 5% during the lackluster trading of '76. The 1965-74 issues performed much worse because of the out of favor S-mint proof rolls—losing a substantial 20% during this same period. Prices for these proof only issues—although at their lowest levels ever—are currently appealing to very few investors. This trend, of course, could reverse itself quickly should any change or variation in the Washington series take the numismatic fraternity by surprise!

**U.S. GOLD:** (Prices are for the most common date of each type.) Bullion related gold coins in this issue are figured on a basis of gold at \$134.80 per ounce.

The following prices are for choice MS-65 rolls. In the Lincoln series, spotted or otherwise inferior rolls are worth less than listed prices and "gem" rolls often bring more. In the Jefferson series, some of the later rolls tend to be dark—these bring lower prices; "gem, full steps" rolls (when available) bring higher prices. In the Mercury series, "gem, full bands" rolls are worth more than listed prices—particularly the pre-1941 issues. Most original Washington rolls tend to be MS-65—dull or "put together" rolls of the earlier issues bring lower prices. Gem full-strike Walking Liberty rolls (particularly the S-mint issues) are worth more than listed prices.
